

SPK-7-F

Ruland SPK-7-F, 7/16" Two-Piece Shaft Collar, Black Oxide Steel, Clamp Style with Keyway, 15/16" OD, 0.343" Width

Description

Ruland SPK-7-F is a two-piece shaft collar with a 7/16" bore, 3/32" keyway, 15/16" OD, and 0.343" width. The clamp style design does not mar the shaft, is easy to remove, and is indefinitely adjustable. SPK-7-F is commonly used for guiding, spacing, stopping, mounting, and component alignment. Equipment manufacturers benefit from the tightly controlled face to bore perpendicularity (TIR of ? .002"). Perpendicularity is critical for alignment when the shaft collar is used as a load bearing face, mechanical stop, or for mounting components such as gears or bearings. Proprietary processes have been developed by Ruland to maintain superior fit, finish, and holding power. SPK-7-F is stamped with the Ruland name and bore size for ease of identification. Halves are mated throughout the manufacturing process for proper fit and alignment. Forged screws test beyond ANSI standards to ensure maximum holding power. SPK-7-F is machined from solid bar stock to a fine burr free finish and sourced exclusively from North American mills. Ruland uses 1215 lead-free steel with a proprietary black oxide finish that produces a fine glossy finish while increasing holding power and resisting corrosion. It is RoHS3 and REACH compliant and manufactured in our Marlborough, MA factory under strict controls using proprietary processes.
