Implementation · Mounting Method

Mounting method

■The unit can be mounted in any direction. When two or more power supplies are used side by side, position them with proper intervals to allow enough air ventilation. The temperature around each power supply should not exceed the temperature range shown in “Derating”.

Automatic Mounting

■To mount BRFS/BRDS series automatically, use the coil area near the center of the PCB as an adsorption point. Please see the External View for details of the adsorption point.

Soldering

- Right figure shows condition for reflow of BRFS/BRDS series. Please make sure that the temperature of pin shown in (a),(b) and(c) do not exceed the temperatures shown in right figure .
- While soldering, having vibration or impact on the unit should be avoided, because of solder melting.
- Please do not do the implementation except the reflow.
- Because some parts drops , please do not do reflow of the back side.
