Order Number 63808-4410

FEATURES

- Applicator designed to industry-standard mounting and 135.80mm (5.346") shut height
- Quick setup time; plus, the crimp height, track and feed adjustments can be set without removing the applicator from the press
- Fine adjustment allows users to achieve target with little effort by adjusting in increments of 0.015mm (.0006") for conductor crimp height and 0.025mm (.001") for insulation height
- Independent adjustment rings allow users to quickly adjust the conductor or insulation crimp height without affecting each other.
- Directly adapts to most automatic wire processing machines.
- Fine adjustment of the bend is achieved using the bend control adjust dial.
- This applicator is configured with a pneumatic feed, which requires a 4-way pneumatic valve for operation.

SCOPE

Products: 2.00mm W/B DuraClik ISL Series Receptacle Terminals.

| Terminal Series No. | Terminal Order No. | Wire | | | Insulation Diameter | | | | Strip Length | |
|------------------------|----------------------------|------------------|-----|------|---------------------|---------|--------------|----------|--------------|---------|

(1) To achieve optimum IPC/WHMA-A-620 insulation crimps, use this insulation OD range.

(2) Overall insulation OD specification for terminal.

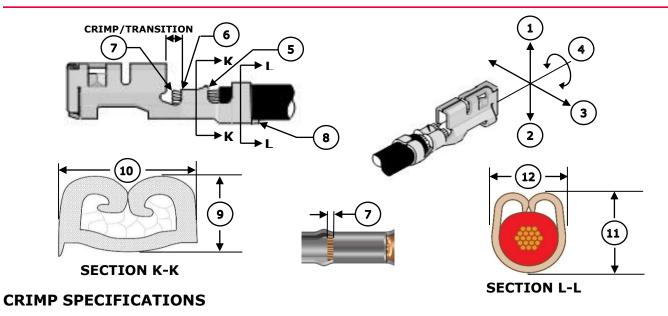

(3) See Tool Qualification Notes on page 3.

CAUTION: To operate the pneumatic feed, a 4-way pneumatic valve is required.

Note: Oiler (63801-7240) is required to crimp all terminals to improve tooling life and to minimize the crimp extrusion or flash. See FA2 manual (TM-638080200).

Doc. No: 638084410 Release Date: 08-03-20 UNCONTROLLED COPY Page 2 of 8

Tool Qualification Notes

- 1. Pull force should be measured with no influence from the insulation crimp.
- 2. The above specifications are guidelines to an optimum crimp.
- 3. Oiler (63801-7240) is required to crimp all terminals to improve tooling life and to minimize the crimp extrusion or flash. See FA2 manual (TM-638080200).
- 4. FLRY-A 0.35mm² and terminal 560124-0101 validated to USCAR21 (Rev3) Section 4.3, 4.4 and 4.5.2
- 5. FLRY-A 0.35mm² wire and terminal 560124-0101 validated to VW 60330 (Rev. 2013-12) Section 4.3.4 and 5.5.1. Deviation on 4.3.4.8 (CFE Dimension)
- 6. FLRY-A 0.35mm² wire and terminal 560124-0101 validated to LV214-2 (Rev. 2008-01)
- 7. Mocar150C 0.35mm² and terminal 560124-0101 validated to USCAR21 (Rev3)

NOTES

- 1. Molex recommends that an extra perishable tooling kit be maintained at your facility.
- 2. Verify tooling alignment by hand cycling the press and applicator before crimping under power. Check that all screws are tight.
- 3. Slugs, terminals, dirt and oil should be kept clear of the work area.
- 4. Wear safety glasses at all times.
- 5. For recommended maintenance, refer to the FA2 manual (TM-638080200).
- 6. Molex recommends crimping stranded copper wire only.

WARNINGS

CAUTION: This applicator must be installed in a press with a standard shut height of 135.80mm (5.346"). Tooling damage could result at a lower setting.

CAUTION: To prevent injury, never operate this applicator without the guards supplied with the press or wire-processing machine in place. Reference the press or wire processing manufacturer's instruction manual.

CAUTION: Molex tooling crimp specifications are valid only when used with Molex terminals and tooling manufactured by Molex and sold by Molex or authorized distributors ("Molex Tooling"). When using tooling other than Molex Tooling with Molex-specific connector systems listed in our ATS documents, the Molex Tooling qualification does not apply, and the responsibility for full qualification of the connector system is that of the customer. Molex accepts no liability for connector performance or tooling support where tooling other than Molex Tooling is used or where Molex Tooling is modified.

FACTORY SETTINGS

Feed Pawl Assembly

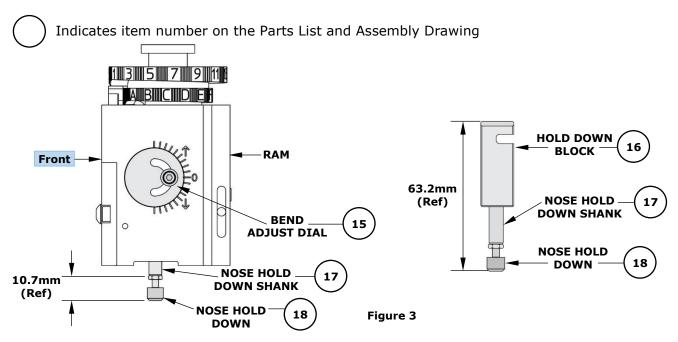

The FA2 applicator number 63808-4410 ships with the following factory settings. See Figure 2:

- The feed pawl shaft and M3 screw that holds the feed pawl spring are in position 3.
- The pin is in position B.

Note: Each applicator is configured and tested by Molex prior to shipping, and the above settings were used to produce the included sample crimps.

Third Dial/Ram Assembly

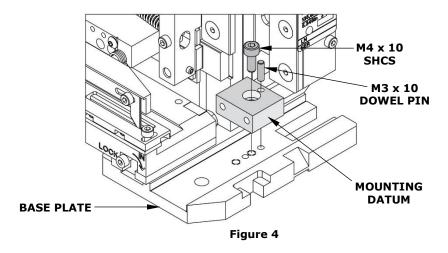

Note: The above dimensions were measured during setup and are included as a reference only. Additional adjustments may be required before crimping for production.

Doc. No: 638084410 Release Date: 08-03-20 **UNCONTROLLED COPY** Page 6 of 8

Mounting Datum Location

This applicator was assembled and tested by Molex with the mounting datum in the location shown in Figure 4. Do not remove the mounting datum.

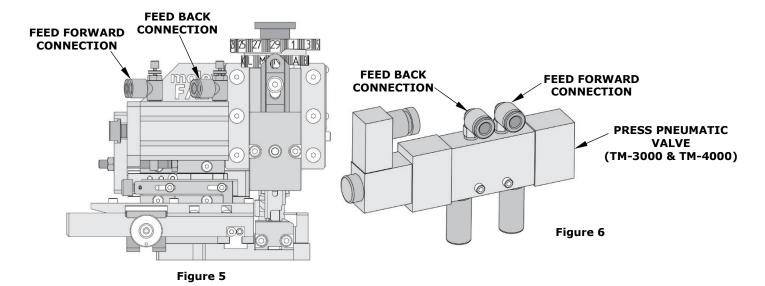

PNEUMATIC CONNECTION (AIR FEED)

- The pneumatic feed applicator uses a double-acting air cylinder that must be actuated by a 4-way pneumatic valve.
- The air cylinder is equipped with push-in fittings for 6mm diameter vinyl or Nylon tube. Adapters are included for ¼" diameter and 4mm diameter vinyl or Nylon tube.

Note: The TM-3000 and TM-4000 presses have pneumatic valves with $\frac{1}{4}$ " diameter tube fittings. Be sure to install the $\frac{1}{4}$ " diameter adapters in the air cylinder fittings and use $\frac{1}{4}$ " diameter vinyl or Nylon tube.

- Pneumatic tubes must be connected as shown in Figure 5. Tubes are typically connected so the terminal feed is forward when the applicator ram is up.
- When using the TM-3000 or TM-4000 presses, connect the tubes to the press pneumatic valve as shown in Figure 6.
