# Transponder coils TPLC series (for automotive)

#### AEC-Q200

# TPLC553030 type

### FEATURES

- O Transponder coils that ensure high reliability suitable for automotive applications.
- O Ensures high reliability suitable for automotive applications by adopting higher heat resistance wire and welding wire connection.
- Operating temperature: -40 to +125°C (including self-temperature rise)
- O Compliant with AEC-Q200

#### APPLICATION

○ Tire-pressure monitoring system (TPMS)

### PART NUMBER CONSTRUCTION

## CHARACTERISTICS SPECIFICATION TABLE

| L*   |           | Q    | Measurement frequency<br>(kHz) | DC resistance<br>(Ω) | Part No.               |
|------|-----------|------|--------------------------------|----------------------|------------------------|
| (mH) | Tolerance | min. |                                | max.                 |                        |
| 5.89 | ±3%       | 35   | 125                            | 70                   | TPLC553030-592H        |
| 5.09 | ±0 /0     | 55   | 125                            | -                    | <u>11 200000-09211</u> |

\* This inductance value is an example of the current commercial product. If a different inductance is needed, please contact us.

#### TEMPERATURE RANGE, PACKAGE QUANTITY

| Operating<br>temperature range* | Storage temperature range | Package quantity |
|---------------------------------|---------------------------|------------------|
| –40 to +125 °C                  | –40 to +125 °C            | 2500 pcs/reel    |

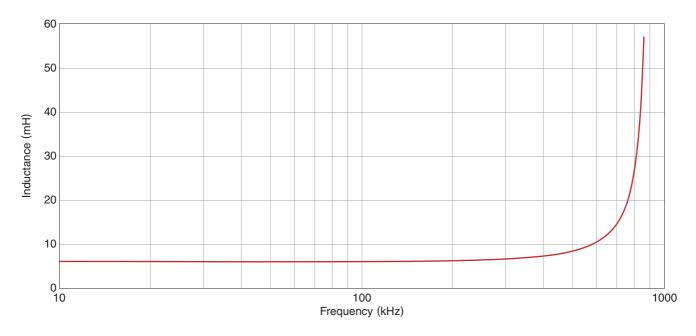

\* Operating temperature range includes self-temperature rise.

# **REMINDERS FOR USING THESE PRODUCTS**

Before using these products, be sure to request the delivery specifications.

# SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

| The storage period is less than 12 months. Be sure to follow the or less).   | e storage conditions (Temperature: 5 to 40°C, Humidity: 10 to 75% RH  |  |  |  |
|--|---|--|--|--|
| If the storage period elapses, the soldering of the terminal elect   | rodes may deteriorate.  |  |  |  |
| $\bigcirc$ Do not use or store in locations where there are conditions such  | as gas corrosion (salt, acid, alkali, etc.).  |  |  |  |
| <ul> <li>Before soldering, be sure to preheat components.</li> <li>The preheating temperature should be set so that the temperature does not exceed 150°C.</li> </ul>  | ure difference between the solder temperature and chip temperature  |  |  |  |
| <ul> <li>Soldering corrections after mounting should be within the range<br/>If overheated, a short circuit, performance deterioration, or lifes</li> </ul>  | -   |  |  |  |
| When embedding a printed circuit board where a chip is mounted<br>the overall distortion of the printed circuit board and partial distortion   | ed to a set, be sure that residual stress is not given to the chip due to ortion such as at screw tightening portions.  |  |  |  |
| <ul> <li>Self heating (temperature increase) occurs when the power is to<br/>design.</li> </ul>  | urned ON, so the tolerance should be sufficient for the set thermal   |  |  |  |
| $\bigcirc$ Use a wrist band to discharge static electricity in your body thro  | ugh the grounding wire.   |  |  |  |
| O Do not expose the products to magnets or magnetic fields.  |   |  |  |  |
| $\bigcirc$ Do not use for a purpose outside of the contents regulated in th  | e delivery specifications.  |  |  |  |
| If an ultrasonic process is used, thoroughly check the condition   | setting in order to prevent disconnection.  |  |  |  |
| O Do not clean the products with solvents. If a potting resin or a m<br>xylene is used, consult with us in advance.  | oisture-proof coat containing a solvent such as acetone, toluene or   |  |  |  |
| equipment, industrial robots) under a normal operation and use<br>The products are not designed or warranted to meet the require   | r equipment, personal equipment, office equipment, measurement  |  |  |  |
