IDS-205 – Managed Industrial Ethernet Switch

perle.com/products/switches/ids-205-industrial-managed-ethernet-switch.shtml

5 port Compact DIN Rail Switch

- 5 port 10/100/1000Base-T (RJ45) for Gigabit and Fast Ethernet devices
- · IP Manageability, VLAN and resiliency management
- Compact, corrosion resistant case attaches to a standard DIN Rail
- Redundant dual power input 12/24/48 VDC
- Out-of-band management via RJ45
- Programmable Controller safety and Hazardous Location Certification
- -40 to 75C industrial operating temperature (XT Models)

The IDS-205 is a 5 port Managed Ethernet Switch that can operate in industrial 10/100/1000-Base-T environments providing advanced performance and enabling real-time deterministic network operation.

Perle Industrial-grade Ethernet Switches are designed to stand up to extreme temperatures, surges, vibrations, and shocks found in industrial automation, government, military, oil and gas, mining and outdoor applications.

Perle's Fast Setup feature provides simple Plug and Play installation to get your Ethernet devices networked immediately. CCNA (Cisco Certified Network Associate) and CCNP (Cisco Certified Network Professional) trained engineers will appreciate the familiar Command Line Interface (CLI) via in-band Telnet or the out-band serial console port.

The IDS-205 supports a comprehensive set of management functions, such as P-Ring, management VLAN, QoS, RMON, N:1 port mirroring and local alert log. In addition, the switch can be managed with an IPv6 address.

Hardened to provide superior reliability in -10 to 60°C, these are rugged fan-less switches. In addition, every component on every industrial (XT) model has been designed and tested to handle operating temperatures between -40 and 75C.

All Perle Industrial Ethernet Switches only use **high-end components** from the **leading chip manufacturers** to ensure the highest level of **durability and reliability**. In addition, all units have a corrosion resistance aluminum case and dual redundant power input with reverse polarity and overload protection.

Perle has been **designing industrial hardware** for **over 35 years** and have used this expertise to design the **toughest Ethernet switches on the market**.

IDS-205 Industrial Managed DIN Rail Switch Features

Simple deployment

Zero-touch discovery using Dynamic Host Control Protocol (DHCP), Perle's "Fast Setup" for first time installation, provides simple deployment in Ethernet environments.

Resiliency

- STP and RSTP protocols for fast recovery.
- Perle's P-Ring protocol for fast convergence in ring topologies

Manageability

- Web Device Manager, Telnet, SNMP and Perle's PerleView NMS for centralized management
- · In-band management via RJ45 port
- Use an IPv4 or IPv6 address

Rugged design for harsh environments

- Corrosion resistant case
- · Programmable Controller Safety certified
- · Certified for hazardous locations
- Extended industrial temperature models

Reliable operation

- Fan-less, no moving parts
- Dual power input. Connect to separate power sources for redundancy.
 - Reverse polarity protection
- Handles vibration and shock conditions found in industrial environments
- Overload current protection

Real-time Ethernet performance

- Fast wire-speed, store and forward switching
- · Auto-sensing for speed and duplex

Auto-mdi/mdix-crossover works with straight and crossover cables

Energy	Efficient
Etherne	et
(EEE)	

Energy Efficient Ethernet (EEE) as per 802.3az provides power savings during idle network activity.

Performance Features

Port Auto- sensing	Auto-sensing of port speed and auto-negotiation of duplex on all switch ports for optimizing bandwidth
Auto MDI/MDIX	Medium-dependent interface crossover (Auto-MDIX) capability on 10/100 and 10/100/1000 mbps interfaces that enables the interface to automatically detect the required cable type (straight thru or crossover) and to configure the connection appropriately
802.3x flow	IEEE 802.3x flow control on all ports. (The switch does not initiate pause frames)

control

Storm Control

Storm control prevents traffic on a LAN from being disrupted by a broadcast, multicast, or unicast storm on one of the physical interfaces. A LAN storm occurs when packets flood the LAN, creating excessive traffic and degrading network performance. Storm Control enables limits to be placed on broadcast, multicast and unicast traffic

Static MAC Addressing

This feature enables the manual configuration of the MAC addresses on a per port basis. Flooding is prevented by retaining MAC entries across a reboot of the switch.

Port Blocking

Port Blocking provides the ability to block the flooding of unknown layer 2 unicast and multicast traffic on an Interface

IPV4 IGMP Snooping

Internet Group Management Protocol (IGMP) constrains the flooding of multicast traffic by dynamically configuring Layer 2 interfaces so that multicast traffic is forwarded to only those interfaces associated with IP multicast devices.

IGMPv1, v2, v3, IGMP snooping querier mode, IGMP report suppression, topology change notification and robustness variable features are supported

Port Quick Disconnect

In some network environments, it is desirable to move an Ethernet from one switch port to another and have the device come on-line quickly. The Port Quick Disconnect feature if enabled, provides an immediate age-out of the MAC addresses learned on the port when the port status changes from a link-up to a link-down state

Manageability Features

Web Device Manager

The Perle Web Device Manager is an embedded Web based application that provides an easy to use browser interface for managing the switch. Unlike competitive products, Java applet technology is not required or used

Command Line Interface (CLI)

A familiar text-based Command Line Interface that is based on accepted industry standard syntax and structure. Ideal for CCNA and CCNP trained engineers, this interface is available via in-band Telnet or the out-band serial console port

SNMP

Manage the switch with an snmp compatible management station that is running platforms such as HP Openview or Perle's PerleVIEW NMS. SNMP V1 and V2C

PerleVIEW

PerleVIEW is Perle's SNMP-based network management system that provides a view of the network with a large scale of Perle networking devices.

IPv6

Manage with an IPv4 or IPV6 address

DHCP Client Auto-Configuration

Automates configuration of switch information such as IP address, default gateway, hostname and Domain Name System (DNS) as well as TFTP server names. Firmware and configuration file locations are provided through options 54, 66, 67, 125 and 150

DHCP Relay

DHCP Relay is used for forwarding requests from DHCP clients when they are not on the same physical subnet. As a DHCP relay agent the switch operates as a Layer 3 device that forwards DHCP packets between clients and servers.

DHCP Option 82 Insertion

Normally used in metro or large enterprise deployments DHCP Option 82 insertion is used to provide additional information on "physical attachment" of the client. As per RFC 3046, option 82 enables additional pre-defined information to be inserted into the DHCP request packet (for DHCP Servers that support this option)

LLDP

LLDP-Link Layer Discovery Protocol as per IEEE 802.1AB is a neighbor discovery protocol that is used for network devices to advertise information about themselves to other devices on the network. This protocol runs over the data-link layer, which allows two systems running different network layer protocols to learn about each other (via TLVs – Type-Length-Value)

File Download

Firmware can be transferred via TFTP or HTTP. Text-based files that can be created or edited by common text editors.

Availability and Redundancy Features

Spanning Tree Protocol (STP)

IEEE 802.1D now incorporated in IEEE 802.1Q-2014, STP prevents bridge loops and the broadcast radiation that results from them.

Other Spanning Tree features include BPDU guard, Root guard, loop guard, root guard and TCN Guard

Rapid Spanning Tree Protocol (RSTP)

Interoperable with STP, RSTP (IEEE 802.1w) takes advantage of point-to-point wiring and provides rapid convergence of the spanning tree. Reconfiguration of the spanning tree can occur in less than 1 second

P-Ring

Perle's Ring Protocol provides resilient operation of a network made up of managed switches in a ring topology. The implementation prevents a switch loop scenario and also enables communication within the ring if a failure occurs somewhere in the ring.

P-Ring also has an auto-configuration feature that automatically determines the master control switch in the ring reducing installation time.

Recovery time of 10 ms or better in rings composed of up to 14 switches

VLAN Features

VLAN Range

Up to 255 VLANS across a VLAN ID range of 1 to 4094

VLAN Interfaces

Perle switches provide the ability to configure management VLAN interfaces. This enables network administrators to access the switch's management interface from separate VLAN networks

Quality of Service (QoS) and Class of Service (CoS) Features

Classification

IP ToS/DSCP and IEEE 802.1p CoS

Congestion
Avoidance

Weighted Fair Queuing or Strict Queuing

Egress Queues and scheduling

- · 4 traffic class queues per port
- · output queue mapping
- DSCP to output queue mapping

Monitoring Features

Port Mirroring

N:1 Port Mirroring is a method of monitoring network traffic. With port mirroring enabled, the switch sends a copy of one or more ports to a predefined destination port. Selection of Transmit, Receive frames or both can be made

RMON

RMON statistics provided for statistics, history, alarms and events for network monitoring and traffic analysis

Syslog

Facility for logging systems messages to an external SYSLOG server

Alert Log

Facility for logging systems messages locally

Traceroute

Layer 2 traceroute to identify the path that a frame takes from source to destination

Virtual cable test

A test that enables the detection of potential copper cabling issues such as pair polarity pair swaps and excessive pair skew as well as any opens, shorts or any impedance mismatch. Will report the distance in the cable to the open or short.

Power Supply Monitoring

Provides the status of power supplies of the switch

Alarm

Processing

The switch can monitor global switch conditions as well as individual ports. These alarms can be configured to send messages to;

- · an internal log file
- · external Syslog server
- SNMP trap server
- An external alarm device such as a bell, light or other signaling device via the switch's built-in dry contact alarm relay

Global Status Monitoring Alarms

· Dual power supply alarm

Port Status Monitoring Alarms

- Link Fault Alarm (IE loss of signal)
- · Port not forwarding alarm
- Port not operating alarm (failure upon start up tests)
- FCS Bit error rate alarm

Alarm Relay

When enabled, energizes the built-alarm relay triggering an external alarm circuit such as a bell, light or other signaling device according to alarm conditions set

Management and Standards

IEEE Standards

IEEE 802.3 for 10Base-T

IEEE 802.3u for 100Base-T(X) and 100Base-X

IEEE 802.3ab for 1000Base-T IEEE 802.3z for 1000BaseX

IEEE 802.3x for Flow Control

IEEE 802.1D-2004 for Spanning Tree Protocol

IEEE 802.1w for Rapid STP
IEEE 802.1Q for VLAN Tagging
IEEE 802.1p for Class of Service

IEEE 802.3ad for Port Trunk with LACP

IEEE 802.1AB LLDP

Hardware Features & Technical Specifications: IDS-205 Industrial Managed DIN Rail Switch

Power

Dual Power Input

Both inputs draw power simultaneously. If one power source fails, the other live source can, acting as a backup, supply enough power to meet the operational needs of the switch.

12/24/48 VDC Nominal. (9.6 to 60 VDC)

Power Connector

4-Pin Removable Terminal Block.

Grounding screw on metal chassis

Overload Current Protection

Fused overload current protection

Reverse polarity protection

The positive and negative inputs can be reversed providing safe and simple power connectivity.

Access Ports

RJ45

5 shielded RJ45 ports for 10/100/1000Base-T up to 100 meters (328 ft)

Auto-negotiation

Auto-MDI/MDIX-crossover for use with either crossover over straight-through cable types

Ethernet isolation 1500 V

RJ45 Serial Console port **RJ45 DTE**

Optional rolled and straight thru RJ45 cables and DB adapters are available

Alarms

Alarm Relay

- NC (Normally Closed) dry contact.
- 1A @ 24V
