## MINIATURE EPOXY POTTED AUDIO TRANSFORMER

Audio input, line matching and output transformers  
Epoxy potted in an attractive molded case, Pin type, P.C. board  
mount, (min. 0.187" length)

Rugged epoxy potted construction produces a completely  
sealed unit withstanding severe environmental conditions.

In some models where no center tap is present (on the secondary), pin 5 is omitted.

Secondary may be used as primary and primary as secondary.

Will withstand soldering for 10 sec. @ 260 degrees C, ambient temp. 85 degrees C max.

Power level: 150mw @ 150 Hz. to 50 Khz.

-Freq. range @ +0 dbm is 150 Hz. to 80 Khz. +/- 1.5db

-Freq. range @ +10 dbm is 150 Hz. to 80 Khz. +/- 1.5db

-Freq. range @ +20 dbm is 150 Hz. to 80 Khz. +/- 1.5db

-Freq. measurements with no D.C. saturation.

\*\* The epoxy that is used to cast these parts has a workable temperature range of  $-40^{\circ}\text{C}$  to  $+105^{\circ}\text{C}$   
 Under a normal rate of change, this does not include thermal shock.  
 Variations in the transformer materials and environmental conditions may reduce the workable temperature range.
