High Performance Miniature Circular Connectors

HR12 Series

IFeatures

- ·Snap lock allows for easy insertion and extraction and prevents the accidental un-mating of the connector due to vibration or impact.
- •The plug diameter range from ϕ 12mm to ϕ 16mm, and satisfies the need for small-size, light-weight and high-density electronic components.
- ·Equipped with internal metal parts and a shielding mechanism, the HR12 (20-contacts) and HR212 feature enhanced protection against EMI.

■Product Specifications

Ratings Rated voltage Rat	Rated current	Operating temperature range	Storage temperature range	
	100V AC, 140V DC	1A	-15°C to +60°C	-10°C to +60°C

Items	Specifications	Conditions
1. Contact resistance	$30m\Omega$ max. (excluding the cable conductor resistance)	Measured at DC 1mA
2. Insulation resistance	100MΩ min.	Measured at DC 250V
3. Withstanding voltage	No flashover or dielectric breakdown.	AC 300V for 1 minute
4. Vibration resistance	No electrical discontinuity for $10\mu s$ or greater.	10 to 55Hz/cycle, amplitude : 0.75mm, 3 axis directions, 2 hours each
5. Shock resistance	No electrical discontinuity for $10\mu s$ or greater.	Acceleration: 490m/s², duration: 11ms, 3 axis directions, 3 cycles each
6. Mating Cycles	$30m\Omega$ max. of contact resistance (excluding the cable conductor resistance)	1,000 times
7. Temperature cycle	Insulation resistance : a minimum of 100MΩ	-25°C: 30 minutes → Normal temperature: 10 to 15 minutes → 70 °C: 30 minutes → Normal temperature: 10 to 15 minutes, left for 5 cycles
8. Moisture resistance Insulation resistance : $1M\Omega$ min. (at high humidity) $10M\Omega$ min. (when dry)		Temperature : 40° C, relative humidity : 90 to 95%, left for 96 hours

■Material / Finish

Part	Material	Finish
Insulator	Soft vinylchloride (UL94-0) and Polypropylene (UL94V-0) PBT resin (UL94V-0) and Polycarbonate (UL94V-1)	
	Brass, and Zinc alloy	Tin plated and Nickel plated
Contacts	Copper alloy or phosphor bronze	Tin plated or selective gold plated
Contacts	Copper alloy of priosprior bronze	and silver plated

■Product Number Structure

●Cable Plug

 $\frac{\mathsf{HR}12}{\mathsf{A}} \stackrel{\mathsf{A}}{=} \frac{\mathsf{A}}{\mathsf{A}} = \frac{\mathsf{A}}{\mathsf{A}} \stackrel{\mathsf{A}}{=} \frac{\mathsf{A}}{\mathsf{A}} \stackrel{\mathsf{B}}{=} \frac{\mathsf{P}}{\mathsf{A}} \stackrel{\mathsf{C}}{=} \frac{\mathsf{A}}{\mathsf{A}} \stackrel{\mathsf{300}}{=} \frac{\mathsf{A}}{\mathsf{A}} \stackrel{(**)}{=} \frac{\mathsf{A}}{\mathsf{A}}$

Plug (Assembly type) and Receptacle

 $\frac{\mathsf{HR}12}{\bullet} - \frac{10}{\bullet} \frac{\mathsf{R}}{\bullet} \frac{\mathsf{C}}{\bullet} - \frac{8}{\bullet} \frac{\mathsf{SDL}}{\bullet} \frac{(**)}{\bullet}$

Attachment

 $\frac{HR12}{0} - \frac{10}{0} \frac{R}{0} - \frac{SP}{0} \frac{(**)}{0}$

Model : Series name.

HR212 is a enhanced shielding type.

2 Indication of terminal connector provided or not:

For models with connectors on both sides, different signs are used depending on the type of connector on one side.

Shell size :

Indicates the outside diameter of the plug mating part.

4 Connector form :

P: Straight plug

LP or L : Right angle

R: Receptacle

- **6** Cable removal directions for a right angle plug are classified as follows:
 - A: The cable removal direction is on the right with the guide facing upward viewed from the mating part.
 - B: The cable removal direction is on the left with the guide facing upward viewed from the mating part.
- **6**Types of connector:

A connector with two or more varieties is classified by A, B, C,......

- Number of contacts
- 8 Contact form :

Classifies the type of contacts as follows: The plug has only male contacts, and the receptacle has only female contacts.

PC: Crimp male contact (assembly type plug) P : Male contact

SC : Crimp female contact SD : Straight dip female contact SDL : Right angle dip female contact

Shape of cable :

C : Curled cord S: Straight cord

Type of cable :

Cables connected to the plug are identified by A, B, C,..... when they are different in construction and number of cores.

Cable length :

indicates the length in mm of the cable connected to the plug.

Curled cord length: Length of curled part

Straight cable length: Cable length

Shape of cable end:

Plugs with cables of the same shape but different in cable end dimensions and finishing are identified by A, B, C,.....

Types of accessories :

SP: Stopper plate

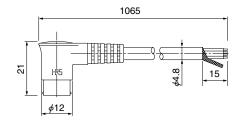

1Other specifications:

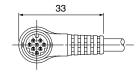

A two-digit character is added to indicate other specifications as needed.

HR12 Type

■Right Angle Plug

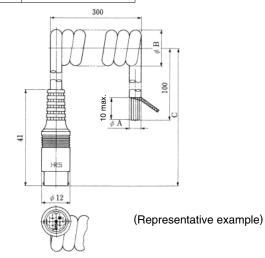

Part No.	HRS No.	No. of contacts	No. of conductors of cable	Remarks
HR12-10LA8PS1065(71)	112-3040-0 71	8	8-conductor (Shielded)	Straight cord Terminal tin plated

■Straight Plug

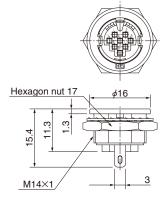

Part No.	HRS No.	No. of contacts	φA	φB	С	No. of conductors of cable	Remarks				
HR12-10P5PCD300(71)	112-0101-6 71	5	4.8	15	700	5-conductor (Shielded)	Curled cord				
HR12-10P8PC300(71)	112-0102-9 71	8	4.0	15 720		13	15 /20	720	15 720	8-conductor (Shielded)	Terminal tin plated

■Receptacle (Crimp Type)

Part No.	HRS No.	No. of contacts
HR12-10R-5SC(71)	112-0501-4 71	5
HR12-10R-8SC(71)	112-0504-2 71	8

Remarks: For the mounting holes, see page 4.

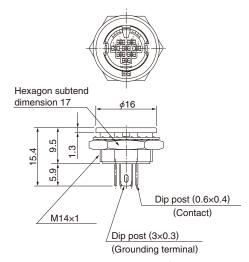

(Representative example)

■ Receptacle (Straight Dip Type)

Part No.	HRS No.	No. of contacts	Remarks
HR12-10R-5SD(71)	112-0502-7 71	5	Terminal
HR12-10R-8SD(71)	112-0505-5 71	8	tin plated

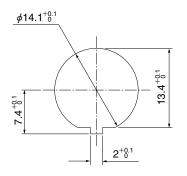

Remarks : Refer to following diagram for panel mounting dimensions and dip post arrangement dimensions.

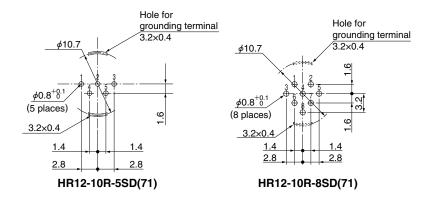

(Representative example)

◆Panel mounting dimensions

(Panel thickness 1 to 4.7)

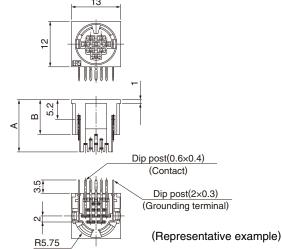

● Receptacle Dip Post

Remarks : Dimensional tolerance of ± 0.05 mm is recommended for the board arrangement.

■ Receptacle (Right Angle Dip)

(Note)

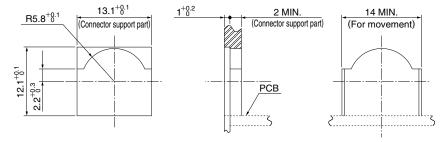

This product should be mounted on the panel to hold with the interface portion,as shown in the panel mounting hole dimension diagram.

When it is difficult to press the connector into the panel, we recommend using the attached stopper plate HR12-10R-SP(71) (112-0507-0 71) as described on page 7.

	Part No.	HRS No.	No. of contacts	Α	В	Remarks
	HR12-10R-5SDL(71)	112-0503-0 71	5	13	10.5	Tarminal tip plated
1	HR12-10R-8SDL(71)	112-0506-8 71				Terminal tin plated
	HR12-10RC-8SDL(71)	112-0514-6 71	8	13.8	9.3	Equipped with stopper plate
	TITTE TOTIO OSDE(71)	112 0314 071				Terminal tin plated

Remarks: For dip post arrangement see below figure.

●Panel mounting dimensions

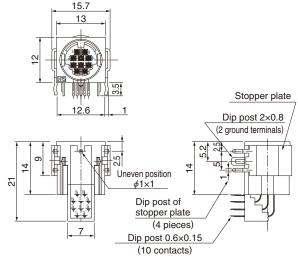

Note: Pay attention that this dimension is not available for 10 contacts.

Remarks : Dimensional tolerance of $\pm\,0.05$ mm is recommended for the board arrangement.

■ Receptacle (Right Angle Dip)

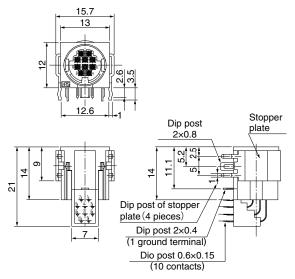

Part No.	HRS No.	No. of contacts	Remarks
HR12-10RC-10SDL(73)	112-0511-8 73	10	Color: Black Stopper plate Terminal gold plated

Remarks: For dip post arrangement see below figure.

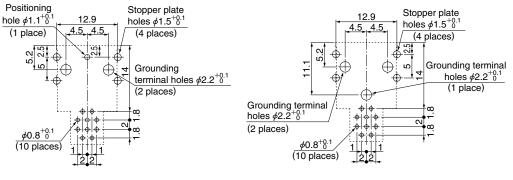

HR12-10RD-10SDL(71)

Part No.	HRS No.	No. of contacts	Remarks
HR12-10RD-10SDL(71)	112-0512-0 71	10	Color: Black Stopper plate Terminal gold plated

Remarks: For dip post arrangement see below figure.

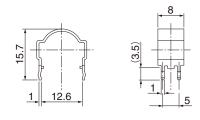

HR12-10RC-10SDL(73)

Remarks: Dimensional tolerance of ± 0.05 mm is recommended for the board arrangement.

■Stopper Plate

Part No.	HRS No.	Applicable connector	Applicable PCB thickness
HR12-10R-SP(71)	112-0507-0 71	HR12-10R-*SDL	t : 1 to 2

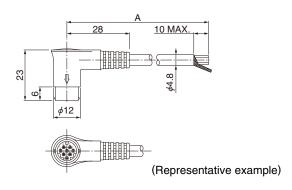

Remarks : 1. The *mark shows the number of pins.

2. For dip post arrangement, see page 5.

HR12 Type (20 contacts) /HR212 Type

■Right Angle Plug (With straight)

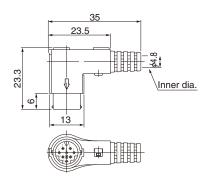

Part No.	HRS No.	No. of contacts	Α	No. of conductors of cable	Remarks
HR212-10LA8PSAT1028(72)	112-2120-1 72	0	1028	8-conductor (Shielded)	Color: Black
HR212-10LA8PSAT3028(72)	112-2121-4 72	0	3028	6-conductor (Silielded)	Terminal: Selective gold plated

Remarks : Cable can be taken-out only in direction A.

■Right Angle Plug (Assembly Type)

Solder Type

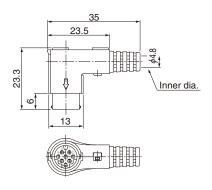

Part No.	HRS No.	No. of contacts	Remarks
HR212-10LP-8P(73)	112-4002-6 73	0	Color : Black Terminal : Selective gold plated
HR212-10LP-8P(74)	112-4002-6 74	8	Color : Sand beige Terminal : Selective gold plated

Remarks: Cable can be taken-out only in direction A.

Note: Because the cable clamping and rotational forces may vary with different cable types, it is recommended to verify the suitability of the cable assembly before use or production.

Crimp Type

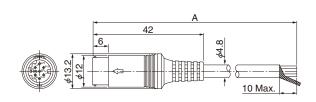

Part No.	HRS No.	No. of contacts	Remarks
HR212-10LP-8PC(71)	112-4101-8 71	8	Color : Black

Remarks: Cable can be taken-out only in direction A.

Note: Because the cable clamping and rotational forces may vary with different cable types, it is recommended to verify the suitability of the cable assembly before use or production.

■Straight Plug (With straight cable)

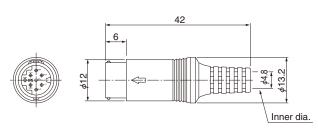

(Representative example)

● Cable Connecting Procedures

Works Process

Use cables of finished die. 4.8mm and nominal conductor cross section of 0.128mm* (AWG#26) and under. (Inner die. of solder pot of soldering terminal is 90.7mm.) Install hood over cable. Figure of straight type is omitted. Install hood over cable. Figure of straight type is omitted. Resemble bushing over cable as shown in Fig.1. Install hood over cable. Figure of straight type is omitted. Install hood over cable. Figure of straight type is omitted. Resemble bushing over cable as shown in Fig.1. Make cable end treatment to the dimensions shown in Fig.1. For shield cable, an example of cable end treatment is given below. (1) Firmly wrap the cable sheath end with copper tape 6mm wide, 16mm long and 85µm thick (overall thickness including adhesive). (2) Bundle up the shield cables, and tight twist. (West at least three tume over 6mm in length from the cable sheath tip). (3) Cut the shield cables as t6 *,mm from the cable sheath tip, and fold back as shown in Fig.1. (Soldering Type) Solder cables to mold block into which terminals are assembled. (Crimping Type) Use applicable tool (HR12-SC-TC or CM-105) to crimp connect cables to applicable crimping terminals, then insert crimped terminals into mold and fix them to complete the mold block. Assemble mold block having cables connected to location P shell A as shown in Fig.1. Carefully note that mold block and P shell A have directional polarization. Assemble bundled shield cables so that they are positioned at the center (C section) of cable outlet of P shell A as shown in Fig.1. Install P shell B over P shell A as shown in Fig.2 and avoid catching of internal cables. Use the M2 self-tapping screws supplied (shape of screw head is phillip in 0 for precision machinery) to secure from the direction of P shell and bushing into the casing as shown in Fig.2. Why grove of hood and protruding portion of P shell and bushing into the casing as shown in Fig.2. Why grove of hood and protruding portion of P shell all aligned, install hood over P shell as shown	J 1701 N	Right-angle Plug	Straight Plug

Cable Fig.4 Install casing over P shell as shown in Fig.4. Cable Fig.4		, -				
Solder cables to mold block into which terminals are assembled. (Crimping Type) Use applicable tool (HR12-SC-TC or CM-105) to crimp connect cables to applicable crimping terminals, then insert crimped terminals into mold and fix them to complete the mold block. Assemble mold block having cables connected to location P shell A as shown in Fig.1. Carefully note that mold block and P shell A have directional polarization. Assemble bundled shield cables so that they are positioned at the center (C section) of cable outlet of P shell A as shown in Fig.1. Install P shell B over P shell A as shown in Fig.2 and avoid catching of internal cables. Use the M2 self-tapping screws supplied (shape of screw head is phillip #0 for precision machinery) to secure from the direction of P shell B (2 places). Move bushing to the end face of P shell, and put P shell and bushing into the casing as shown in Fig.2. Move bushing to the end face of P shell, and put P shell aligned, install hood over P shell as shown in Fig.3. Hood Cable Fig.4 Install casing over P shell as shown in Fig.4. Cable Fig.4 Fig.3		given below. (1) Firmly wrap the cable sheath end with copper tape 6 including adhesive). (2) Bundle up the shield cables, and tight twist. (Twist at lea	Smm wide, 16mm long and 85μ m thick (overall thickness ast three turns over 6mm in length from the cable sheath tip)			
Assemble mold block having cables connected to location P shell A as shown in Fig.1. Carefully note that mold block and P shell A have directional polarization. Assemble bundled shield cables so that they are positioned at the center (C section) of cable outlet of P shell A as shown in Fig.1. Install P shell B over P shell A as shown in Fig.2 and avoid catching of internal cables. Use the M2 self-tapping screws supplied (shape of screw head is phillip #0 for precision machinery) to secure from the direction of P shell B (2 places). Move bushing to the end face of P shell, and put P shell and bushing into the casing as shown in Fig.2. Move bushing to the end face of P shell, and put P shell aligned, install hood over P shell as shown in Fig.3. Install casing over P shell as shown in Fig.4. Cable Fig.4. Fig.4. Fig.3.	4	Solder cables to mold block into which terminals are assembled. (Crimping Type) Use applicable tool (HR12-SC-TC or CM-105) to crimp connect cables to applicable crimping terminals, then insert				
shown in Fig.1. Install P shell B over P shell A as shown in Fig.2 and avoid catching of internal cables. Use the M2 self-tapping screws supplied (shape of screw head is phillip #0 for precision machinery) to secure from the direction of P shell B (2 places). Cable Casing Self-tapping Screw And Dushing to the end face of P shell, and put P shell and bushing into the casing as shown in Fig.2. With groove of hood and protruding portion of P shell aligned, install hood over P shell as shown in Fig.3. Fig.3 Install casing over P shell as shown in Fig.4. Cable Fig.4	5	Assemble mold block having cables connected to location P shell A as shown in Fig.1.				
screws supplied (shape of screw head is phillip #0 for precision machinery) to secure from the direction of P shell B (2 places). Cable Casing Self-tapping Serew Move bushing to the end face of P shell, and put P shell and bushing into the casing as shown in Fig.2. With groove of hood and protruding portion of P shell aligned, install hood over P shell as shown in Fig.3. Install casing over P shell as shown in Fig.4. Cable Fig.4 Fig.3	6		d at the center (C section) of cable outlet of P shell A as			
Move bushing to the end face of P shell, and put P shell and bushing into the casing as shown in Fig.2. ◆Terminal Arrangement and performance

Shell size	10 sizes			
Terminal arrangement				
No. of contacts	5 8 10			
Withstand voltage	300V AC for 1 minute			
Rated current	1A			
Insulation resistance	200MΩ or more at 250V DC			
Contact resistance	30mΩ or less (excluding cable conductor resistance)			

Shell size	14 sizes	
Terminal arrangement		
No. of contacts	20	
Withstand voltage	300V AC for 1 minute	
Rated current	1A	
Insulation resistance	200mΩ or more at 250V DC	
	30mΩ or less	
Contact resistance	(excluding cable conductor	
	resistance)	

Remarks: 1. The above figures show the receptacle pin inserts as viewed from the mating side.

- 2. Withstand voltage shows the testing voltage.
- 3. Contact resistance is as measured at 1A DC.

Precautions

This product series uses silver plated contacts. Silver reacts easily to exposure to sulfur gas so the below conditions may cause tarnishing.

- Dusty environments
- · Area with a high concentration area of gases such as sulfur dioxide gas, hydrogen sulfide gas, nitrogen dioxide gas and so on. Example; In close proximity to factory exhaust, automotive emissions, etc.
- ·Close to heaters, or in other areas marked by extreme temperature differences or high humidity.
- ·Close to rubber products includes rubber adhesives.

The Electrical connection is not affected by tarnishing on a silver surface due to the wiping effect of the contact pins.

Storage

Packing state; Packed in original packing or equivalent container

Temperature -10 to +60°C Humidity 85% Max

(It is recommended that the product be stored in an area of normal level of temperature and humidity, and free of any temperature fluctuation)

Please use this products within 6 months of delivery.

(After 6 month, please check the solderbility before use)

"Storage" means long-term storage of the unused products in sealed packaging, prior to assembly to PCB.
