# **Panasonic**

#### Flat type safety relays

## SF RELAYS

#### **FEATURES**

#### 1. Forced operation contacts

N.O. and N.C. side contacts are connected through a card so that one interacts with the other in movement. In case of a contact welding, the other keeps a min. 0.5mm .020inch contact gap.

#### 2. Separated chamber structure

N.O. and N.C. side contacts are put in each own space surrounded with a card and a body-separater. That prevents short circuit between contacts, which is caused by their springs welding or damaged.

### 3. Contact arrangement of 3 Form A 1 Form B

Enables various forms of control circuit.

#### 4. High breakdown voltage

High breakdown voltage 2,500 Vrms (between contact sets/ between contact and coil)

#### 5. High sensitivity

Realizes thin shape and high sensitivity (500mW nominal operating power) by utilizing high-efficiency polarized magnetic circuit with 4-gap balanced armature.

**6. Complies with safety standards**Standard products are UL, CSA, TÜV and SEV certified. Conform to European standards. TÜV certified. Complies with SUVA European standard.

#### TYPICAL APPLICATIONS

- 1. Industrial equipment such as presses and machine tools
- 2. Elevators and other kinds of hoisting mechanisms, conveyor equipment.

RoHS compliant

#### ORDERING INFORMATION

Contact arrangement
3: 3 Form A 1 Form B

Nominal coil voltage
DC 5, 12, 24, 48, 60V

#### **TYPES**

Contact arrangement	Nominal coil voltage	Part No.
3 Form A 1 Form B	5V DC	SF3-DC5V
	12V DC	SF3-DC12V
	24V DC	SF3-DC24V
	48V DC	SF3-DC48V
	60V DC	SF3-DC60V

Standard packing: Carton: 20 pcs.; Case: 200 pcs.

#### **RATING**

#### 1. Coil data

Contact arrangement	Nominal coil voltage	Pick-up voltage (at 20°C 68°F)	Drop-out voltage (at 20°C 68°F)	Nominal coil current [±10%] (at 20°C 68°F)	Coil resistance [±10%] (at 20°C 68°F)	Nominal operating power (at 20°C 68°F)	Max. applied voltage (at 20°C 68°F)
3 Form A 1 Form B	5V DC	80%V or less of nominal voltage (Initial)	10%V or more of nominal voltage (Initial)	100mA	50Ω	500mW	120%V of nominal voltage
	12V DC			41.7mA	288Ω		
	24V DC			20.8mA	$1,152\Omega$		
	48V DC			10.4mA	$4,608\Omega$		
	60V DC			8.3mA	$7,200\Omega$		

#### 2. Specifications

Characteristics		Item	Specifications			
Contact	Arrangement		3 Form A 1 Form B			
	Contact resistance (Initial)		Max. 30 mΩ (By voltage drop 6 V DC 1A)			
	Contact material		Au-flashed AgSnO₂ type			
Rating	Nominal switching capacity (resistive load)		6A 250V AC, 6A 30V DC			
	Max. switching powe	r (resistive load)	1,500VA 180W			
	Max. switching voltage	ge	250V AC, 30V DC			
nating	Max. switching curre	nt	6A			
	Nominal operating po	ower	500mW			
	Min. switching capacity (Reference value)*1		100mA 5V DC			
	Insulation resistance	(Initial)	Min. 1,000M $\Omega$ (at 500V DC) Measurement at same location as "Breakdown voltage" section.			
		Between open contacts	2,500 Vrms for 1min. (Detection current: 10mA)			
	Breakdown voltage (Initial)	Between contact sets	2,500 Vrms for 1min. (Detection current: 10mA)			
Electrical	(IIIIIai)	Between contact and coil	2,500 Vrms for 1min. (Detection current: 10mA)			
characteristics	Temperature rise (coil)		Max. 45°C 113°F (By resistive method, nominal voltage applied to the coil; contact carrying current: 6A)			
	Surge breakdown voltage (between contact and coil)		_			
	Operate time		Max. 30ms (Nominal voltage applied to the coil, excluding contact bounce time.)			
	Release time		Max. 15ms (Nominal voltage applied to the coil, excluding contact bounce time.) (without diode)			
	Charle vaniatanas	Functional	Min. 294 m/s <sup>2</sup> (Half-wave pulse of sine wave: 11 ms; detection time: 10μs)			
Mechanical	Shock resistance	Destructive	Min. 980 m/s <sup>2</sup> (Half-wave pulse of sine wave: 6 ms)			
characteristics	Vibration resistance	Functional	10 to 55 Hz at double amplitude of 2 mm (Detection time: 10µs)			
	VIDIALION TESISLANCE	Destructive	10 to 55 Hz at double amplitude of 2 mm			
Even entered life	Mechanical		Min. 107: (at 180 times/min.)			
Expected life	Electrical		Min. 3×10 <sup>4</sup> (at 20 times/min.)*2			
Conditions	Conditions for operation, transport and storage*3		Ambient temperature: -40°C to +70°C -40°F to +158°F Humidity: 5 to 85% R.H. (Not freezing and condensing at low temperature)			
	Max. Operating spee	d	180 times/min.			
Unit weight			<b>38g</b> 1.34oz			

Notes: \*1. This value can change due to the switching frequency, environmental conditions and desired reliability level, therefore it is recommended to check this with the actual load.

\*2. More than 105 operations when applying the nominal switching capacity to one side of contact pairs of each Form A contact and Form B contact

\*3. The upper limit of the ambient temperature is the maximum temperature that can satisfy the coil temperature rise value. Refer to Usage, transport and storage conditions in NOTES.

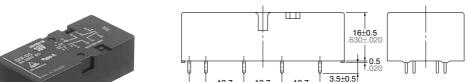

#### **DIMENSIONS** (mm inch)

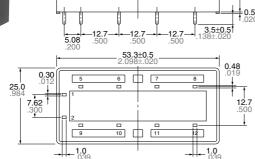

**CAD Data** 

External dimensions

The CAD data of the products with a CAD Data mark can be downloaded from: http://industrial.panasonic.com/ac/e/

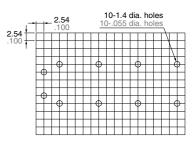

Schematic (Bottom view)

General tolerance: ±0.3 ±.012

#### PC board pattern (Bottom view)

Tolerance: ±0.1 ±.004

#### **SAFETY STANDARDS**

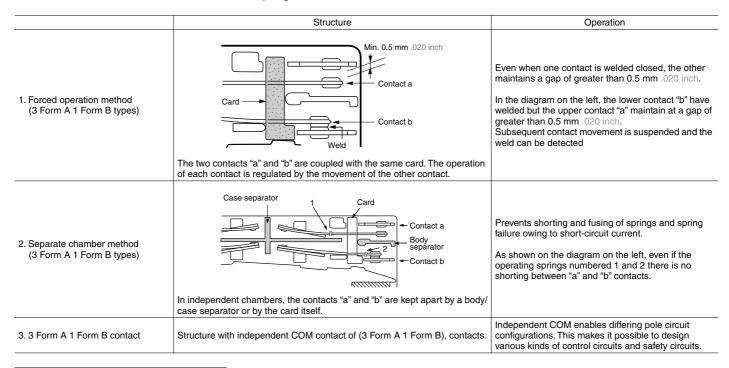

UL/C-UL (Recognized)		TÜV (C	Certified)	SEV	
File No.	Contact rating	File No.	Rating	File No.	Contact rating
E120782	6A 250V AC	968/EZ 312.01/09	6A 250V AC	12.0193	6A 250V AC

<sup>\*</sup> CSA standard: certified by C-UL

#### SAFETY STRUCTURE OF SF RELAYS

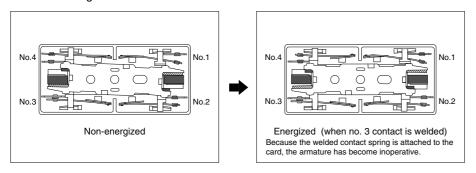

This SF relay design ensures that subsequent operations shut down and can automatically return to a safe state when the SF relay suffers overloading and other circuit abnormalities

(unforeseen externally caused circuit or device breakdowns, end of life incidents, and noise, surge, and environmental influences) owing to contact welding, spring fusion or, in the worst-case scenario, relay breakdown (coil rupture, faulty operation, faulty return, and fatigue and breakage of the operating spring and return spring), and even in the event of end of life.

Form "b" Contact Weld

If the form "b" contact (No. 3) welds, the armature becomes non-operational, the contact gaps at the three form "a" contacts are maintained at greater than 0.5 mm .020 inch. Reliable isolation is thus ensured.

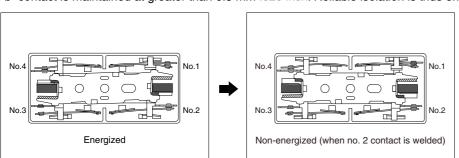

#### If the No. 3 contact welds.

Each of the three form "a" contacts (No. 1, 2, and 4) maintain a gap of greater than 0.5 mm .020 inch.

#### Form "a" Contact Weld

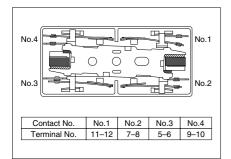

When the form "a" contacts (No. 1, 2, or 4) weld, the armature remains in a non-returned state and the contact gap at the single form "b" contact is maintained at greater than 0.5 mm .020 inch. Reliable isolation is thus ensured.

#### If the No. 2 contact welds.

The single form "b" contact (No. 3) maintains a gap of greater than 0.5 mm .020 inch.

#### **Contact Operation Table**

The table below shows the state of the other contacts when the current through the welded form "a" contact is 0 V and the rated voltage is applied through the form "b" contact.

		State of other contacts				
		1	2	3	4	
Welded terminal No.	1			>0.5		
	2			>0.5		
	3	>0.5	>0.5		>0.5	
	4			>0.5		

>0.5: contact gap is kept at min. 0.5 mm .020 inch Empty cells: either closed or open

#### **NOTES**

1. For cautions for use, please read "General Application Guidelines".

-4-

<sup>\*</sup> Contact gaps are shown at the initial state.

If the contacts change state owing to loading/breaking it is necessary to check the actual loading.
