

Slice Craft Knife with Ceramic Blade

PRODUCT ID: 4306

Cut through materials *like a boss* with the elegant Slice Craft Knife, a safer cutter with a ceramic blade. This ergonomic craft knife is way better than using scissors or a box cutter, and it's *a lot* harder to cut yourself by accident than metal blades (please don't *try* to cut yourself, you will eventually succeed!)

This is the perfect tool for arts 'n' crafting enthusiasts! Ever get annoyed when the blade gets stuck to tape or adhesive? The straight-edge rounded tip blade makes it ideal for clean, one-swipe cuts. We especially dig the smart locking design of the handle and the safety cap, so you'll never lose the latter!

Features:

- Handle type: fixed position
- Comfortable cross-hatch grip
- Durable nylon handle
- Finger-friendly edge stays sharp 11x longer
- Fewer blade changes = fewer injuries
- Ambidextrous design
- No-tool blade change
- Chemically inert blade never rusts
- Safety cap

Note: Slice Craft Knife is compatible only with Slice blades 10518, 10519, 10520, 10532, 10534, 10535, 10536
