

Amplifier-separated  
**Digital Laser Sensor**  
LS-400 SERIES

# LS-400 SERIES

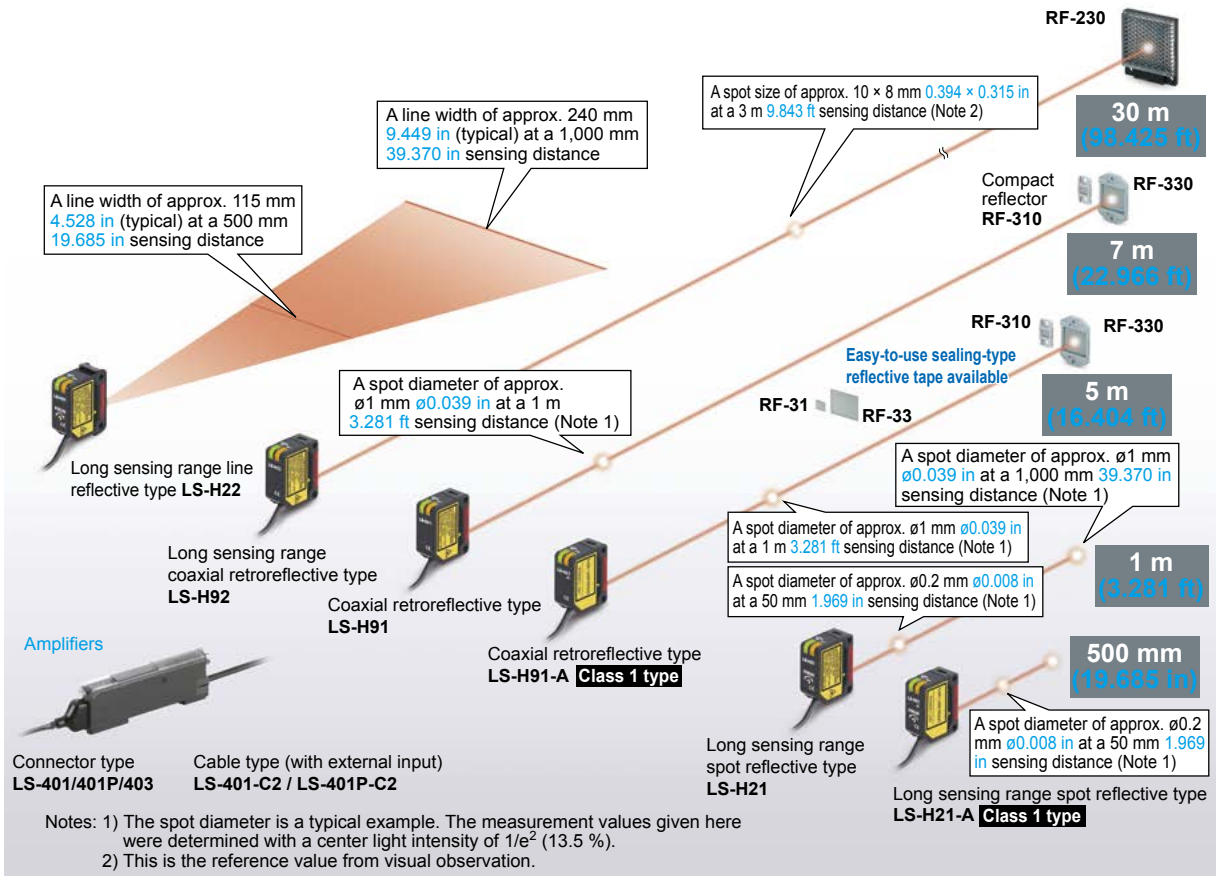

**Warning:** These products are Class 2 (LS-H□-A: Class 1) laser in compliance with IEC / JIS / GB standards and FDA\* regulations. Do not look at the laser beam directly or through optical system such as a lens.

\*This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration).

## User-friendly, high precision laser sensing!

We offer 6 types of laser sensor heads for various applications

## APPLICATIONS

### Detecting objects with a complex shape

Its linear sensing area enables more stable detection of objects with complex shapes.

### Detecting the remaining amount of sheet rolls

The coaxial retroreflective sensor with a spot diameter of approx.  $\varnothing 1 \text{ mm } \varnothing 0.039 \text{ in}$  (at a 1 m 3.281 ft sensing distance), can measure amounts remaining on sheet rolls with high precision.

### Detecting electronic component pins

Because its spot shape can be adjusted in accordance with the object, it can be easily set to detect even the minutest object from a remote location.

**NOTE:** The applications given in this catalog are examples for reference only. Stable sensing may not be possible under certain setup conditions and environmental conditions, so be sure to check the actual sensor before use.

### Long sensing range spot reflective type

### Long sensing range line reflective type

### Industry standard mounting pitch

The mounting pitch for sensor heads is 25.4 mm 1.000 in, the same industry standard as the **CX-400 series Ver.2** general purpose photoelectric sensors. Hence, existing mounting brackets can be used even when replacing general purpose sensors with laser sensors.

### Easy and accurate adjustments

A spot-size adjuster is built into the back of the sensor head allowing the user to adjust the sensor easily while viewing the spot. The adjuster is adjustable with a screwdriver to avoid accidents during maintenance or any other time the sensors are handled.

### Line-up of FDA / IEC / JIS

### Class 1 type **LS-H91(F)-A, LS-H21(F)-A**

Visible light spot using the Class 1 type. This makes beam axis alignment much easier.

### Sensor mounting bracket for beam axis alignment is available **MS-CX-11**

It is possible to make a minor adjustment for the bracket by 4 degrees up, down, right or left, even after setting up the sensor. The bracket can be mounted in both longitudinal and lateral directions.

### Easy setting, dual display

Equipped with 2 large 4-digit digital displays. While checking the current incident light intensity (red display), the optimal threshold value (green display) can be set easily.

10 mm 0.394 in thickness

Threshold value setting display  
Green LED, 4 digits (Max. display: 9999)

Current incident light intensity display  
Red LED, 4 digits (Max. display: 9999)

Large jog switch

Large MODE key

### 2 switches enable simple operation

Only two switches, the large MODE key and the large jog switch, are required for operation.

**1 MODE** Pressing the switch selects or cancels the operating mode

Moving the switch from side to side allows items to be selected

**3 PUSH** Pressing the switch then confirms the selected setting

### Wiring and space saving

The quick-connection cables enable reductions in wiring. (connector type)

The connections and man-hours for the relay terminal setup can be reduced and valuable space is saved. Also, **LS-400** series amplifiers can of course be connected side-by-side with a connector type amplifier of **FX-500/300** series digital fiber sensors or **DPS-400** series digital pressure sensors.

Note: Because the transmission method varies depending on the amplifiers, check the instruction manual for the amplifiers when connecting them.

Digital fiber sensor **FX-500/300** series  
Digital pressure sensor **DPS-400** series

Up to 16 units can be connected together

### New release of type with upper communication functions to facilitate preventive maintenance! **LS-403**

#### Network communication possible

Can connect to Open Network CC-Link IE Field / CC-Link / DeviceNet / EtherCAT via Communication Unit for Open Network **SC-GU3** series. Monitoring and various settings can be done from PLC, PC, etc.

#### Threshold tracking function saves maintenance time

This function seeks changes in the light emitting amount resulting from changes in the environment over long periods (such as dust levels), so that the incident light intensity can be checked at desired intervals and the threshold values can be reset automatically. This helps to reduce the man-hours for maintenance.

\*CC-Link and CC-Link IE Field are a registered trademark of Mitsubishi Electric Corporation.  
DeviceNet is a registered trademark of ODVA (Open DeviceNet Vender Association, Inc.).  
EtherCAT is a registered trademark of Beckhoff Automation GmbH.

### 4 new modes enabling wide array of sensing

#### Hysteresis mode

By adjusting the hysteresis, convexo-concave parts of uneven objects can be cancelled enabling more stable sensing.

#### Window comparator mode

The sensor judges any object outside the range of incident light intensity established by two set threshold values.

#### 2 independent output modes

By combining two outputs, wide array of control is possible, allowing you to detect meandering objects, for example.

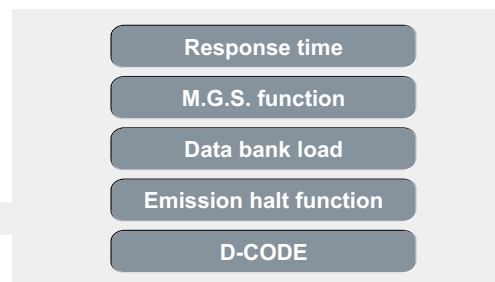

#### Differential sensing mode

Only rapid changes in light received are detected, which enable the edge of glass, etc. to be detected accurately. Optimal for positioning.

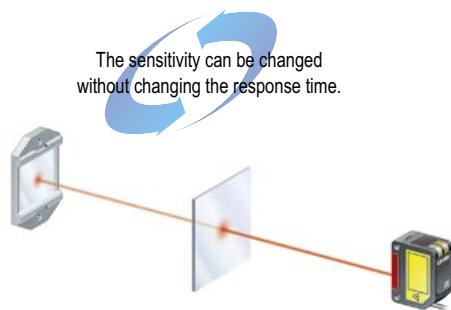

### MODE NAVI customized function

Frequently used functions such as response time, M.G.S. function, data bank load, emission halt function and D-CODE values can be stored in CUSTOM mode. The settings are changed easily.

### Accurately sense the minutest variations (M.G.S. function)

When sensing at close range or when the target objects are transparent or minute, adjust the sensor receiving sensitivity to one of 3 levels (U-LG mode: 4 levels) for the optimal setting. In addition, changing the receiving sensitivity will not effect the response time.

### Emission halt function

If you do not want to place a laser spot in the visual range of the image processor, you can stop the laser radiation using the emission halt signal from the external input.

### Cable type allows external input

The **LS-401-C2** cable-type amplifier is equipped with an external input wire (5-core). It is ideal to use the laser sensor at places where external teaching or laser light emission halting is to be carried out, or at the places where the laser sensor is to be used separately.

### Interference prevention function

The automatic interference prevention function prevents against interference among up to 4 sensors.

### Setting conditions viewed at a glance (D-CODE)

The amplifier setting is shown as an 8-digit code. Handy for remote indications and follow-ups.

## ORDER GUIDE

### Sensor heads

Type	Appearance	Model No.	Conforming standards	Sensing range	<ul style="list-style-type: none"> <li><span style="display: inline-block; width: 10px; height: 10px; background-color: #e67e22; border: 1px solid #000;"></span> : U-LG</li> <li><span style="display: inline-block; width: 10px; height: 10px; background-color: #9b59b6; border: 1px solid #000;"></span> : STD</li> <li><span style="display: inline-block; width: 10px; height: 10px; background-color: #f1c40f; border: 1px solid #000;"></span> : FAST</li> <li><span style="display: inline-block; width: 10px; height: 10px; background-color: #95a5a6; border: 1px solid #000;"></span> : H-SP</li> </ul>

				LS-H22F (Note 2, 3)	FDA / IEC / JIS	

**NOTE:** Mounting bracket is not supplied with the sensor head. Please select from the range of optional sensor head mounting brackets.

Notes: 1) Obtained Korea's S-mark certification.

2) This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration). For details, refer to the Laser Notice No. 50.

3) **LS-H22(F)** is the model No. for **LS-H21(F)** long sensing range spot reflective type sensor head combined with the **LS-MR1** lens attachment for line reflective type sensor head. Hence, **LS-H21(F)** appears on the sensor head itself.

4) The sensing range is the value for the **RF-330** [**RF-230** for the **LS-H92(F)**] reflector. In addition, the sensing range is the possible setting range for the reflector. The sensor can detect an object less than 0.1 m **0.328 ft** [**LS-H92(F)**: 0.2 m **0.656 ft**] away. Note that if there are white papers or specular objects near the sensor head, reflected light from these objects may be received. In such cases, use the M.G.S. function of the amplifier unit to change the response time or incident light sensitivity.

### 5 m 16.404 ft cable length type

5 m **16.404 ft** cable length type (standard: 2 m **6.562 ft**) is also available.

When ordering this type, suffix "-C5" to the model No.

• **LS-H91-C5**                      • **LS-H91-A-C5**                      • **LS-H21-C5**                      • **LS-H22-C5**

### Package without reflector

The **LS-H91(F)**, **LS-H91(F)-A** and **LS-H92(F)** are also available without the reflector (**RF-330** or **RF-230**).

When ordering this type, suffix "-Y" to the model No.

• **LS-H92-Y**                      • **LS-H92F-Y**                      • **LS-H91-Y**                      • **LS-H91F-Y**  
 • **LS-H91-A-Y**                      • **LS-H91F-A-Y**

## ORDER GUIDE

### Amplifiers

Type	Appearance	Model No.	Output	Connection method
Connector type  With upper communication function (Note 2)		<b>LS-401</b> (Note 1)	NPN open-collector transistor two outputs	Use quick-connection cable (4-core) (optional)
		<b>LS-401P</b>	PNP open-collector transistor two outputs	
		<b>LS-403</b>	NPN open-collector transistor two outputs	
Cable type (With external input)		<b>LS-401-C2</b> (Note 1)	NPN open-collector transistor two outputs	2 m <b>6.562 ft</b> cabtyre cable (5-core) included Cable outer diameter: $\varnothing 3.7$ mm $\varnothing 0.146$ in
		<b>LS-401P-C2</b>	PNP open-collector transistor two outputs	

Notes: 1) Obtained Korea's S-mark certification.

2) For upper communication, a communication unit for open network **SC-GU3** series is needed separately.

### Quick-connection cables Quick-connection cable is not supplied with the connector type amplifier. Please order it separately.

Type	Appearance	Model No.	Description
Main cable (4-core)		<b>CN-74-C1</b>	Length: 1 m <b>3.281 ft</b>
		<b>CN-74-C2</b>	Length: 2 m <b>6.562 ft</b>
		<b>CN-74-C5</b>	Length: 5 m <b>16.404 ft</b>
Sub cable (2-core)		<b>CN-72-C1</b>	Length: 1 m <b>3.281 ft</b>
		<b>CN-72-C2</b>	Length: 2 m <b>6.562 ft</b>
		<b>CN-72-C5</b>	Length: 5 m <b>16.404 ft</b>

### End plates End plates are not supplied with the amplifier. Please order them separately when the amplifiers are mounted in cascade.

Type	Model No.	Description
	<b>MS-DIN-E</b>	When cascading multiple amplifiers, or when it moves depending on the way it is installed on a DIN rail, these end plates clamp amplifiers into place on both sides. Make sure to use end plates when cascading multiple amplifiers together. <span style="border: 1px solid black; padding: 2px;">Two pcs. per set</span>

### Accessories

- **RF-330** (Reflector)

- **CN-EP1** (Connector for amplifier)

5 pcs. per set (Note)

Note: One is attached to each sensor head according to standard.

- **LS-MR1** (Lens attachment for line reflective type)

- **RF-230** (Reflector)

Note: **LS-H92(F)** only

**OPTIONS**

Designation	Model No.	Description	
Sensor head mounting bracket	<b>MS-CX-1</b>	Foot angled mounting bracket	
	<b>MS-CX-2</b>	Foot biangled mounting bracket Flat mounting possible to avoid obstructions caused by the height of the sensor.	
	<b>MS-CX-3</b>	Back angled mounting bracket	
	<b>MS-CX-4</b>	Protective mounting bracket Protects sensors preventing beam axis displacement due to shocks.	
Sensor mounting bracket for beam axis alignment	<b>MS-CX-11</b>	Mounting bracket that makes fine beam axis alignment possible after setting the sensor head. Adjustment angle: up and down, right and left: 4 degrees Mounting directions: two directions, vertical and horizontal	
Universal sensor mounting stand	<b>MS-AJ1</b>	Horizontal mounting type	Basic assembly
	<b>MS-AJ2</b>	Vertical mounting type	
	<b>MS-AJ1-A</b>	Horizontal mounting type	Lateral arm assembly
	<b>MS-AJ2-A</b>	Vertical mounting type	
Amplifier mounting bracket	<b>MS-DIN-2</b>	Mounting bracket for amplifier	
Reflector mounting bracket	<b>MS-RF23</b>	Mounting bracket for <b>RF-230</b>	
Amplifier protection seal	<b>FX-MB1</b>	10 sets of 2 communication window seals and 1 connector seal Communication window seal: It prevents malfunction due to transmission signal from another amplifier, as well as, prevents effect on another amplifier. Connector seal: It prevents contact of any metal, etc., with the pins of the quick-connection cable.	
Reflector	<b>RF-310</b>	For coaxial retroreflective type Compact reflector	Sensing range (U-LG mode) • <b>LS-H91(F)</b> : 0.1 to 7 m 0.328 to 22.966 ft • <b>LS-H91(F)-A</b> : 0.1 to 5 m 0.328 to 16.404 ft
Reflective tape	<b>RF-33</b>	For coaxial retroreflective type Size: 25.2 × 27.8 × t 0.4 mm 0.992 × 1.094 × t 0.016 in	
	<b>RF-31</b>	For coaxial retroreflective type Size: 9.2 × 9.2 × t 0.4 mm 0.362 × 0.362 × t 0.016 in	
Bank selection unit	<b>FX-CH</b>	NPN input type	Setting for up to 16 laser sensors can be changed at once by means of external signals.
	<b>FX-CH-P</b>	PNP input type

Warning label: 1 set (Labels are written in Japanese, English and Chinese for compliance with various standards.)	Explanation label: 1 set (Labels are written in Japanese and Chinese for compliance with various standards.)	LS-MR1 (Lens attachment) for line reflective: 1 pc. Warning label: 1 set (Labels are written in Japanese, English and Chinese for compliance with various standards.)

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F.

2) This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration). For details, refer to the Laser Notice No. 50.

3) LS-H22(F) is the set model No. for LS-H21(F) long sensing range spot reflective type sensor head combined with the LS-MR1 lens attachment for line reflective type. Hence, LS-H21(F) appears on the sensor head itself.

4) The sensing range is the value for the RF-330 [RF-230 for the LS-H92(F)] reflector. In addition, the sensing range is the possible setting range for the reflector. The sensor can detect an object less than 0.1 m 0.328 ft [LS-H92(F): 0.2 m 0.656 ft] away. Note that if there are white papers or specular objects near the sensor head, reflected light from these objects may be received. In such cases, use the M.G.S. function of the amplifier unit to change the response time or incident light sensitivity.

5) Cable cannot be extended.

## SPECIFICATIONS

### Amplifiers

Item	Model No.	Type	Connector type		Cable type
				With upper communication function	
		NPN output	<b>LS-401</b>	<b>LS-403</b>	<b>LS-401-C2</b>
		PNP output	<b>LS-401P</b>	—	<b>LS-401P-C2</b>
CE marking directive compliance		EMC Directive, RoHS Directive			
Supply voltage		12 to 24 V DC $\pm 10\%$ Ripple P-P 10% or less			
Power consumption		Normal operation: 950 mW or less (Current consumption 40 mA or less at 24 V supply voltage) ECO mode: 780 mW or less (Current consumption 33 mA or less at 24 V supply voltage)			
Outputs (Output 1, Output 2)		<NPN output type> NPN open-collector transistor		<PNP output type> PNP open-collector transistor	
		<ul style="list-style-type: none"> <li>Maximum sink current: 100 mA (<b>LS-401</b>) (Note 2), 50 mA (<b>LS-403</b>) (Note 3)</li> <li>Applied voltage: 30 V DC or less (between output and 0 V)</li> <li>Residual voltage: 1.5 V or less [at 100 mA (Note 2) sink current at 50 mA (Note 3) sink current (<b>LS-403</b>)]</li> </ul>		<ul style="list-style-type: none"> <li>Maximum source current: 100 mA (Note 2)</li> <li>Applied voltage: 30 V DC or less (between output and +V)</li> <li>Residual voltage: 1.5 V or less [at 100 mA (Note 2) source current]</li> </ul>	
Output operation		Selectable either Light-ON or Dark-ON, with jog switch			
Short-circuit protection		Incorporated			
Response time		80 $\mu$ s or less (H-SP), 150 $\mu$ s or less (FAST), 500 $\mu$ s or less (STD), 4 ms or less (U-LG) selectable with jog switch			
External input (Laser emission halt / Full-auto teaching / Limit teaching)		—		<NPN output type> NPN non-contact input <ul style="list-style-type: none"> <li>Signal condition</li> <li>High: +5 V to +V or open, Low: 0 to +2 V (source current 0.5 mA or less)</li> <li>Input impedance: 10 k<math>\Omega</math> approx.</li> </ul> <PNP output type> PNP non-contact input <ul style="list-style-type: none"> <li>Signal condition</li> <li>High: +4 V to +V (sink current 3 mA or less)</li> <li>Low: 0 to +0.6 V or open</li> <li>Input impedance: 10 k<math>\Omega</math> approx.</li> </ul>	
Operation indicator		Orange LED (lights up when output 1 and output 2 are ON)			
Laser emission indicator		Green LED (lights up during laser emission)			
Select indicator		Yellow LED (lights up when either output 1 or output 2 is selected)			
MODE indicator		RUN: Green LED, TEACH • L/D • TIMER • CUST • PRO: Yellow LED			
Digital display		4 digit (green) + 4 digit (red) LED display			
Sensitivity setting		Normal mode: 2-level teaching / Limit teaching / Full-auto teaching / Manual adjustment Window comparator mode: Teaching (1-level, 2-level, 3-level) / Manual adjustment Hysteresis mode: Teaching (1-level, 2-level, 3-level) / Manual adjustment Differential mode: 5-level settings ( <b>LS-403</b> : 8-level settings)			
Fine sensitivity adjustment function		Incorporated			
Timer function		Incorporated with variable ON-delay / OFF-delay / One shot timer, switchable either effective or ineffective.			
Timer period		1 to 9,999 ms approx.	0.5 ms approx. 1 to 9,999 ms approx.	1 to 9,999 ms approx.	
Automatic interference prevention function		Incorporated [Up to four sets of sensor heads can be mounted close together. (However, <b>LS-401</b> is disabled when in H-SP mode, up to two sets of <b>LS-403</b> can be mounted close together when in H-SP mode)]			
Environmental resistance	Ambient temperature	-10 to +55 °C +14 to +131 °F (If 4 to 7 units are mounted close together: -10 to +50 °C +14 to +122 °F, if 8 to 16 units are mounted close together: -10 to +45 °C +14 to +113 °F) (No dew condensation or icing allowed), Storage: -20 to +70 °C 4 to +158 °F			
	Ambient humidity	35 to 85 % RH, Storage: 35 to 85 % RH			
	Voltage withstandability	1,000 V AC for one min. between all supply terminals connected together and enclosure			
	Insulation resistance	20 M $\Omega$ , or more, with 250 V DC megger between all supply terminals connected together and enclosure			
	Vibration resistance	10 to 150 Hz frequency, 0.75 mm 0.030 in double amplitude in X, Y and Z directions for two hours each			
	Shock resistance	98 m/s <sup>2</sup> acceleration (10 G approx.) in X, Y and Z directions five times each			
Material		Enclosure: Heat-resistant ABS, Transparent cover: Polycarbonate, Push button switch: Acrylic, Jog switch: ABS			
Cable		— (Note 4)		0.15 mm <sup>2</sup> 5-core cable, 2 m 6.562 ft long	
Cable extension		Extension up to total 100 m 328.084 ft is possible with 0.3 mm <sup>2</sup> , or more, cable.			
Weight		Net weight: 15 g approx., Gross weight: 20 g approx.		Net weight: 65 g approx., Gross weight: 75 g approx.	

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C +73.4 °F.

2) In case of **LS-401(P)**, 50 mA if 5 to 8 amplifiers are connected in cascade, and 25 mA if 9 to 16 amplifiers are connected in cascade.

3) In case of **LS-403**, 25 mA if 5 to 16 amplifiers are connected in cascade.

4) The cable is not supplied as an accessory for connector type. Be sure to purchase the optional quick-connection cables given below.

When connecting to **SC-GU3** series, be sure to purchase the optional cascading connector unit.

Main cable (4-core): **CN-74-C1** (cable length 1 m 3.281 ft), **CN-74-C2** (cable length 2 m 6.562 ft), **CN-74-C5** (cable length 5 m 16.404 ft)

Sub cable (2-core): **CN-72-C1** (cable length 1 m 3.281 ft), **CN-72-C2** (cable length 2 m 6.562 ft), **CN-72-C5** (cable length 5 m 16.404 ft)

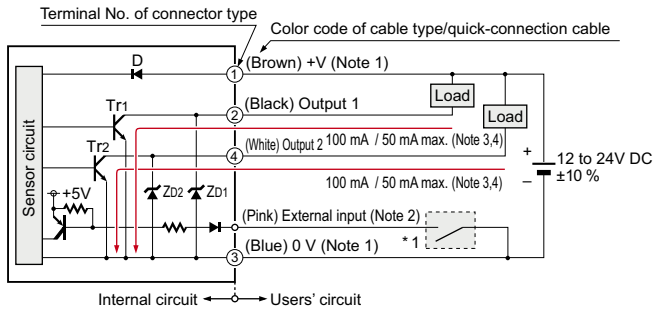

Cascading connector unit: **SC-71**

**I/O CIRCUIT AND WIRING DIAGRAMS**

**LS-401(-C2) LS-403**

NPN output type

**I/O circuit diagram**

- Notes: 1) The quick-connection sub cable does not have +V (brown) and 0 V (blue). The power is supplied from the connector of the main cable.  
 2) Connector type **LS-401/403** does not incorporate the external input.  
 3) **LS-401(-C2)** is 100 mA max, however, **LS-401(-C2)** is 50 mA max. if 5 to 8 amplifiers are connected in cascade, and 25 mA max. if 9 to 16 amplifiers are connected in cascade.  
 4) **LS-403** is 50 mA max, however, it is 25 mA max. if 5 to 16 amplifiers are connected in cascade.

\* 1

Non-voltage contact or NPN open-collector transistor

- External input
- High: +5 V to +V, or open
- Low: 0 to +2 V (source current: 0.5 mA or less)
- Beam emission halts and teaching occurs when at Low.

Symbols ... D: Reverse supply polarity protection diode  
 ZD1, ZD2: Surge absorption zener diode  
 Tr1, Tr2: NPN output transistor

**Wiring diagram**

- Notes: 1) The quick-connection sub cable does not have brown lead wire and blue lead wire. The power is supplied from the connector of the main cable.  
 2) The quick-connection cable does not have a pink lead wire.

**Terminal layout of connector type**

**\* Connector for amplifier (CN-EP1) pin position**

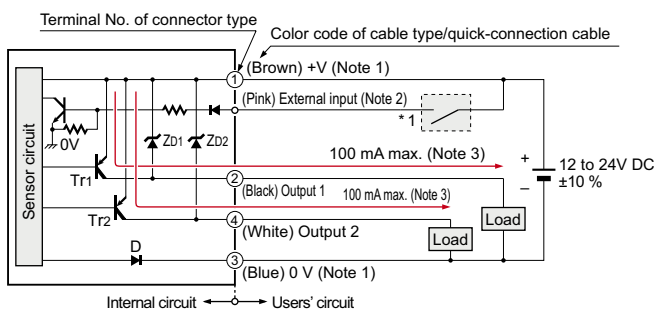

Terminal No.	Connection cable	
①	Conductor core wire: Brown	Cable color: Gray
②	Shield wire	
③	Conductor core wire: Yellow	Cable color: Black
④	Shield wire	

**LS-401P(-C2)**

PNP output type

**I/O circuit diagram**

- Notes: 1) The quick-connection sub cable does not have +V (brown) and 0 V (blue). The power is supplied from the connector of the main cable.  
 2) Connector type **LS-401P** does not incorporate the external input.  
 3) **LS-401P** is 50 mA max. if 5 to 8 amplifiers are connected in cascade, and 25 mA max. if 9 to 16 amplifiers are connected in cascade.

\* 1

Non-voltage contact or PNP open-collector transistor

- External input
- High: +4 V to +V (sink current: 3 mA or less)
- Low: 0 to +0.6 V, or open
- Beam emission halts and teaching occurs when at High.

Symbols ... D: Reverse supply polarity protection diode  
 ZD1, ZD2: Surge absorption zener diode  
 Tr1, Tr2: PNP output transistor

**Wiring diagram**

- Notes: 1) The quick-connection sub cable does not have brown lead wire and blue lead wire. The power is supplied from the connector of the main cable.  
 2) The quick-connection cable does not have a pink lead wire.

**Terminal layout of connector type**

**\* Connector for amplifier (CN-EP1) pin position**

Terminal No.	Connection cable	
①	Conductor core wire: Brown	Cable color: Gray
②	Shield wire	
③	Conductor core wire: Yellow	Cable color: Black
④	Shield wire	

## PRECAUTIONS FOR PROPER USE

- This catalog is a guide to select a suitable product. Be sure to read the instruction manual attached to the product prior to its use.

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

### Cautions for laser beams

- These products are class 2 (**LS-H□-A**: Class 1) laser in compliance with IEC / JIS / GB standards and FDA\* regulations. Do not look at the laser beam directly or through optical system such as a lens.
- The following label is attached to the product. Handle the product according to the instruction given on the warning label.

IEC / JIS / GB Class 2 type

(This product has warning labels attached and included in the packaging that are written in Japanese, English and Chinese for compliance with various standards.)

FDA Class 1 type

(This product has explanation labels attached and included in the packaging that are written in Japanese, English and Chinese for compliance with various standards.)

\* This product complies with 21 CFR 1040.10 and 1040.11 Laser Notice No. 50, dated June 24, 2007, issued by CDRH (Center for Devices and Radiological Health) under the FDA (Food and Drug Administration).

### Safety standards for laser beam products

- A laser beam can harm human being's eyes, skin, etc., because of its high energy density. IEC has classified laser products according to the degree of hazard and the stipulated safety requirements. **LS-H□(F)** is classified as Class 2 laser. **LS-H□(F)-A** is classified as Class 1 laser.

### Classification by IEC 60825-1

Classification	Description
Class 1	Lasers that are safe under reasonably foreseeable conditions of operation, including the use of optical instruments for intrabeam viewing.
Class 2	Lasers that emit visible radiation in the wavelength range from 400 nm to 700 nm where eye protection is normally afforded by aversion responses, including the blink reflex. This reaction may be expected to provide adequate protection under reasonably foreseeable conditions of operation including the use of optical instruments for intrabeam viewing.

### Safe use of laser products

- For the purpose of preventing users from suffering injuries by laser products, IEC 60825-1 (Safety of laser products). Please check the standards before use.

### Part description (Amplifier)

### Spot-shape adjuster (Only for LS-H21□, LS-H22□)

- The diffuse reflective type **LS-H21□** and **LS-H22□** incorporate the spot-shape adjuster to adjust the shape of spots.

Spot-shape adjuster	Description
	Turn the spot-shape adjuster clockwise or counter-clockwise to adjust the spot shape at your desired detecting distance. However, if the adjuster is turned too far, it may be damaged.

## PRECAUTIONS FOR PROPER USE

### Mounting

#### Amplifier

##### <How to mount the amplifier>

- ① Fit the rear part of the mounting section of the amplifier on a 35 mm 1.378 in width DIN rail.
- ② Press down the rear part of the mounting section of the unit on the 35 mm 1.378 in width DIN rail and fit the front part of the mounting section to the DIN rail.

##### <How to remove the amplifier>

- ① Push the amplifier forward.
- ② Lift up the front part of the amplifier to remove it.

Note: Be careful. If the front part is lifted without pushing the amplifier forward, the hook on the rear portion of the mounting section is likely to break.

##### <How to mount the sensor head>

- ① Insert the sensor head connector into the inlet until it clicks.
- ② Fit the cover to the connector.

#### Sensor head

- The tightening torque should be 0.5 N·m or less.

- When placing the sensor head horizontally or vertically, the reflector must also be positioned horizontally or vertically as shown in Fig. 1 below. If the sensor head is placed horizontally or vertically but the reflector is leaned as shown in Fig. 2 below, the reflection amount will decrease, which may cause unstable detection.

**Fig. 1 Proper positioning**

When placing the sensor head horizontally or vertically, the reflector shall also be positioned horizontally or vertically.

**Fig. 2 Improper positioning**

When placing the sensor head horizontally or vertically, but the reflector is leaned.

### Lens attachment for line reflective type (LS-MR1)

- The lens attachment for line reflective type **LS-MR1** mounted in the long sensing range line reflective type **LS-H22** is removable. When **LS-H22** is used without **LS-MR1**, it will provide the equivalent performance to the long sensing range spot reflective type **LS-H21**. In addition, the optional **LS-MR1** can be attached to **LS-H21** to obtain the performance equivalent to **LS-H22**.
- Keep the lens clean of dust, dirt, water, oil, grease, etc.
- Do not apply any excessive force to **LS-MR1**. Such force may cause damage.

#### Removing method

- ① Insert a screwdriver into the fixing slot located at the top of sensor head.
- ② Tilt the screwdriver inserted in Step ① to remove **LS-MR1**.

#### Mounting method

- ① The size of upper fixing hook of **LS-MR1** is not same as the lower fixing hook. After identifying the upper and lower fixing hooks, insert **LS-MR1** upper fixing hook into the fixing slot at the top of sensor head and then insert **LS-MR1** lower fixing hook into the fixing slot at the bottom of sensor head.
- ② After mounting, check that **LS-MR1** is properly fixed to the sensor head.

### Wiring

- Make sure that the power supply is off while wiring.
- Verify that the supply voltage variation is within the rating.
- Take care that if a voltage exceeding the rated range is applied, or if an AC power supply is directly connected, the sensor may get burnt or damaged.
- Take care that short-circuit or wrong wiring of the load may burn or damage the sensor.
- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.
- Ensure that an isolation transformer is utilized for the DC power supply. If an auto transformer is utilized, the main amplifier or power supply may be damaged.
- Make sure to use the optional quick-connection cable for the connection of the amplifier [connector type **LS-401(P)** / **LS-403**]. Extension up to total 100 m 328.084 ft is possible with 0.3 mm<sup>2</sup>, or more, cable. However, in order to reduce noise, make the wiring as short as possible.

### Others

- Do not use during the initial transient time (0.5 sec. approx.) after the power supply is switched on.
- Because the sensitivity is higher in U-LG mode than in other modes, it can be more easily affected by extraneous noise. Check the operating environment before use.
- These sensors are only for indoor use.
- Avoid dust, dirt, and steam.
- Take care that the product does not come in direct contact with water, oil, grease, or organic solvents, such as, thinner, etc.
- This sensor cannot be used in an environment containing inflammable or explosive gasses.
- Never disassemble or modify the sensor.
