Blackbird

Embedded Processing Unit

Overview

The Blackbird is a compact, rugged x86 type board-level embedded computer. It has been engineered and tested to meet the military and medical industries' evolving requirements to develop smaller, lighter, and lower power embedded systems while adhering to stringent regulatory standards. The Blackbird is a member of the VersaLogic family of ultra-rugged EPU embedded computers. Using fully integrated COM components, the Blackbird is supplied fully assembled and tested, including heat plate, ready to install in a system. In addition to providing a very compact footprint, it is designed to withstand extreme temperature, impact, and vibration.

The Skylake processor options feature quad- and dual-core CPUs along with Hyper-Threading logic allowing up to 8 simultaneous threads to be executed. The Blackbird provides great performance and I/O features, moderate power consumption (15 to 22 W typical depending on model), and a compact package. The Blackbird provides compatibility with a broad range of standard x86 application development tools for reduced development time.

The on-board Power Management Unit greatly simplifies system power supply requirements. It features a wide input voltage range of 8 to 30 volts so it is fully compatible with 12 or 24V vehicle applications. It also includes reverse voltage protection,

Highlights

- -40° to +85°C operating temperature models
- Trusted Platform Module (TPM) security chip
- Shock & vibration per MIL-STD-202G
- 6th Generation Intel® Core™ "Skylake" processor
 - i7-6822EQ (quad core) or
 - i5-6442EQ (quad core) or
- i5-6300U (dual core) or
- i3-6100U (dual core)
- On-board Power Management
 - 8 to 30 volt DC input (12 and 24 volt system compatible
 - Over- and reverse-voltage protection
 - RF noise filtering
- Transient voltage protection

- A complete x86 embedded computer
- COM Basic size: (95 x 125 x 37 mm)
- Up to 32 GB DDR4 RAM
- Two Gigabit Ethernet
- Two mini DisplayPort and LVDS video outputs
- Three Mini PCle Sockets
- Two USB 3.0 port, four USB 2.0 ports
- Serial I/O ports, SATA, Digital I/O
- Analog Inputs (8 chan.)
- Analog Outputs (4 chan.)
- HD Audio
- Customization available
- VersaAPI software support

Overview ...continued

over voltage protection, RF noise filtering, and transient voltage protection, to provide enhanced durability and reliability in the field.

Designed and tested for industrial temperature (-40° to +85°C) operation, the rugged Blackbird also meets MIL-STD-202G specifications for shock and vibration. Latching SATA,

Ethernet, power, and main I/O connectors provide additional ruggedization for use in harsh environments.

Blackbird is compatible with a variety of popular x86 operating systems including Windows, Windows Embedded, Linux, and VxWorks.

COTs modifications are available, even in low OEM quantities. Modifications include conformal coating, BIOS / splash screen configuration, application specific testing, BOM revision locks, custom labeling, etc.

Features

1 On-board Power Management

Accepts 8 to 30 volts DC, and provides OVP, reverse polarity protection, RF noise filtering, and transient voltage suppression.

2 High-performance Video

Integrated Intel HD Graphics Gen 9 core supports DirectX 12, OpenGL 4.4, and H.264, MPEG-2 encoding/decoding. Two Mini DisplayPorts (2a) and a dual-channel LVDS video output (2b on back side). LVDS backlight control (2c).

3 Network

Two Gigabit Ethernet (GbE) ports. One port with remote boot support.

4 SATA

Two 6 Gb/s SATA ports support bootable SATA hard drives.

Mini PCle Card Sockets

Two full- and one half-sized sockets. Supports Wi-Fi modems, GPS, MIL-STD-1553, Ethernet, flash data storage with auto-detect mSATA flash storage support, and other mini PCIe modules.

6 Industrial I/O

Two USB 3.0 ports (6a) and four USB 2.0 ports (6b) support keyboard, mouse, and other devices.

Four RS-232/422/485 serial ports (6c on back side), three 8254 timer/counters, I2C support, and audio output (6d on back side).

7 Analog + Digital I/O

On-board data acquisition support. Eight multi-range analog inputs, four analog outputs (7a), and twenty four 3.3V digital I/O lines (7b).

8 SPI Interface

Supports SPI and SPX devices, including low cost analog and digital modules.

Trusted Platform Module

On-board TPM security chip can lock out unauthorized hardware and software.

Intel Core "Skylake" Processor (not shown)

Up to 2.6 GHz clock rate. Quad- and dual-core options.

RAM (not shown)

Up to 32 GB DDR4 RAM.

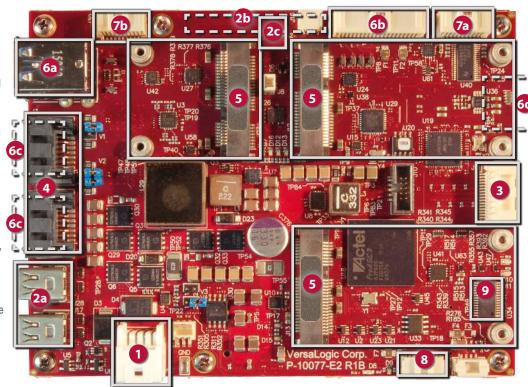

Industrial Temperature Operation
-40° to +85°C operation for harsh environments.

MIL-STD-202G

Qualified for high shock/vibration environments.

Software Support

Compatible with a variety of popular x86 operating systems including Windows, Windows Embedded, Linux, and VxWorks.

Tailor Blackbird to Your Exact Requirements

COTS modifications are available in quantities as low as 100 pieces.

- Conformal Coating
- Custom Cabling
- Connector & I/O Changes
- Custom Testing
- Custom Labeling
- BIOS Modifications
- Software and Drivers
- Environmental Screening
- Revision Locks
- Application-Specific Testing
- And more –

Specifications

General								
Board Size	95 x 125 x 37	mm (3.74	x 4.9	92 x 1.4	5")			
Weight	378 grams (13.33 oz.)							
Processor	Intel 6th Gen Core platform. 8 MB SmartCache. Intel 64-bit instructions, Hyper-Threading, Virtualization Technology (VT), SpeedStep Technology, and AES New Instructions.							
Battery	Connection for 3.0V RTC backup battery							
Power Requirements	Model Idle Typical Max.					Мах.		
(@ +12V) †	VL-EPU-4462-xAP-08 7.7W			.7W	15.3W		23.0W

† Represents operation at +25°C and +12V supply running Windows 10 with LVDS display, SAIA,
GbE, COM, and USB keyboard/mouse. Typical power computed as the mean value of Idle and
Maximum power specifications. Maximum power measured with 95% CPU utilization.

- ◊ Derate -1.1°C per 305m (1,000 ft.) above 2,300m (7,500 ft.)
- * Extended altitude specifications available upon request
- ‡ TVS protected port (enhanced ESD protection)
- § Power pins on this port are overload protected
- ¥ Bootable storage device capability

Memory				
System RAM	Up to 32 GB DDR4 SDRAM.			
Video				
General	Integrated high-performance video. Intel HD 520 and 530 - Gen-9 compute architecture, 24 execution units, and GPU Turbo Boost. Supports 3 independent displays. Supports DirectX 12, OpenGL 4.4, OpenCL 2.0.			
Hardware Based Acceleration	Decode and Encode of JPEG, MJPEG, MPEG2, AVC, MVC, HEVC 8-bit, VC-1, VP8, VP9			
DisplayPort Interface §	Two Mini DisplayPort++ outputs. 24-bit. Up to 4096 x 2160 at 60 Hz.			
OEM Flat Panel Interface	Dual-channel LVDS interface. 18/24-bit. Up to 1920 x 1200. Backlight control signals.			
Mass Storage				
Rotating Drive ¥	Two SATA 6 Gb/s ports.	Latching SATA connectors.		
Flash / SSD ¥	Mini PCIe socket with m	SATA support		
Network Interface				
Ethernet ‡	Two AutoDetect 10BaseT/100BaseTX/1000BaseT ports. Latching connector. One port with network boot option.			
Device I/O				
USB ‡§	Two USB 3.0 / 2.0 ports and four USB 2.0 host ports			
COM Interface ‡	Four RS-232/422/485 selectable. 16C550 compatible. 1 Mbps max.			
Digital I/O	Twenty four TTL I/O Lines 3.3V. Independently configurable.			
Analog Input	Eight channels. 12-bit. Single-ended. 500 Ksps. Independently configurable +/- 0.64V to +/- 10.24V high input impedance inputs			
Analog Output	Four channels. 12-bit si	ngle-ended. 100 Ksps.		
I2C	Single I2C interface			
Counter / Timers	Three 8254 compatible Programmable Interval Timers (PITs).			
Audio Input / Output	Connector	Signal Characteristics		
	Line Input - Latching	10 kΩ minimum		
	Line Output - Latching	600 Ω (to drive a 10 k Ω load)		
VersaLogic SPI Interface	Supports SPI and SPX devices. Supports up to two SPX modules.			
Mini PCIe Card Socket				
Full size Socket #1	Supports Wi-Fi modems, GPS receivers, MIL-STD-1553, Ethernet channels, non-volatile flash data storage, and other plug-in modules. USB, SATA, and PCle signaling. Autodetect mSATA support.			
Full size Socket #2	PCIe and USB 2.0 signaling			
Half size Socket #3	PCIe and USB 2.0 signaling			
Software				
BIOS	AMI Aptio UEFI BIOS with OEM enhancements. Field reprogrammable			
Sleep Mode	ACPI 3.0. Support for S3 suspend and S4 hibernate states.			
Operating Systems	Compatible with most x86 operating systems including Windows, Windows Embedded, Linux, and VxWorks			

¬ MIL-STD-202G shock and vibe levels are used to illustrate the extreme ruggedness of this
product in general. Testing at higher levels and/or different types of shock or vibration methods can
be accommodated per the specific requirements of the application. Contact VersaLogic Sales for
further information.

VL-SPX-1	Analog Input Module 8-Channels	SPX				
VL-SPX-2	Digital I/O Module 16-lines	SPX				
VL-SPX-4	Analog Output Module 4-channels 12-bit	SPX				
VL-SPX-5	Solid State Switch Module 8-channel	SPX				
GPS						
VL-MPEu-G2E	GPS receiver	Mini PCIe				
Video						
VL-MPEe-V5E	VGA and LVDS Interface	Mini PCIe				
Solid-State Storage (flash memory)						
VL-MPEs-F1Exx	mSATA module (4/16/32 GB)	Mini PCIe				
Adapters						
VL-MPEs-S3E	SATA adapter	Mini PCle				

Take the Risk out of Embedded Computing

Whether it's selecting the optimum solution for your application, lending expertise during development, or on-time delivery of defect-free products, VersaLogic is here to make sure your project goes smoothly from initial concept through the extended life of your program. Contact us today to learn more.
