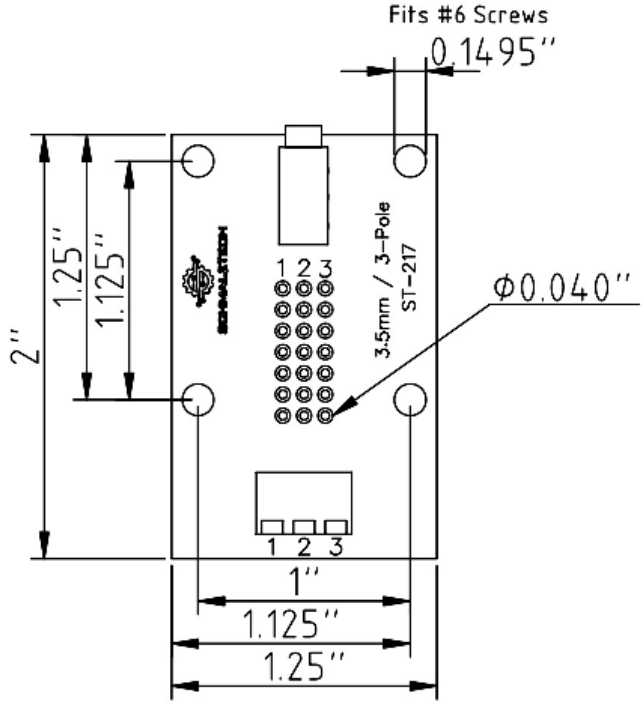
3.5mm 3-Pole Breakout Board

MPN: ST-217

Description:

This 3.5mm 3-Pole screw terminal breakout board allows for quick and easy prototyping, testing, and debugging of 3.5mm connections. Each screw terminal connects to one row of the prototyping area and to one of the three connections inside the 3.5mm jack.



Key Features:

- Screw terminals accept 24-16 AWG solid and stranded wire
- Proto area uses a standard 0.1” pitch for easy prototyping
- Mounting holes are sized for #6 screws
- High quality double sided PCB can with-stand re-work
