For **Digi Connect® EZ**, **Digi ConnectPort® TS** and **Digi ConnectPort® LTS**, **Digi PortServer® TS**, **Digi Neo®** and other Digi products with RJ-45 10 pin Connectors. **Digi Passport®**, **Digi CM** and **Digi Etherlite** use different pinouts, please refer to the appropriate product documentation. All RJ45 to DB(x) cables are 10-pin. Only the RJ45 to RJ45 cable is an 8-pin cable.

All RJ45 adapters are 8-pin. When using these adapters with modems or other applications that require DCD on pin 1, you must turn on altpin.

If altpin is turned off, the hardware signal on pin 1 becomes DSR instead of DCD. This alternative can be used if DCD is not required, and DSR is needed instead.
