#### Absolute Maximum Ratings

• For ratings of individual members of a series, see Device Ratings and Specifications chart

Continuous	UltraMOV™ Series	Units
Steady State Applied Voltage:		
AC Voltage Range ( $V_{MIACIRMS}$ )	130 to 625	V
Transients:		
Single-Pulse Peak Current ( $I_{TM}$ ) 8x20 $\mu$ s Wave (See Figure 2)	1,750 to 10,000	A
Single-Pulse Energy Range ( $W_{TM}$ ) 2ms Square Wave	12.5 to 400	J
Operating Ambient Temperature Range ( $T_A$ )	-55 to +85	°C
Storage Temperature Range ( $T_{STG}$ )	-55 to +125	°C
Temperature Coefficient ( $\alpha^V$ ) of Clamping Voltage ( $V_C$ ) at Specified Test Current	<0.01	%/°C
Hi-Pot Encapsulation (COATING Isolation Voltage Capability)	2500	V
COATING Insulation Resistance	1000	M $\Omega$

CAUTION: Stresses above those listed in "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

#### Description

The UltraMOV™ Metal Oxide Varistor Series is designed for applications requiring high peak surge current ratings and high energy absorption capability. UltraMOV™ varistors are primarily intended for use in AC Line Voltage applications such as Transient Voltage Surge Suppressors (TVSS), Uninterruptable Power Supplies (UPS), AC Power Taps, AC Power Meters, or other products that require voltage clamping of high transient surge currents from sources such as lightning, inductive load switching, or capacitor bank switching.

These devices are produced in radial lead package sizes of 7, 10, 14 and 20mm and offered in a variety of lead forms. UltraMOV™s are manufactured with recognized epoxy encapsulation and are rated for ambient temperatures up to 85°C with no derating. This Series is LASER-branded and is supplied in bulk, ammo pack (fan-fold), or tape and reel packaging.

#### Features

- Lead-free, Halogen-Free and RoHS compliant.
- High peak surge current rating ( $I_{TM}$ ) up to 10kA, single 8 x 20 pulse, (20mm)
- Standard operating voltage range compatible with common AC line voltages (130  $V_{AC}$  to 625  $V_{AC}$ )
- Characterized for maximum standby current (Leakage)
- Custom voltage types available
- Standard lead form and lead space options

NOTE: 1. Average power dissipation of transients should not exceed 0.25W, 0.4W, 0.6W and 1.0W for 7mm, 10mm, 14mm, and 20mm model sizes, respectively.

### Current Energy and Power Dissipation Ratings

Should transients occur in rapid succession, the average power dissipation is the energy (watt-seconds) per pulse times the number of pulses per second. The power so developed must be within the specifications shown on the Device Ratings and Specifications Table for the specific

device. The operating values of a MOV need to be derated at high temperatures as shown above. Because varistors only dissipate a relatively small amount of average power they are not suitable for repetitive applications that involve substantial amounts of average power dissipation.

Figure 1A - Power Derating for Epoxy Coated

Figure 1B - Power Derating for Phenolic Coated

### Peak Pulse Current Test Waveform

O<sub>1</sub> = Virtual Origin of Wave  
 T = Time from 10% to 90% of Peak  
 T<sub>1</sub> = Rise Time = 1.25 x T  
 T<sub>2</sub> = Decay Time

**Example** - For an 8/20 µs Current Waveform:

8µs = T<sub>1</sub> = Rise Time  
 20µs = T<sub>2</sub> = Decay Time

### Physical Specifications

<b>Lead Material</b>	Copper Clad Steel Wire
<b>Soldering Characteristics</b>	Solderability per MIL-STD-202, Method 208E
<b>Insulating Material</b>	Cured, flame retardant epoxy polymer meets UL94V-0 requirements
<b>Device Labeling</b>	Marked with LF, voltage, UL/CSA logos, and date code

### Environmental Specifications

<b>Operating/Storage Temperature</b>	-55°C to +85°C/-55°C to +125°C
<b>Humidity Aging</b>	+85°C, 85% RH, 1000 hours +/-10% typical voltage change
<b>Thermal Shock</b>	+85°C to -40°C 5 times +/-10% typical voltage change
<b>Solvent Resistance</b>	MIL-STD-202, Method 215F
<b>Moisture Sensitivity</b>	Level 1, J-STD-020C

### Phenolic Coating Option -- UltraMOV™ Series Varistors for Hi-Temperature Operating Conditions:

- Phenolic Coated UltraMOV™ Series devices are available with improved maximum operating temperature 125°C.
- These devices also have improved temperature cycling performance capability.
- Ratings and Specifications are as per standard UltraMOV™ Series except Hi-Pot Encapsulation (Isolation Voltage Capability) = 500V.
- Phenolic Coating is HALOGEN FREE. To order: change 'E' (Epoxy coating) in part number to 'P' (Phenolic coating; e.g. V20P230)
- See Part Numbering System section of this series for more information.
- Contact factory for further details.
- Product marking:

### Tape Specifications for Reel and Ammo Pack Items (Refer to drawings on previous page)

- Conforms to ANSI and EIA specifications.
- Can be supplied to IEC Publication 286-2.
- Radial devices on tape are offered with crimped leads, straight leads, or in-line leads. See Ordering Information.
- For 10mm devices 'P' (component pitch) is 12.7mm when 'F' (lead space) is 5mm.
- 7mm parts are available on tape and reel up to 460 VAC only
- 10mm parts are available on tape and reel up to 510 VAC only
- 14mm and 20mm parts are available on tape and reel up to 550 VAC only
- 7mm devices with 7.5mm lead spacing option will be taped at 25.4mm component pitch and 500 pieces per reel
- 10mm devices with 5.0mm lead spacing option will be taped at 12.7mm component pitch and 1000 pieces per reel

For information on tape and reel packaging quantities, please refer to the Ordering Notes section at the end of this document.

### Part Numbering System

### Ordering Notes:

For standard parts, use the **BASE PART** designator only.

For parts with non-standard options (such as additional form, packaging and lead space options) use, **BASE PART + OPTION CODE**.

**OPTION CODE** items are subject to availability and minimum order requirements. Please contact a Littelfuse representative if you require additional information

#### OPTION CODES:

**X2855:** Nickel Barrier COATED WIRE OPTION

All standard parts use tinned copper clad steel wire. Nickel Barrier Coated Wire is available as an option, consisting of Copper Wire with a flashing of Nickel followed by a top coating of Tin.

**To order:** append standard model **BASE PART** number with "X2855." Example:

Standard Model	Order As
V18ZA40P	V18ZA40PX2855

#### PACKAGING:

Littelfuse UltraMOV™ varistors are shipped standard in bulk pack with straight leads and lead spacing outlined in the dimensions sections of this document. Contact a Littelfuse representative to discuss non-standard options.

#### Standard Part Default Conditions

Device Size	Part #	Lead Space	Packaging
7mm	V07E-	5.0-/±1	Bulk
10mm	V10E-	7.5-/±1	Bulk
14mm	V14E-	7.5-/±1	Bulk
20mm	V20E-	10.0-/±1	Bulk

#### Standard Bulk Pack Quantity

Varistor Voltage	Standard Bulk Pack Quantity			
	Varistor Model Size			
	7mm	10mm	14mm	20mm
130 – 275	1500	1000	700	500
300 – 460	1500	700	600	400
510 – 625	1500	700	500	400

#### Tape & Reel Quantity

Varistor Voltage	Shipping Quantity Per Reel			
	7mm	10mm	14mm	20mm
130 – 275	1000	500	500	500
300 – 625	1000	500	400	400

### UltraMOV™ 25S Varistor Series

#### Description

The UltraMOV™ 25S Varistor Series is designed for applications requiring high peak surge current ratings and high energy absorption capability. UltraMOV™ varistors are primarily intended for use in AC Line Voltage applications such as Surge Protective Devices (SPD), Uninterruptable Power Supplies (UPS), AC Power Taps, AC Power Meters, or other products that require voltage clamping of high transient surge currents from sources such as lightning, inductive load switching, or capacitor bank switching.

These devices have 25mm square forms are produced in a radial lead package and offered with straight leads. UltraMOVs are manufactured with recognized epoxy encapsulation and are rated for ambient temperatures up to 85°C with no derating. This 25S Series is LASER-branded and is supplied in bulk packaging.

#### Agency Approvals

Agency	Agency File Number	Status
	E320116	Approved
	091788	Approved

#### Additional Information

Datashheet

Resources

Samples

#### Features

- Lead-free and RoHS compliant.
- Custom voltage types available
- High peak surge current rating ( $I_{TM}$ ) 22kA, single 8/20 $\mu$ s pulse, (25mm)
- Standard operating voltage range compatible with common AC line voltages (115 to 750VAC)
- Standard lead form and lead space options

#### Absolute Maximum Ratings

• For ratings of individual members of a series, see Device Ratings and Specifications chart

Continuous	UltraMOV™ 25S Series	Units
Steady State Applied Voltage:		
AC Voltage Range ( $V_{MIACIRMS}$ )	115 to 750	V
DC Voltage Range ( $V_{MDCI}$ )	150 to 970	V
Transients:		
Peak Pulse Current ( $I_{TM}$ ) 8x20 $\mu$ s Current Wave Single Pulse	22,000	A
Single-Pulse Energy Capability ( $W_{TM}$ ) 2ms Current Wave	230 to 890	J
Operating Ambient Temperature Range ( $T_A$ )	-55 to +85	°C
Storage Temperature Range ( $T_{STG}$ )	-55 to +125	°C
Temperature Coefficient ( $\alpha^V$ ) of Clamping Voltage ( $V_C$ ) at Specified Test Current	<0.01	%/C
Hi-Pot Encapsulation (COATING Isolation Voltage Capability)	2500	V
Dielectric Withstand DC for 1 min per MIL-STD-202, Method 301		
Insulation Resistance of the Epoxy Coating	1000	M $\Omega$

CAUTION: Stresses above those listed in "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

### UltraMOV™ 25S Series Ratings & Specifications

Part Number	Branding	Maximum Rating (85°C)				Specifications (25°C)				
		Continuous		Transient		Varistor Voltage at 1mA DC Test Current		Maximum Clamping Voltage at 100A, 8 x 20µs	UL 1449 ed.3 Voltage Protection Rating	Typical Capacitance f = 1MHz
		AC Volts	DC Volts	Energy 2ms	Peak Surge Current 8 x 20µs

V25S625P	P25S625	625	825	800	22000	900	1100	1625	n/a	660
V25S750P	P25S750	750	970	890	22000	1080	1320	1950	n/a	550

**Note:** Average powder dissipation of transients should not exceed 1.5 watts.

### Transient V-I Characteristics Curves

#### Peak Current, Energy and Power Derating Curve

For applications exceeding 85°C ambient temperature, the peak surge current and energy ratings must be reduced as shown above.

#### Peak Pulse Current Test Waveform for Clamping Voltage

$O_1$  = Virtual Origin of Wave

$T$  = Time from 10% to 90% of Peak

$T_1$  = Rise Time = 1.25 x  $T$

$T_2$  = Decay Time

**Example** - For an 8/20 µs Current Waveform:

8µs =  $T_1$  = Rise Time

20µs =  $T_2$  = Decay Time

**V-I Limit Curves**

**Figure 3**

**Pulse Rating Curves**

**Wave Solder Profile**

**Non Lead-free Wave Solder Profile**

**Lead-free Wave Solder Profile**

**Physical Specifications**

<b>Lead Material</b>	Copper Clad Steel Wire
<b>Soldering Characteristics</b>	Solderability per MIL-STD-202, Method 208E
<b>Insulating Material</b>	Cured, flame retardant epoxy polymer meets UL94V-0 requirements
<b>Device Labeling</b>	Marked with LF, voltage, UL/CSA Logos, and date code

**Environmental Specifications**

<b>Operating/Storage Temperature</b>	-55°C to +85°C/ -55°C to +125°C
<b>Passive Aging</b>	+85°C, 1000 hours +/-10% typical voltage change
<b>Humidity Aging</b>	+85°C, 85% RH, 1000 hours +/-10% typical voltage change
<b>Thermal Shock</b>	+85°C to -40°C 5 times +/-10% typical voltage change
<b>Solvent Resistance</b>	MIL-STD-202, Method 215F
<b>Moisture Sensitivity</b>	Level 1, J-STD-020C

**UltraMOV™ 25S Series Varistors for High-Temperature Operating Conditions:**

Phenolic coated devices are available with improved maximum operating temperature 125°C. These devices also have improved temperature cycling capability. Ratings and specifications are per standard series except Hi-Pot Encapsulation (Isolation Voltage Capability) = 500V.

**To order:** add 'X1347' to part number (e.g. V25S150PX1347). These devices are NOT UL, CSA, CECC or VDE certified. Contact factory for further details.

### Notes

1. Additional optional lead form, packaging and lead spacing requirements are subject to availability and to minimum order requirements. Please contact factory for details.
2. Nickel Barrier Wire option (Suffix 'X2855') Standard parts use Tin-Coated Copper wire. Nickel Barrier Coated Wire is available as an option. This is Copper Wire with a flashing of Nickel, followed by a top coat of Tin. To order please add suffix 'X2855' to end of standard part number. Contact factory for more details if required.
3. UltraMOV 25S have been qualified as type 1 application by UL1449 edition 3, which allows Permanent Connection between the secondary of the service transformer and the line side of the service equipment overcurrent device, as well as the load side, including watt-hour meter socket enclosures and intended to be installed without an external overcurrent protective device.
