Add suffix “-ST” for optional screw terminal bottom plate or “-STD” for optional DIN Rail screw terminal bottom plate and input reverse polarity protection.

Due to the input reverse polarity protection, models with “-ST” and “-STD” option will have their minimum input and start-up voltage increased by 1VDC and efficiency decreased by 2%.

*Need an input capacitor in order to meet CISPR32 / EN55032 Class A.

NOTE: All specifications in this datasheet are measured at an ambient temperature of 25°C, humidity<75%, nominal input voltage and at rated output load unless otherwise specified.
