

# ARTESYN NLP250 MEDICAL SERIES

Single Output

Advanced Energy's Artesyn NLP250-M series of enclosed medical AC-DC power supplies comprises two single output models, providing standard voltages of 12 V or 24 V. Both models also provide 5 V standby and 12 V fan outputs. They accept a universal input of 85–264 Vac and have a low safety ground leakage current. The main output is compatible with systems that implement distributed power and point-of-load (POL) architectures. It can also be used to power electromechanical devices such as relays, motors and pumps. Featuring a thermally efficient U-channel construction that is less than 1U high, the enclosed versions of NLP250-M power supplies can deliver up to 250 watts when cooled by 250 LFM of forced air.

## DATA SHEET

### Total Power:

250 W

### Input Voltage:

85 - 264 Vac

### # of Outputs:

Single

## SPECIAL FEATURES

- Medical safeties
- Active PFC and EN61000-3-2 compliant
- 250 W on main channel with forced air
- Low profile fits 1U applications
- U-Channel for maximum thermal performance
- Optional cover (CJ suffix)
- 5 V standby output
- 12 V fan output
- Integrated control and monitoring features
- Overcurrent, overvoltage and overtemperature protection
- Compliance to EN55022-B conducted noise standard
- Dual AC fuses
- RoHS compliant
- Two year warranty

## SAFETY

- VDE0750/EN60950  
IEC950/IEC60601-1  
File No. 1177400-3336-0759
- UL60601-1  
File No. E186249
- Certificate No. 40014041
- CB Ref DE1-36628

Notes

1. Free air convection. Maximum continuous output power not to exceed 175W. Refer to Figure 1 for the derating curve.
2. 200 LFM (250 LFM with cover) forced air cooling from the longer side. Maximum continuous output power not to exceed 250 W.
3. Figure is peak-to-peak for room temperature rating. Output noise measurements are made across a 20 MHz bandwidth using a 6 inch twisted pair, terminated with a 10 µF tantalum capacitor and a 0.1 µF ceramic capacitor.
4. CAUTION: Allow a minimum of 1 second after disconnecting line power when making thermal measurements. For optimum reliability no part of the heatsink should exceed 115 °C and no semi-conductor case temperature should exceed 120 °C.
5. No external filtering required during conducted emissions testing but some applications may require additional filtering to achieve system compliance. Compliance with radiated EMI specifications may require mounting in a suitable enclosure.
6. This product is only for inclusion by professional installers within other equipment and must not be operated as a stand alone product.
7. Three orthogonal axes, random vibration 10 minutes for each axes, 2.4 G
8. 5 V sb (standby) output is available whenever AC is present, regardless of remote ON/OFF signal status. 12 V (fan) present when main output is present.
9. The 'J' suffix indicates that these parts are Pb-free (RoHS 6/6) compliant. "CJ" suffix indicates covered RoHS version.
10. NOTICE: Some models do not support all options. Please contact your local Artesyn Embedded Power representative or use the on-line model number search tool at <http://www.artesyn.com> to find a suitable alternative.
11. This product is a Component Power Supply and is only for inclusion by professional installers within other equipment and must not be operated as a standalone product. EMC compliance to appropriate standards must be verified at the system level. This product is for sale to OEMs and System Integrators, including through Distribution Channels. It is not intended for sale to End Users.

## ABOUT ADVANCED ENERGY

Advanced Energy (AE) has devoted more than three decades to perfecting power for its global customers. AE designs and manufactures highly engineered, precision power conversion, measurement and control solutions for mission-critical applications and processes.

Our products enable customer innovation in complex applications for a wide range of industries including semiconductor equipment, industrial, manufacturing, telecommunications, data center computing, and medical. With deep applications know-how and responsive service and support across the globe, we build collaborative partnerships to meet rapid technological developments, propel growth for our customers, and innovate the future of power.
