

Tango 1 GSM/GPRS Low Profile Antenna

Key Features

- 2dBi peak gain
- Compact size
- Rugged design

General Description

The Tango 1 body mount GSM/GPRS antenna is a 900 & 1800MHz tuned 1/4 wave dipole. Its metal ground plane is fitted with a through hole mount threaded nut, ensuring a secure fit whilst the rubber seal is tough enough to withstand industrial washers on mobile applications such as trucks or buses.

Its design is suited to enclosures fitted with a GSM/GPRS module or terminal but requiring a low profile antenna solution such as utility owned street furniture, steel manufactured access control panels or for high roofed commercial vehicles.

Alternative connectors and cable lengths may be specified for volume orders.

Additional Considerations

- Robust for goods vehicle or PSV category
- Good for utility street furniture
- Meets all EU compliance criteria for electronic goods
