12:1 Dual Laser Infrared Thermometer IR2000A

The Klein Tools IR2000A features a wide temperature measurement range, a tight distance-to-spot ratio, auto temperature scan, a K-type thermocouple input, dual lasers, and several sampling modes to assist you in making the best possible measurements.

Dual Laser Targeting for Specific Measurement Areas:

This dual laser gun accurately measures the temperature of the target area that falls between the two laser points:

12:1 Distance To Spot Ratio for Accurate Temperature Readings:

If you are 12 feet away from an air vent, the vent should be 1 foot or less in diameter in order to attain the most accurate temperature measurement.
