WIS-OSC

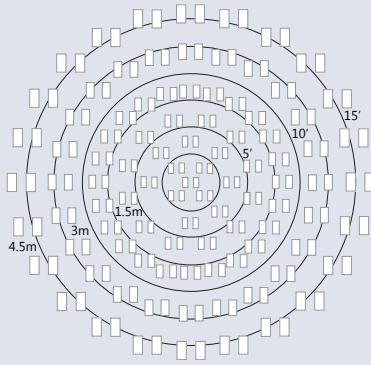

Saving energy without sacrificing comfort can be effortless with occupancy based controls. Hubbell Controls' *wiSTAR* Ceiling Mounted Occupancy Sensor enables a new level of energy saving control for rooms, hallways and other common areas. The occupancy sensor uses radio frequency technology to communicate wirelessly with other *wiSTAR* devices to turn off lights and electrical loads when a space has been unoccupied for a set period of time.

Because the sensor is wireless there is no need to run additional wiring and installation can be completed in a matter of minutes. The sensor is self-powered by harvesting light energy, eliminating the need for periodic battery changes. The clean, contemporary styling makes the sensor an attractive addition to any décor.

### PRODUCT FEATURES
