## ATPK2 - Atlas Star Pack - LCR40 + DCA55 + Case

### ATPK2 - Atlas Star Pack - LCR40 + DCA55 + Case Information:

Fantastic dual-instrument set, complete with custom carry case, extra spare batteries and detailed user guides.

The LCR40 (for Inductors, Capacitors and Resistors) is ideal for the hobbyist and professional alike.

The DCA55 (for most semiconductors) provides fast component identification, pinout identification and wide component support.

Please see the individual instrument pages for more detailed information on each product.

This special offer deal saves you over £16 on the individual item costs.

#### Includes:

- LCR40 Passive Component Meter.
- DCA55 Semiconductor Analyser (AAA edition).
- LCR40 includes 2mm plugs and sockets and removeable hook probes.
- Comprehensive illustrated user guide for each instrument.
- Alkaline battery installed in each instrument.
- Spare alkaline battery for each instrument.
- Padded carry case.

Optional certificate of calibration covers both instruments and includes results of manual verification tests. Instruments are calibrated the same way regardless of whether you require the certificate.
