

# Ultra Low Profile 0805 Balun 75Ω to 100Ω Balanced

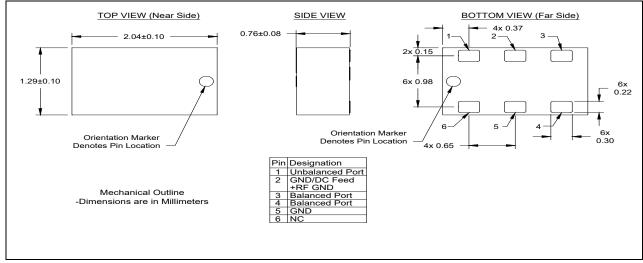

Specifications subject to change without notice

| Features:  |                           | ROOM (25°C) |      |      |         |
|--|---------------------------|-------------|------|------|---------|
| • 900 – 2200 MHz   | Parameter                 | Min.        | Тур. | Max  | Unit    |
| 0.7mm Height Profile   | Frequency                 | 900         |      | 2200 | MHz     |
| <ul><li>75 Ohm to 2 x 50 Ohm</li><li>Broadband applicability</li></ul> | Unbalanced Port Impedance |             | 75   |      | Ω       |
| Covers all commercial  | Balanced Port Impedance   |             | 100  |      | Ω       |
| communications bands in one  | Return Loss               | 9.1         | 11.9 |      | dB      |
| part   | Insertion Loss*           |             | 1.30 | 1.64 | dB      |
| Low Insertion Loss Surface Mountable                                   | Amplitude Balance         |             | 0.55 | 0.80 | dB      |
| <ul><li>Surface Mountable</li><li>Tape &amp; Reel</li></ul>            | Phase Balance             |             | 2.66 | 4.67 | Degrees |
| Non-conductive Surface   | CMRR                      |             | 28.7 | 24   | dB      |
| RoHS Compliant   | Power Handling            |             |      | 2    | Watts   |
| Halogen Free   | Operating Temperature     | -55         |      | +85  | °C      |

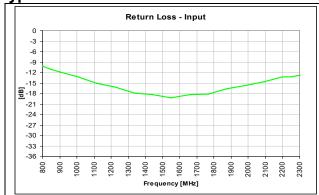

<sup>\*</sup>Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C

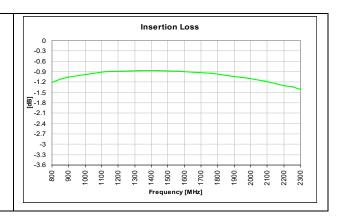

# Outline Drawing:

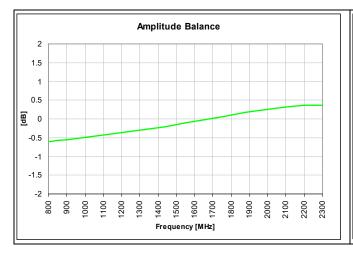

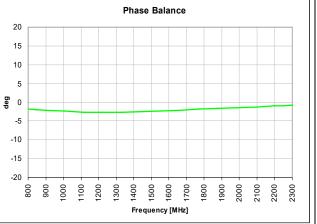

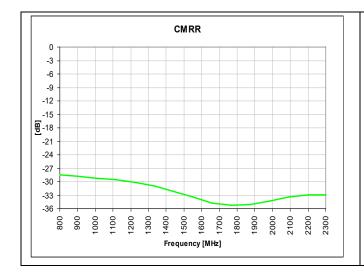

Typical Performance: 800 MHz to 2.3 GHz.

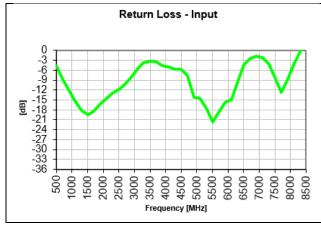

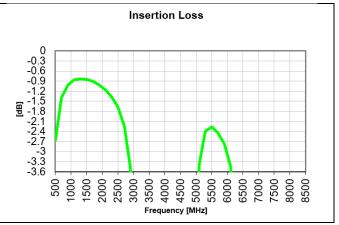

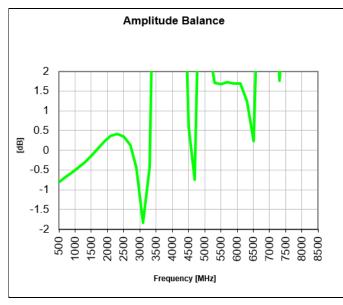

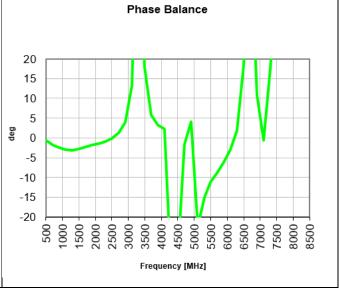

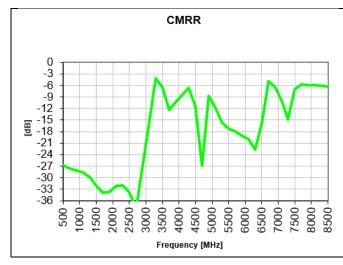

#### Wide Band Performance: 500 MHz. to 8.5 GHz.

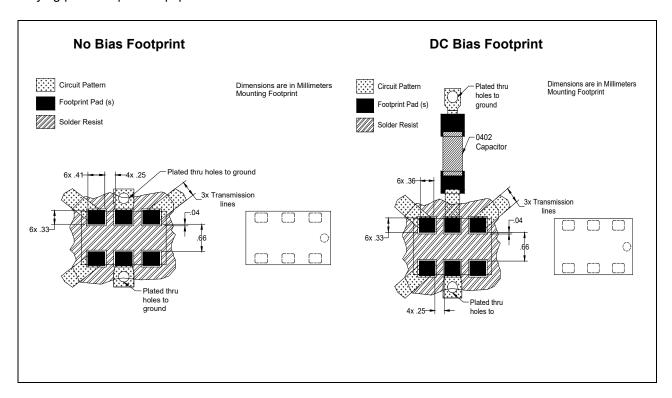

## **Mounting Configuration:**

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from organic PTFE based composites which possess excellent electrical and mechanical stability. Xinger components are compliant to a variety of ROHS and Green standards and ready for Pb-free soldering processes. Pads are Gold plated with Nickel barrier.

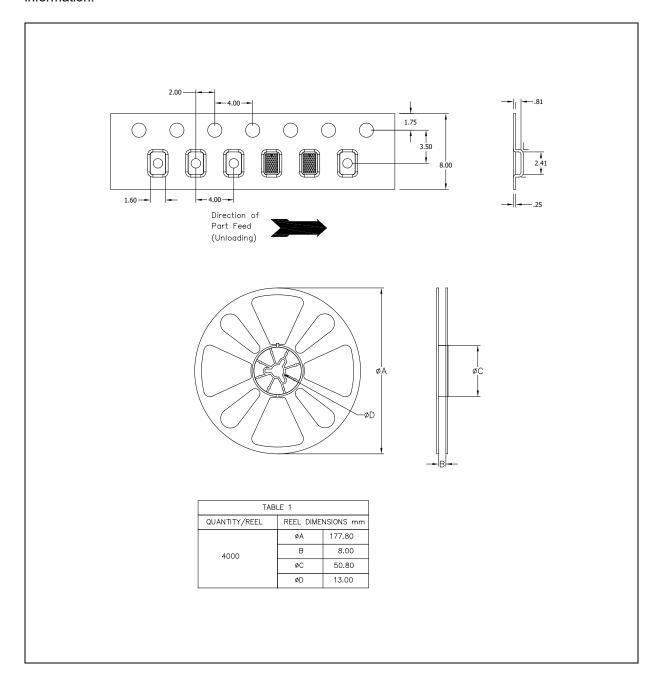

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dieletric coefficients and thicknesses as well as varying pick and place equipment tolerances.

### **Packaging and Ordering Information:**

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Number below for further ordering information.
