

2542 Standard S3003 Servo

www.kitronik.co.uk

Dimension Datasheet

This S3003 Standard Servo is designed for use in remote controlled cars & boats, but can also be used in other applications and can be driven by a PICAXE chip or other microcontroller system. It is very similar in design, weight and operation to the Futaba S3003 Servo and can be used as a direct lower cost alternative. All measurements are shown in millimetres.
