Description:

Powerex Application Specific IPMs (ASIPMs) are intelligent power modules that integrate power devices, gate drive and protection circuitry in a compact package for use in small inverter applications up to 20kHz. Use of application specific HVICs allow the designer to reduce inverter size and overall design time.

Features:

- Rectifier Bridge for 3-phase AC-to-DC Power Conversion
- 3-phase IGBT Inverter Bridge
- Integrated HVICs for Gate Drive, Protection and System Control Functions
- Built-in Thermistor
- Direct Connection to DSP/CPU

Applications:

- Smart Motors
- General Purpose Inverters
- Small Motor Control

***Fault output signalling is given only when the internal OC, SC, and UV protection circuits are activated. The OC, SC and UV protection (and fault output) operate for the lower arms only. The OC and SC protection fault output is given in a pulse format while that of UV protection is maintained throughout the duration of the under-voltage condition.
