

# Trimpot 10K with Knob

COM-09806 RoHS

**Description:** There are lots of trimpots out there. Some are very large, some so small they require a screwdriver. Here at SparkFun, we just needed a simple one that worked. This 10K trimmable potentiometer has a small knob built right in and it's breadboard friendly to boot! Perfect for your next LCD contrast adjuster, opamp setting, or volume level. This model # is TSR-3386U within the datasheet. <http://www.sparkfun.com/datasheets/Components/General/TSR-3386.pdf>
