# MTi-1

- **Smallest form factor on the market**
- **Easy integration**
- **Development Kit available**

The MTi-1 is the smallest industrial grade self-contained Inertial Measurement Unit (IMU) available on the market. The Xsens optimized strapdown algorithm (AttitudeEngine™) performs high-speed dead-reckoning calculations at 1 kHz, accurately capturing high-frequency motions. The MTi-1 is a cost-effective module for a wide range of (embedded) applications. It relieves you of the work of designing, integrating and maintaining gyroscopes, accelerometers and other sensors.

The MTi-1 is part of the MTi 1-series supported by the MT Software Suite, which includes MT Manager (GUI for Windows/Linux), SDK, example codes and drivers for many platforms.
