

# PSKN5-626

## PRODUCT OVERVIEW

The PSKN5-626 wideband device antenna covers the allocated 5G FR1 frequency band from 600-6000 MHz. The "6-2-6" antenna solutions make it possible to connect to any of the current or planned cellular frequency bands that reside at or below 6 GHz.

This antenna covers 617-6000 MHz. This includes the new Band 71 at 617-698 MHz, CBRS at 3550-3700 MHz and LAA at 5-6 GHz.

The Knuckle Swivel feature of the antenna allows it to be adjusted into one of three different angles: straight, 45° bend or 90° bend.

The PSKN5-626 terminates with a Reverse Polarity (Rev Pol) SMA Plug or an SMA Plug connector. Specify PSKN5-626-RS for the Rev Pol SMA Connection, or PSKN5-626-S for the SMA Plug configuration. The SMA Plug fits most 5G ready applications.

Overall dimensions are 7.63" (193 mm) at full length, with a blade antenna that is 1.92" (49 mm) wide by 0.38" (9.8 mm) deep.
