# Camera Cable - Raspberry Pi Zero edition

CAB0306

Your new Raspberry Pi Zero has its own camera port, but its smaller than the one on the Pi 3, so how do you connect your awesome Raspberry Pi camera module to it? This little cable will sort you right out!

15cm end to end and as flexible and strong as you'll ever need this will be perfect for your miniature camera project :-)

Please note: this product is just the camera cable, the Raspberry Pi Zero, Pibow and camera module are not included
