#### Usage Instructions

De-energize equipment. Make sure opening of spray head is pointing toward surface to be cleaned. Hold can 6-8 inches away. Direct spray to saturate soiled surface. A **TechBrush™** (2000 Series) may be utilized to help in the removal of heavy soils. When used as a general cleaner, start at top of area to be cleaned using a sweeping motion, and spray the area slowly, working towards the bottom. To clean in hard to reach areas, insert extension tube in spray head to direct spray. Allow components to dry completely before applying current. Allow liquid to dry before supplying power. For flat surface cleaning, saturate a lint-free **TechClean®** maintenance wipe (2364-50 or 2365-300) and wipe surface with cloth. Rotate the cleaning side of the wipe periodically and re-saturate. **This product is not recommended for acrylic, PVCr, polystyrene, or polycarbonate materials (materials used in such items as television cabinets and tape recorders). If there is any doubt as to the material construction, test on hidden surface before general use.**
