AC-DC Front End Power Supply

PRODUCT OVERVIEW

The D1U-W-1600 is a 1600 Watt, power-factor-corrected (PFC) front-end power supply for hot-swapping redundant systems. The main output is 48V and standby output of either 12V, 5V or 3.3V. Packaged in 1U low profile, it is designed to deliver reliable bulk power to servers, workstations, storage systems or any 48V distributed power architecture systems requiring high power density. The highly efficient electrical and thermal design with internal cooling fans supports reliable operation conditions. The D1U-W-1600 is designed to auto-recover from over-temperature faults. Status information is provided with front panel LEDs, logic signals and I²C management interface. Three units can be packaged into a 19" 1U power shelf to provide up to 4.8kW of power.
