

## PS/2 Server Interface Module for NetDirector Matrix KVM Switches

MODEL NUMBER: **B054-001-PS2**

### Description

Tripp Lite's PS/2 Server Interface Module connects to the PS/2 ports on a Server, and converts them to a single RJ45 connector. Ordinary Cat5e patch cables can then be used to connect the server to the switch ports on the Tripp Lite B060 and B064-Series NetDirector Matrix KVM switch. Use of Cat5e cables frees up space in the server cabinet that would be filled by traditional, thicker KVM cables.

### Features

- Eliminates the need for thicker, heavier KVM cables
- Compact, lightweight design
- Plug and Play; no software required
- No power supply required
- Allows a Server/CPU to be located up to 500ft away from the KVM switch
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

## Specifications

| OVERVIEW                        |                        |
|---------------------------------|------------------------|
| UPC Code                        | 037332122957           |
