400A AC Auto-Ranging Digital Clamp Meter with High-Visibility OLED Display

True RMS Measurement Technology

Super-bright OLED display is highly visible in both bright and low-light environments

Large clamp opening for non-contact measuring of AC current

Replaceable test leads for measuring voltage, resistance, capacitance, continuity, etc.

Includes pouch, test leads, thermocouple and batteries

CL330 is an auto-ranging, true Root-Means-Square (TRMS) digital clamp meter that measures AC current via the clamp, AC/DC voltage, resistance, frequency, capacitance, tests diodes (via test leads), and measures temperature via a thermocouple probe. It features a high-visibility, dual-display **OLED screen** that optimizes viewability in both bright and dark environments, even when viewed at indirect angles.
