

Photomicrosensor (Reflective)

EE-SY1201

Built-in lens achieves 3 mm focal length
Small surface mounting type reflection sensor

- PCB surface mounting type.

 Be sure to read *Safety Precautions* on page 3.

Model Number Structure

EE-S **Y** **1** **201**

Ordering Information

Photomicrosensor

Appearance	Sensing method	Connecting method	Sensing distance	Output type	Model	Minimum packing unit (Unit: pcs)
	Reflective	SMT	3.0 mm	Phototransistor	EE-SY1201	1,000

Note: Order in multiples of minimum packing unit.

Ratings, Characteristics and Exterior Specifications

Absolute Maximum Ratings (Ta = 25°C)

Item	Symbol	Rated value	Unit
Emitter			
Forward current	I _F	50 *1	mA
Reverse voltage	V _R	6	V
Detector			
Collector-emitter voltage	V _{CEO}	35	V
Emitter-collector voltage	V _{ECO}	6	V
Collector current	I _C	20	mA
Collector dissipation	P _C	75 *1	mW
Total allowable loss	P _{tot}	100 *1	mW
Operating temperature	T _{opr}	-25 to 85	°C
Storage temperature	T _{stg}	-40 to 100	°C
Reflow soldering temperature	T _{sol}	260 *2	°C

*1. Refer to the temperature rating chart if the ambient temperature exceeds 25°C.

*2. Complete soldering within 5 seconds.
 For reflow soldering, use the conditions given on page 5.

Exterior Specifications

Connecting method	Weight (g)	Material
SMT	0.025	Case: Epoxy resin Sealing resin: Epoxy resin

Electrical and Optical Characteristics (Ta = 25°C)

Item	Sym bol	Value			Unit	Condition
		MIN.	TYP.	MAX.		
Emitter						
Forward current	V _F	---	1.2	1.4	V	I _F = 20 mA
Reverse voltage	I _R	---	---	10	μA	V _R = 6 V
Peak emission wavelength	λ _P	---	950	---	nm	---
Detector						
Light current	I _L	60	---	410	μA	I _F = 4 mA, V _{CE} = 2 V, Aluminum-deposited
Dark current	I _D	---	1	100	nA	V _{CE} = 20 V, 0 lx
Leakage current	I _{LEAK}	---	---	700	nA	I _F = 4 mA, V _{CE} = 2 V, with no reflection
Collector-emitter saturated voltage	V _{CE(sat)}	---	---	---	V	---
Peak spectral sensitivity wavelength	λ _P	---	930	---	nm	---
Rising time	t _r	---	20	100	μs	V _{CC} = 2 V, R _L = 1 kΩ, I _L = 100 μA, d = 4 mm *
Falling time	t _f	---	20	100	μs	V _{CC} = 2 V, R _L = 1 kΩ, I _L = 100 μA, d = 4 mm *

* Refer to Fig 12. Light Current Measurement Setup Diagram on page 2.

Safety Precautions

To ensure safe operation, be sure to read and follow the Instruction Manual provided with the Sensor.

CAUTION

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Precautions for Safe Use

Do not use the product with a voltage or current that exceeds the rated range.

Applying a voltage or current that is higher than the rated range may result in explosion or fire.

Do not miswire such as the polarity of the power supply voltage.

Otherwise the product may be damaged or it may burn.

This product does not resist water. Do not use the product in places where water or oil may be sprayed onto the product.

Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings. This product is for surface mounting. Refer to “Soldering Information, Storage and Baking” for details.

Dispose of this product as industrial waste.

Dimensions and Internal Circuit

CAD Data marked products, 2D drawings and 3D CAD models are available. For CAD information, please visit our website, which is noted on the last page.

(Unit: mm)

Photomicrosensor

EE-SY1201

CAD Data

Terminal No.	Name
A	Anode
K	Cathode
C	Collector
E	Emitter

Recommended Soldering Pattern

Note: The shaded portion in the above figure may cause shorting. Do not wire in this portion.

Internal circuit

Unless otherwise specified, the dimensional tolerance is ± 0.3 mm.

Tape and Reel

Reel (Unit: mm) *

Tape (Unit: mm)

Part Mounting

The devices are oriented in the rectangular holes in the carrier tape so that the edge with the receiver faces the round feeding holes.

Packing Specifications

- One reel is sealed in an aluminum-laminated bag.
- The model number, lot number, and quantity are given on the label.

Soldering Information

Reflow soldering: Temperature profile

The reflow soldering must be completed at one time and must comply with the following diagram.

Solder Quantity

The pin's wiring pattern between the package and the board must not be soldered. Doing so would result in damage to the product's reliability. Make sure to adjust the solder quantity to the product sidewall of the terminal.

Other Notes

- The use of an infrared lamp causes the temperature of the resin to rise partially too high.
- Do not immerse the resin part into the solder.
- Test the soldering method under actual conditions and make sure the soldering works fine, since the impact on the junction between the device and PCB varies depending on the cooling and soldering conditions.

Storage

Storage conditions

Store the product under the following conditions:

Temperature: 5 to 30 °C

Humidity: 70% max.

Treatment after open

1. After opening the bag, store the products between 5 and 25°C at 60% humidity or lower and mount them within two days.
2. If storage for longer than two days after opening the bag is required, use a dry box or reseal the products in a moisture-proof bag with a commercially available desiccant. Store them between 5 and 30°C at 70% humidity or lower, and mount them within two weeks.

Baking

If the above treatment could not be carried out, mounting is still possible after baking treatment.

However, baking treatment must be limited to only one time.

Recommended conditions: 125°C, 16 to 24 hours

Note: Do not bake the products while they are still in the bag.

Temporarily mount them to the PCB or place them in metal trays.

Cleaning Conditions

Cleaning in Solvent:

Solvent temperature: 45°C max.

Immersion time: 3 minutes max.

Ultrasonic Cleaning:

Do not use ultrasonic cleaning.

Recommended Solvents:

Ethyl alcohol, methyl alcohol, or isopropyl alcohol

Please check each region's Terms & Conditions by region website.
