Enabling the Electronics Revolution

PSC-360 Hall-Effect End-of-Shaft Rotary Position Sensor

KEY FEATURES

True, contactless operation

Without any gears or mechanical interfaces the sensor is easily assembled and calibrated and subject to limited wear and tear over lifetime.

360 degree absolute position feedback

Endless mechanical rotational angle without dead band, keeps the position on power loss with programmable electrical angles from 15 to 360 degrees.

Made for harsh environments

The rugged package protects the sensor from dust, moisture, vibration and extreme temperatures for usage in the most demanding environments.

Durable and robust design

The non-contacting design allows for an extra-long product lifetime of up to 50 million cycles.

Integrated shaft

The magnet is securely fastened to the shaft and acts as only moving component in the sensor.

Adaptable to your requirements

Programmable transfer function and switch outputs as well as different output protocols and redundancy levels available.

DESCRIPTION

The robust PSC-360 is a cost-effective noncontacting rotary position sensor that provides high performance in harsh environments such as transportation, industrial and medical applications.

This compact sensor of Piher Sensing Systems is truly non-contacting with a permanent magnet that is securely fastened to the shaft and acts as the only moving component in the sensor. Redundant versions provide independent voltage outputs with fully customizable characteristics. Additionally a switch output can optionally be configured.

The endless rotation sensor is highly configurable with a programmable angular range between 15 and 360 degrees, different signal output options and support for low and high-voltage power supply. Sealed, flange mounted for easy positioning and with fly leads, it can be customized to fit any desired connector configuration.

Multi-turn configurations are available on request.

APPLICATIONS

Industrial

- Autonomous warehouse robotics
- ▶ Robotics and automation feedback
- ▶ Robot arm position
- ► Valve monitoring
- Conveyor operation

Transportation

- ► Steering wheel angle
- Pedal Position
- ► Suspension/height detection
- ▶ Fork height and mast tilt
- Bucket position
- ► Hitch position
- ► Transmission gear shift
- Marine
- ► Steering and shifter sensor
- Home and Building Automation
- ► HVAC systems

Hall-Effect End-of-Shaft Rotary Position Sensor

MECHANICAL SPECIFICATIONS				
	PSC-360	PSC-360U		
Rotational life	Up to 50.000.000 cycles			
Mechanical range	360° (endless rotation)			
Shaft diameter	6mm	6,35mm		

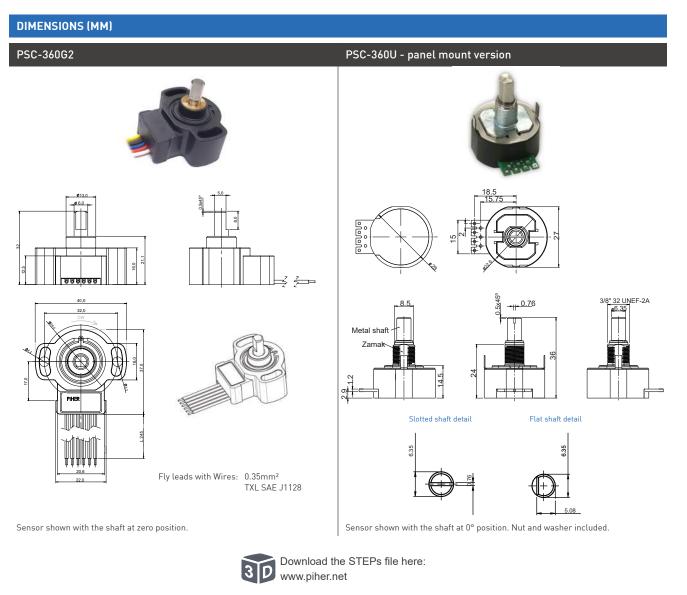

ELECTRICAL SPECIFICATIONS

	PSC-360	PSC-360U	
Linearity ¹	±1% absolute (±0.5% on request)		
Electrical angular range	Programmable from 15° to 360°		
Output protocols	Analog (Ratiometric), PWM Serial Protocol (SPI) upon request CAN SAE J1939 CAN OPEN	Analog (Ratiometric), PWM Serial Protocol (SPI)	
Output	Simple Redundant Full-redundant		
Switch output	On request	Configurable	
Resolution CAN, Analog, PWM SPI		Up to 12 bit Up to 14 bit	
Supply voltage ²	5V ±10% 7V to 15V	5V ±10% 12V ±10% 15V ±10%	
Supply current Supply current CAN version	Typ 17 mA		
Voltage protection	±10V		
Self-diagnostic features	yes		
¹ Ferromagnetic materials close to the sensor (i.e. shaft, mounting surface) may affect the sensor's linearity. ² Voltages up to 25V possible on request.			

ENVIRONMENTAL SPECIFICATIONS			
Operating and storage temperature ¹	-40° to +125°C		
Shock	50g		
Vibration	5-2000 Hz; 20g; Amax 0,75 mm		

¹Other specifications available

Hall-Effect End-of-Shaft Rotary Position Sensor

Sensor delivered at random position. Assembly of any type of connector on request.

MOUNTING INSTRUCTIONS

- 1. Place the component on a flat surface.
- 2. Fit the actuator onto the shaft avoiding any mechanical play/wobble.
- 3. Fasten the two M4 screws (M4 washers are recommended).

CONNECTION SCHEME

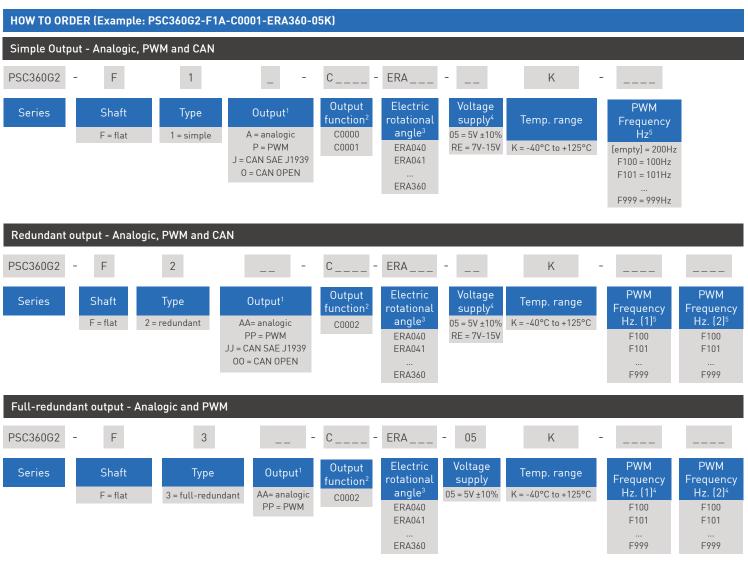

CONTRACTION SOLUTION							
Color	Simple		Redundant		Full-redundant	CAN	SPI

More instructions of use on www.piher.net. Connector assembly available on request.

Amphenol Sensors

Hall-Effect End-of-Shaft Rotary Position Sensor

1 The analog output is ratiometric, proportional:

- for supply voltage "5V" to input voltage; - for supply voltage "RE" to 5V.

- Ior supply voltage RE to 3V.
2 Other output functions available, please check availability. Enter CXXXX as long as the new output function is not defined.
3 Models with ERA < 40° available on request
4 Voltages up to 25V possible on request.
5 Leave empty if not applicable. Default frequency is 200 Hz

Custom output functions on request.

CONTACT PIHER SENSING SYSTEMS FOR CUSTOM SOLUTIONS

OUR ADVANTAGE

- Leading-edge innovative position sensing solutions
 - ▷ Contactless (Hall-effect and Inductive Technology)
 - ▷ Contacting (Potentiometers, Printed Electronics)
- Engineering design-in support

Ť

- All our products can be customized to fit target application and customer requirement
- Capability to move seamlessly from development to true high-volume production
- A global footprint with global engineering and commercial support
- One-stop shop not limited to position sensors (temperature, pressure, gas,...) through group collaboration
- Flexibility and entrepreneurship of a medium-sized company with the backing of Amphenol Corporation

Please always use the latest updated datasheets and 3D models published on our website.
