# **185 WATTS**

## SINGLE/MULTI OUTPUT AC-DC

### FEATURES:

- Compact 4.2" x 7.0" x 1.5" Size IEC 62368-1 2nd ed. Certification
- 2 Year Warranty •
- Universal 85-264V Input •
- IEC 60601-1-2 4th ed. EMC Class B Emissions per EN55011/32
- One to Four Outputs
- High Efficiency
- 0-70°C Operating Temperature
   Optional Chassis/Cover
- RoHS Compliant Optional Remote Inhibit/Enable

• IEC 60601-1 3rd ed. Medical Cert.

		ERING INF	ORMATION		
Consult factory f	or alternate output	configurations.			

Consult factory for positive, negative or floating outputs. Please specify the following optional features when ordering:

CH - Chassis

CO - Cover

TS - Terminal Strip

RE - Remote Inhibit

I/O - Isolated Outputs

Total Output Power at 50°C(1)	135W	Convection Cooled(16)(18)
(See Derating Chart)	185W	Forced-Air Cooled(15)(17)(19)
Output Voltage Centering	Output 1:	$\pm 0.5\%$ (All outputs at 50% load)
	Output 2:	± 5.0%
	Output 3:	± 5.0%
Output Valtage Adjust Dange	Output 4:	± 5.0%
Output Voltage Adjust Range Load Regulation	Output 1:	95 - 105%
Load Regulation	Output 1:	0.5% (10-100% load change) 5.0% (10-100% load change)
	Output 2: (4001,4,5, 2001)	
	(4002,4003)	15.0% (20-100% load change)
	Output 3:	5.0% (10-100% load change)
	Output 4:	5.0% (10-100% load change)
Source Regulation	Outputs 1 – 4:	0.5%
Cross Regulation	Outputs 2 – 4:	6.0%
Output Noise	Outputs 1 – 4:	1.0%
Turn on Overshoot	None	
Transient Response	Outputs 1 – 4	
Voltage Deviation	5.0%	
Recovery Time	500µS	
Load Change	50% to 100%	
Output Overvoltage Protection	Output 1:	110% to 150%
Output Overpower Protection	110-160% rated	Pout, cycle on/off, auto recovery
Hold Up Time		Power, 85V Input
Start Up Time	5 Seconds, 120\	
INP	UT SPECIFIC	CATIONS
Protection Class	1	
Source Voltage	85 – 264 Volts A	С
Frequency Range	47 – 63 Hz	
Peak Inrush Current	40A	
Efficiency	82% Typical, Ful	Power, 230V, varies by model
Power Factor	0.95 (Full Power	, 230V)
ENVIRON	MENTAL SP	ECIFICATIONS
Ambient Operating	0°C to + 70°C	
Temperature Range	Derating: See Po	ower Rating Chart
Ambient Storage Temp. Range	- 40°C to + 85°C	
Temperature Coefficient	Outputs 1 – 4:	0.02%/°C

-185

SPECIFICATIONS

Convection Cooled(16)(18)

OUTPUT

135W

Total Output Power at 50°C(1)

All specifications are maximum at 25°C/185W unless otherwise stated, may vary by model and are subject to change without notice.

#### EL-185 SERIES MECHANICAL SPECIFICATIONS

ALL DIMENSIONS IN INCHES (mm)

#### APPLICATIONS INFORMATIO

- Each output can deliver its rated current but Total Output Power must not exceed 185W, as determined by the cooling method.
- 2. Generally, adequate cooling is provided when semiconductor case temperatures do not exceed 70°C rise and transformer temperature does not exceed 60°C rise at any specified ambient temperature.
- 3. Sufficient area must be provided around power supply to allow natural movement of air to develop in convection-cooled applications.
- 4 This product is intended for use as a professionally-installed component within information technology, industrial, and medical equipment and is not intended for stand-alone operation
- 5 A minimum load of 10% is required on Output 1 to ensure proper regulation of remaining outputs
- 6 This product includes only one fuse in the input circuit. In consideration of Clause 8.11.5 of IEC 60601-1:2005, a second fuse may be required in neutral conductor of the end product
- 7. Peak-to-Peak Output Ripple and Noise is measured directly at the output terminals of the power supply, without the use of the probe ground lead or retractable tip (tip-and-barrel method), 20 MHz bandwidth.
- This product was type-tested and safety-certified using the dielectric strength test voltages 8 listed in Table 6 of IEC 60601-1:2005. In consideration of Clause 8.8.3, care must be taken to insure that the voltage applied to a reinforced insulation does not overstress different types and levels of insulation. Primary and secondary-to-ground capacitors may need to be disconnected prior to performing a dielectric strength test on the power supply or the end product. It is highly recommended that the DC test voltages listed in DVB.1, Annex DVB of UL 60601-1 1st Edition are not exceeded during a production-line dielectric strength test of the assembled end product. Please consult factory for further information.
- 9. This power supply has been safety-approved and final-tested using a DC dielectric strength test. Please consult factory before performing an AC dielectric strength test.
- 10. Remote-Sense terminals may be used to compensate for cable losses up to 250mV. The use of a twisted pair, decoupling capacitors and an appropriately-rated low-impedance capacitor connected across the load will increase noise immunity
- 11. Maximum screw penetration into bottom chassis mounting holes is 0.100 inches. Maximum screw penetration into side chassis mounting holes is 0.250 inches.
- To comply with emissions specifications, all four mounting hole ground pads must be 12 electrically connected to a common metal chassis. Chassis/Cover option recommended. Refer to Operating Instructions for additional information.
- 13. Common RF shielding precautions may need to be taken to assure emissions compliance. Refer to Operating Instructions for additional information.
- Power-Fail (AC-Good) feature provides a logic-low warning signal from an open collector 14. transistor output 10ms prior to loss of output from AC failure, 5V/10mA.
- 15. 300LFM minimum of airflow must be maintained one inch above all points of top-side components or cover when forced-air cooling is required.
- 16 Total power must not exceed 135W with convection cooling on open-frame models except where noted.
- 17. Total power must not exceed 185W with 300LFM forced-air cooling on open-frame models.
- 18. Total power must not exceed 110W with convection cooling and Chassis/Cover option.
- 19. Total power must not exceed 185W with 300LFM forced-air cooling and Chassis/Cover option
- 20. Total current from Outputs 3 & 4 must not exceed 3A with convection cooling.
- 21 Total current from Outputs 1 & 2 must not exceed 20A with convection cooling.
- 22. Rated 15A maximum with convection cooling
- 23 Rated 27A maximum with convection cooling MAXIMUM OUTPUT POWER vs. AMBIENT TEMPERATURE
