1. Product Introduction

Apacer seizes the opportunity and introduces its latest product, AH352 USB3.0 flash drive. Its diamond pattern is revealed by the elegant, translucent "glossy black" body, the design of which unfolds a fad among the USB flash drives that renders the best choice to experience USB 3.0 high-speed transmission.

AH352 is coated with dark, mystic and translucent "glossy black". The diamond pattern embellished on the inner side symbolizes its vogue within the translucent body, making it a sight to behold. With the strap hole at the end of the flash drive, users can freely attach straps or key chain to show their personal style. AH352 also shows thought-out details with its special pen cap design to prevent accidental loss of cap, which demonstrates Apacer's consideration for ergonomics.

AH352 features USB 3.0 transmission interface. It boasts 5Gbps transmission bandwidth, offering eight times or more the speed of conventional USB 2.0 flash drive. It is backward compatible with the USB 2.0 interface and available in 8GB, 16GB and 32GB, qualified for today's bulk data storage and transmission requirements.
