

## Infrared T1 3/4 LED

Product ID: **350-00003**

### **Overview**

T1 3/4 Infrared light emitting diode, for breadboard or through-hole projects. Used with the LED Standoff and LED Light Shield to build the IR Transmitter Assembly (#350-00017).

Frequently used with the IR Receiver for object detection and autonomous robot navigation, this is a compatible replacement wherever an Infrared LED is found in any of our Education Kits Components Listings.
