

Liquid Pump – 350GPH (12v)

ROB-10455

Do you have some liquids that you need to move? This fluid pump will move 350 gallons per hour! The SEAFLO mini water pump has a heavy duty 12V, 1.5Amp motor and a tough thermoplastic body. It's totally submersible and water-cooled (but it won't burn out if run dry). Use this pump to make a fountain or waterfall, even water your plants!

The $\frac{3}{4}$ " connection will accept a 19mm ID hose. It comes pre-terminated with heavy gauge unterminated 3ft long wire leads.

- 12V operation
- 350 GPH
- 1.5A motor
- $\frac{3}{4}$ " barbed outlet
- 3ft long wire leads
