SOLUTIONS

Professional

Hot-Melt

Professional Heat Guns

Professional Heat Guns are high quality durable tools suitable for heavy-duty use in the industry and the trades. With a lightweight, ergonomic design, they provide powerful, even heat.

Gas Torches

Multipurpose torches and soldering irons are designed for a variety of uses. These tools combine quality and performance with exceptional value.

Hot-Melt Adhesive Systems

Industrial glue guns provide cord/cord-free operation and virtually unlimited flow of adhesive when and where you want it. Heavy-duty housing and mechanical parts are designed to with stand demands of professional use.

Genuine STEINEL

Professional Heat Tools

State-of-the art technology for precision, control and long life

STEINEL is a global organization dedicated to the development of cutting-edge technology for the delivery of controlled heat. Discriminating professionals worldwide have come to expect the superior performance, reliability and value only an industry leader can provide. Over half a century of the highest standards in design, manufacturing and service have made the STEINEL name synonymous with quality and innovation in over 80 countries.

From concept to installation

Being a heat tool technology leader is STEINEL's driving force. In addition to design and functionality, 100% testing ensures the quality of STEINEL products. Not only is each finished product tested, every component is examined well before final assembly. Beyond the factory, STEINEL is committed to superior customer service and technical support to create a true partnership with the professionals who specify and install our products.

German quality guarantee

All STEINEL tools are made in Europe for unmatched precision and performance.

- Research laboratories in Switzerland and Germany with our own team of over 70 physicists, engineers, and electronics experts
- Precision manufacturing facilities at five European locations, all solely owned and operated by STEINEL, all ISO 9001:2000 certified
- In-house production of our own electronics, resins and injection moldings
- Local delivery and support in over 86 countries worldwide

When Quality Counts, Choose STEINEL

Precision Hot Air Tool

The HG 350 ESD the Ultimate Precision Hot Air Tool

This sleek, ergonomically optimized tool incorporates cutting edge STEINEL technology to meet the exacting needs of even the most sensitive applications. Innovative features include a bright LED light to illuminate the work area while highly focused hot air ensures an accurate result.

STEINEL...for world-class performance, guaranteed.

Applications

- Ideal for de-soldering electronic components
- Variety of reflectors available for specific shrink tube and solder sleeve applications
- Perfect where ESD safe is required

STEINEL utilizes state-of-the-art SMD surface mount circuit boards which we design and manufacture for this specific application

HG 350 ESD & BHG 360 Li-ION

Precision Hot Air Tools

- Targeted 3.5 CFM airflow
- 750°F Temperature (930°F with included 1/4" / 7 mm Reducer)
- LED light illuminates work area
- Sleek, balanced design for comfortable long-term use
- Compact, lightweight construction
- Built-in security hanger for overhead suspension
- HG 350 ESD is ESD safe
- LED serves as a convenient "on" indicator
- Safety rests help prevent surface contact with hot nozzle
- "Thermo-Signal" temperature indicator

HG 350 ESD Precision Hot Air Tool

The HG 350 ESD brings hot air to where it's needed at any work place. The new hot air tool is easy to use, lightweight and extremely comfortable to hold thanks to its ergonomically shaped soft grip. It is the ideal tool for soldering, de-soldering and heat-shrinking. Compact in design, it fits into any tool box or service case.

An integrated bright LED light illuminates even the darkest of work situations and acts as an "on" indicator. In stationary applications and noisy surroundings, this instantly lets you know what is happening. The molded rests integrated in the housing also add to safety by keeping the hot tool at a distance from the surface.

BHG 360 Li-Ion Battery Pack Precision Hot Air Tool

STEINEL gives you mobility. With its powerful Li-Ion rechargeable battery, the cordless version of the practical HG 350 ESD provides ultimate freedom of movement for hot-air applications - even at places without power. The formidable 36-volt Li-Ion has a capacitance of 2600 mAh and delivers the energy for 15 minutes of unrestricted hot-air work.

Features

Optimized Weight Balance for Fatigue-Free Operation

Molded Safety Rests

Soft Grip Handle

Integrated LED Light Provides Bright Illumination of the Work Area

Toggle Switch: 0 Off / 1 Cool / 2 Heat

Integral Security Hanger

The HB 1750 Professional Heat Blower Series

The HB 1750 is the most ergonomically advanced high output blower in its class.

21st Century Technology enables STEINEL to achieve maximum airflow from a lightweight, ultra quiet tool. Superior design, materials and workmanship ensure the quality and reliability the STEINEL name guarantees.

Applications

- Shrink wrap, packaging
- Dry paint, wall emulsion, filler etc.
- Window tinting, vehicle graphics and wraps
- Stripping paint
- Assembly and removal of bearings
- Heavy duty heat connectors and boots
- Cable assembly

HB 1750

Professional Heat Blowers

- Powerful turbine blower with air delivery rate up to 23 cfm
- Color coded keys for the right temperature every time
- Maintenance free factory sealed motor
- Lightweight, well balanced design
- Soft grip handle with convenient slide switch (Off / Cool / Hot)
- Ultra quiet operation
- Plug-in heating element takes only seconds to change
- Quick-lock stand is fully adjustable and stores keys
- Available accessories enhance versatility

HB 1750 Professional Heat Blower

The HB 1750 has been specifically optimized for drying efficiency and for heat-shrinking tubes and sleeves on thick cables.

This extremely powerful heat tool delivers almost 30% more air than conventional tools. Continuously adjustable airflow ensures the user stays in control.

The ergonomically shaped soft grip handle permits fatigue-free working. The included stand offers stationary operation at any angle.

HB 1750 Kit

- Quick Lock Stand
- 5 Temperature Keys
- Large Reflector
- Spare Element
- Silver Case

No. 34759

HG 5000 E

Industrial Heat Guns

 Double Insulated

- Powerful 230 V heat gun with 28 cfm output
- Fully electronic temperature and airflow control
- Intelligent motor and temperature control
- LED temperature display showing selected and actual temperature
- High-performance, long life brushless motor
- Easy-to-change element
- Smartchip technology allows the gun to stay calibrated with the new element

HG 5000 E Intellitemp™ Heat Gun with LED Temperature Display (230V)

STEINEL HG 5000 E provides the ultimate in precision technology. Exclusive IntelliTemp™ control enables the user to select a target temperature in 10°F increments and to view actual output on the LED display. Heating elements are easily changeable in the field and integrate SmartChip™ technology allowing the heat gun to automatically recalibrate to the new element.

Heavy Duty Metal Case
17.90" x 5.40" x 10.20"
No. 40090

Flathead Angle Nozzle

HG 4000 E

Industrial Heat Guns

 Double Insulated

- Powerful 120 V heat gun with 21 cfm output
- Airflow and temperature continuously variable
- Easy-to-ready LED display
- Durable heavy duty housing
- Power cord can be changed without opening enclosure
- Straight form for optimum stationary use
- Field changeable element
- Factory sealed brushless motor
- Smartchip technology allows the gun to stay calibrated with new element

HG 4000 E IntelliTemp™ Heat Gun with LED Temperature Display (120V)

STEINEL HG 4000 E features a continuously variable temperature and airflow regulator, a digital display of actual and selected temperature, an intelligent motor control system, a brushless motor and a plug-in easy to change element. With pinpoint accuracy the HG 4000 E in conjunction with the appropriate nozzle is ideal for welding copper and plastics.

Professional Heat Guns

Professional Heat Guns

STEINEL heat guns are indispensable tools for professional tradespeople and industry leaders. State of the art technology, solid workmanship and a wealth of applications make them ideal for welding plastics, fitting shrink tubing, shaping thermoplastics or stripping paint. STEINEL professional heat tools get hot air straight to where it is needed. Precision control, versatility, longevity and great performance distinguish the products from the hot-air tool specialist.

Applications

- Applying shrink tubing and connectors
- Loosening seized fasteners
- Plastic welding and repair
- Fitting or smoothing prosthetic devices
- Shaping and bending plastic pipes and parts
- Soldering and desoldering
- Upholstery
- Fiberglass repair
- Packaging
- Dental and optical labs
- Stripping paint
- Vehicle graphics or wraps
- Window tinting
- Aerospace

Programmable Output with LOC™

Preset Programs

STEINEL's new HG 2510 ESD and HG 2310 LCD models feature independently variable temperature and airflow. They come with four programmed settings for rapidly adapting output to common applications. These programs may be customized to suit the user's specific requirements.

In addition, Supervisors and Quality Control Engineers may lock down output to one specific temperature / airflow combination using the LOC Lockable Override Control™ feature included on these heat guns. The end user cannot modify output unless his supervisor "unlocks" the tool.

Electronic Thermocouple Control

All STEINEL Electronic Heat Guns incorporate a temperature sensor at the tip of the output nozzle. This thermocouple feeds information back to the integrated electronics, which make the necessary adjustments to achieve the desired air temperature output and avoid overheating. The result is extremely accurate temperature control as well as increased life.

STEINEL utilizes state-of-the-art SMD surface mount circuit boards which we design and manufacture for this specific application. Reliability is ensured due to the decreased number and nature of the connections.

Select STEINEL models feature IntelliTemp™ temperature control. A digital display enables the user to select a target temperature in 10°F increments and will indicate when the temperature has been achieved.

SMD Surface Mount Circuit Board

Programmable IntelliTemp Control

Duratherm™ Heating Element

Fully Encapsulated Coils

STEINEL's patented DuraTherm Ceramic Encapsulated Heating System is unsurpassed for even heat and long life. Coils are wound through a series of stacked ceramic disks achieving a "honey-comb" effect that fully encapsulates and supports them. The ceramic acts like an oven, preventing hot and cold spots, and providing the most evenly heated airflow possible. The added support helps prevent coil breakage and contributes to the element's long life.

Interconnect Block Circuitry

STEINEL's modular Interconnect Block increases reliability significantly. Plastic is injection molded around the "wiring" to form a solid block, which will not break or disconnect like traditional wiring. Adding to this reliability are fully enclosed slide switches and firmly secured power cords.

Professional Heat Guns with Electronic Thermocouple Control

 Double Insulated

- Lockable override control
- Variable temperature and airflow control
- Duratherm™ heating element
- HG 2310 LCD is double insulated
- HG 2510 ESD is ESD safe
- Reduction Nozzles are approved for use on Professional Heat Guns with electronic thermocouple control

HG 2310 LCD Programmable IntelliTemp™ Heat Gun

HG 2310 LCD Programmable IntelliTemp™ Heat Gun features LOC Locable Override Control™ of temperature and airflow output settings. LCD display enables temperature selection in 10°F increments. The HG 2310 LCD is ideal for use on electronics, aerospace, medical manufacturing and other applications requiring precision control.

HG 2310 BB Programmable IntelliTemp™ Heat Gun

The HG 2310 BB Programmable IntelliTemp™ Heat Gun features exclusive Black Box Technology to ensure safe, reliable operation. An interlock safety switch is incorporated to prevent accidental powering of the tool when used with an extension cord. The heat gun will turn on only when deliberately cycled “on” position, even if power is provided while the tool is left in the “on” position.

HL 2010 E

Professional Heat Guns with Electronic Thermocouple Control

- Microprocessor controlled
- Duratherm™ Heating Element
- LCD display
- Ergonomically designed
- Reduction nozzles are approved for use on Professional Heat Guns with electronic thermocouple control

HL 2010 E Heat Gun with LCD Temp Display

HL 2010 E Heat Gun is microprocessor controlled and features an LCD display which enables temperature selection in 10°F increments. Exclusive DuraTherm™ heating element ensures even heat and product longevity.

The HL 2010 E is suitable for applying shrink tubing/connectors, activating/softening adhesives, working heat sensitive materials and other applications requiring a specific temperature.

Plastic Welding Rod types:

Material	Application Types
Rigid PVC	Piping, fitting, boards, building profiles, technical moulded components, etc. Welding Temperatures 550°F - 650°F (290°C - 345°C)
Plasticized PVC	Floor coverings, wallpaper, hoses, sheets, tools, etc. Welding Temperatures 550°F - 650°F (290°C - 345°C)
Plasticized PE (LDPE) Polyethylene	Domestic and electronic items, toys bottles etc. Welding Temperatures 550°F - 650°F (290°C - 345°C)
Hard PE (HDPE) Polyethylene	Baths, baskets, canisters, insulating materials, piping, cellar shafts, transport containers, waste bins, etc. Welding Temperatures 550°F - 650°F (290°C - 345°C)
PP Polypropylene	HT drainpipes, plastic chairs, packaging, car components, equipment housings, technical mouldings, battery boxes, etc. Welding Temperatures 450°F - 550°F (230°C - 290°C)
ABS	Car components, equipment housings, suitcases Welding Temperatures 625°F - 725°F (330°C - 385°C)

HL 2010 E

Item No.	34850
Temperature	120°F - 1150°F (49°C - 621°C)
Airflow	3.6 / 10.6 / 17.6 cfm
3 Stage Switch	Cool air stage 120°F / 3.6 cfm Variable temperature 10.6 cfm Variable temperature 17.6 cfm
Output	1500 watts
Voltage	120 VAC / 60 Hz
Amps	12.5
Power Cord	Industrial grade rubber, length: 6 ft
Nozzle Diameter	1.30" (33.02 mm)
Dimensions	10.20" x 3.50" x 8.00" (l x w x h)
Net Weight	2.08 lbs (33.28 oz)
Single Sell Pack	Dimensions: 11.40" x 9.50" x 3.70" Weight: 2.56 lbs (40.96 oz)
Warranty	One year limited

HL 1910 E Variable Temperature Electronic Heat Gun

HL 1910 E is a powerful heat gun with variable temperature and electronic thermocouple control for flexible use and maximum reliability. STEINEL's exclusive DuraTherm™ heating element ensures long life and even heat.

The HL 1910 E is well suited for plastic welding, packaging, automotive, maintenance, and other applications requiring variable temperature or pinpoint reduction of heat output.

HL 1610 S Two Stage Professional Heat Gun

- Two stage switch
- Reinforced ceramic mica heating element
- Compact, lightweight construction

General purpose heat gun with two temperature settings is designed for safe, convenient professional and industrial use. Lightweight, ergonomic design ensures comfortable long term operation.

For thawing pipes, drying compounds, stripping paint, loosening decals or seized fasteners and all other basic heat applications.

Nozzles direct airflow for specific applications. See page 34 for a full line of accessories.

Accessories

For All Professional Heat Guns

Spreader nozzles spread hot air over a wide area for: drying, stripping paint, shaping plastic, welding tarpaper, removing decals/stoneguards, etc.

A variety of heat gun stands and holders offer the flexibility of hands free operation, optimum efficiency and maximized safety for most of STEINEL's heat guns.

The Heat gun arms and hangers are available for all Professional Heat Guns except for the HL 1610 S.

Net Weight 0.04 lb
No. 07461

Reduction nozzles provide a concentrated stream of hot air for precision welding or soldering. May be used as a base for specialized attachments.

Reflector nozzles direct hot air around pipes and tubing for even heating, while deflector nozzles protect adjoining surfaces (such as panes of glass and corners) from overheating.
