

PowerLock Connector Series

Field installable power distribution systems with up to 660 amps

The PowerLock connector series offers the ultimate in safety and reliability under the most severe operating conditions. PowerLock connectors are plastic bodied single pole electrical connectors used in high current applications. For use in single and polyphase power distribution systems up to 660 amps, the range includes panel and cable mounted connectors, and associated accessories. PowerLock connectors are moisture and impact resistant and feature insulated contact tips to prevent accidental touching of electrically live parts.

The connectors are easy to terminate to copper cable using either industry standard crimp tools or set-screw contacts. The silver plated contacts are available in 2 continuous current ranges, those with brass contacts are suitable for use up to 400 amps and those with copper contacts up to 660 amps. The high impact plastic connector bodies are keyed to prevent connection errors, and color coded to suit 3 phase electrical systems that are used in the US, Europe and Australia.

Secure coupling of a connector pair is through a bayonet lock together with a secondary locking pin. The secondary lock engages when the bayonet lock is fully turned and disconnection requires a simple release key. The secondary lock discourages tampering and reduces the risk of accidental or unauthorized disconnection. If fast disconnection is required, for an application where tampering is not a risk, the connectors can be fitted with a sliding collar that quickly unlocks the connectors.

The Veam Difference

- Global capabilities and local support
- Proven application expertise
- Over a century of interconnect leadership
- A committed innovator and business partner

Key Features

- 400 amp or 660 amp continuous power ratings
- Colored and keyed to support correct mating
- All connectors IP2X finger protected
- Crimp or set-screw cable attachment
- Environmentally sealed to IP67
- Secondary lock for added security

Applications

LIGHTING SYSTEMS

GENERATORS

SHIP POWER SYSTEMS

Listings and Approvals

PowerLock connectors are tested and certified by VDE.

PowerLock connectors are manufactured and tested as required to carry European CE markings.

Safety note: PowerLock connectors and related products should be installed and handled by suitably qualified persons.

Why ITT

ITT is a focused multi-industrial company that designs and manufactures highly engineered critical components and customized technology solutions. ITT's Cannon brand is a leading global manufacturer of connector products serving international customers in aerospace, defense, medical, industrial and transportation end markets. ITT's Connector business, which also includes the Veam and BIW Connector Systems brand, manufactures and supplies a variety of connectors and interconnects that make it possible to transfer data, signal and power in an increasingly connected world.
