

## VOLTAGE PROTECTION FOR DC SOLID-STATE RELAYS

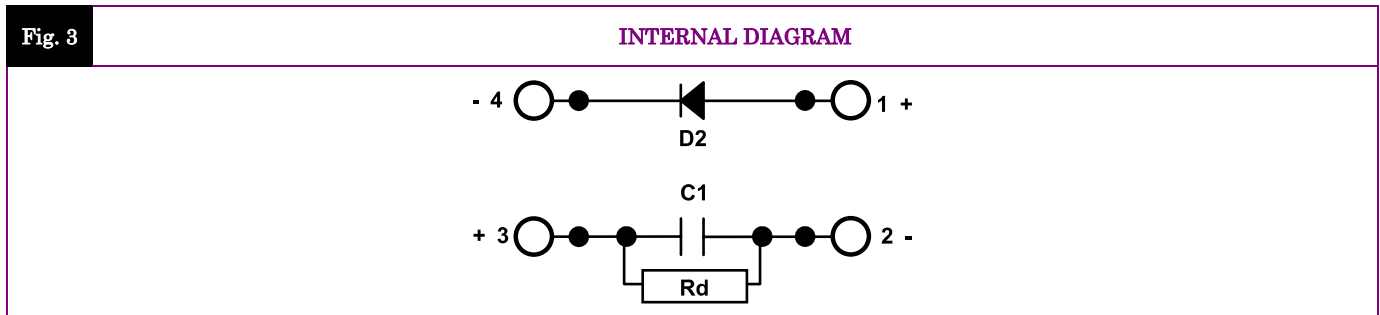

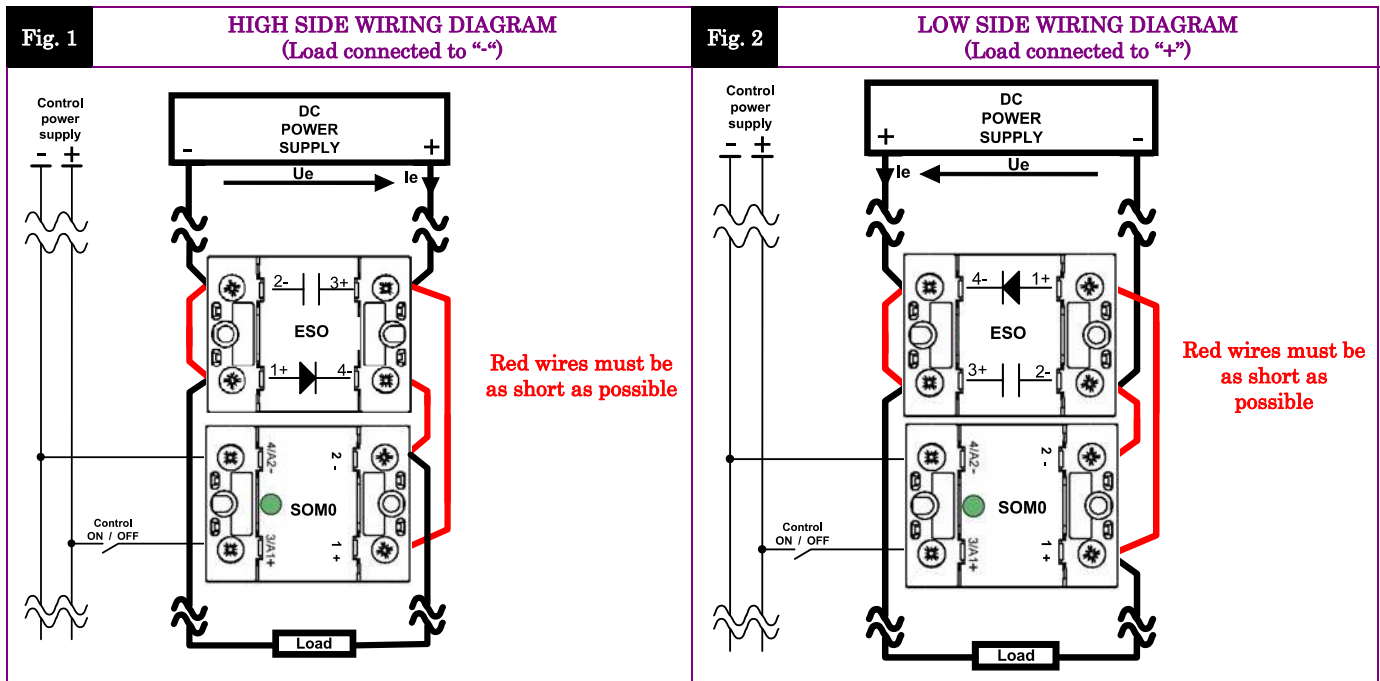

- ▶ Helps protecting solid-state relays against voltage transient due to the inductive effect of lines and loads.
- ▶ Fly wheel diode (D2), with fast response, low on-state voltage drop and connection polarity free, mounted on the metal base plate to be cooled by a heatsink for high switching frequency applications (PWM)
- ▶ Decoupling capacitor (C1), connection polarity free and non polarized (polyester) equipped with a discharging resistor
- ▶ SSR voltage clamping function (D1) not included therefore more adapted to SOM0 DC SSR range (SSR with built-in voltage protection D1)

# ESO01000

Non-repetitive peak voltage	200VDC
Max operating permanent current	80A
Clamping voltage function for DC relays (D1)	No
