

## **25 Feet 25-Conductor (24AWG) Stranded-Shielded Bulk Cable**

### **M110-25C24G-25**

These 24AWG (American Wire Gauge) 25 bare copper conductor RS-232 multiconductor cables are used to create serial patch cables for a wide variety of applications, usually for computer peripherals.

RS-232 is a precursor to USB and is used for many of the same devices, such as printers, as well as modems.

RS-232 is also commonly used for sophisticated machinery in laboratories, automated manufacturing plants, and other hi-tech environments.

**100% Overall Foil Shield.**

**Specifications/Contents:**  
**Model: M110-25C24G-25**  
**Length: 12 ft**  
**Outer Diameter: 7.9 mm**

**without us, you are just not connected! ■**
