

**MP-800 - Reference Point Locator - Data Sheet**

Reference Point Locator. Drill or cut through walls with complete location certainty. A two component kit (transmitter & locator) allows you to pinpoint the exact location to drill or cut through a wall. Place the transmitter on one side of the wall and from the opposite side watch as the receiver draws you to the exact location of the transmitter. Mark the spot and drill. Accurate to within 1/2" and up to 40 inches away. Kit includes: transmitter, receiver, two 9V batteries, tack adhesive, instruction sheet and carrying case.
