

KLG-RGO-200MG

KLG-RGO-200MG is 200 mg of reduced graphene oxide (rGO) powder, in a single sealed glass jar. Kennedy Labs' rGO is made from graphene oxide produced using a Modified Hummers' method. This powder is conductive, and hydrophobic.

Specification

Quantity	200 mg
Unit	Glass jar
Colour	Black
Consistency	Powder
Carbon Content	85%
