Installation steps and precautions

Step 1.

Attach the U-lock to the antenna metal base and make sure the top edge of the U-lock is flush with the top edge of the groove on the base. Then secure the U-lock with the antenna to the flange with 4 M4 flat head screws, flat washers, spring washers and nuts.

Step2.

Insert 2 U-bolt through the corresponding mounting holes on the flange and lock them to the mounting tube with $\varnothing 8$ flat washes, spring washers and nuts, finally complete the installation of the above antenna. By the way, outer diameter of the mounting tube is from 25 to 50mm, and it needs to be provided by customers.
