DESCRIPTION

The PL586-05/-08 is a non-multiplier VCXO IC specifically designed to pull fundamental mode crystals from 130MHz to 200MHz. This IC achieves a typical pull range of ± 140 ppm with 5% linearity. The phase noise performance, with <100fs phase jitter, makes this an ideal solution for all high end clocking applications such as SONET, WiMax, CPRI, OBSAI, Fiber Channel, and any application where performance and quality are required.
