DOOM (SECO)

Ultra Low Profile 0805 Power Divider 50Ω to 50Ω

Description:

The PD2328J5050S2HF is a low profile, sub-miniature Wilkinson power divider in an easy to use surface mount package. The PD2328J5050S2HF is ideal for high volume manufacturing and delivers higher performances than traditional printed and lumped element solutions. The PD2328J5050S2HF is matched to $50\,\Omega$ and has a height profile of 0.5 mm, which is ideal for high-level integrations in the following markets: WiMAX, 802.11b & g, Bluetooth, ZigBee, and XM & Sirius radio. The PD2328J5050S2HF does not include the resistive element and therefore, requires an external resistor for operation. The PD2328J5050S2HF is available on tape and reel for high volume manufacturing pick and place.

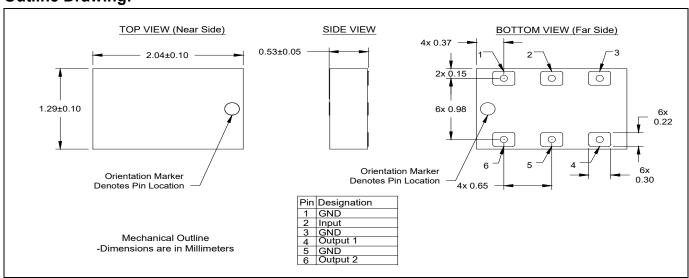

Detailed Electrical Specifications:

Specifications subject to change without notice.

		ROOM (25°C)			
Features:	Parameter	Min.	Тур.	Max	Unit
• 2300-2800 MHz	Frequency	2300		2800	MHz
• 21 dB Isolation (output ports)	Input Port Impedance		50		Ω
Good Return Loss0.5mm Height Profile	Output Port Impedance		50		Ω
• 50Ω Input / 50Ω Outputs	Return Loss	15	19		dB
 Low Insertion Loss 	Insertion Loss*		0.3	0.5	dB
Surface Mountable	Amplitude Balance		0.1	0.3	dB
Tape & Reel	Phase Balance		1	2	Degrees
Non-conductive Surface	Isolation (Output Ports)	17	21	_	dB
RoHS Compliant	· · · ·	17	۷ ۱	2	Watts
 External Resistor Required 	Power Handling @85C			_	
Halogen Free	Operating Temperature	-55		+105	°C

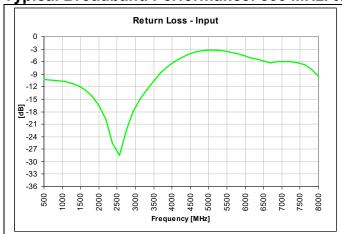

^{*}Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C

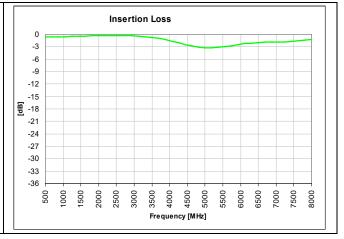

Outline Drawing:

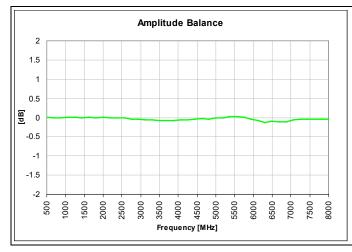

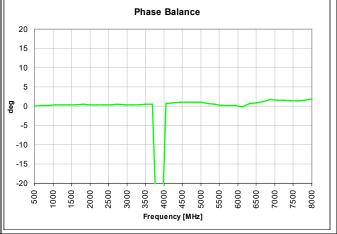

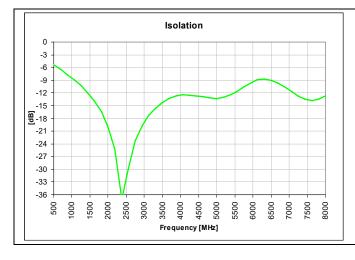

Typical Broadband Performance: 500 MHz. to 8.0 GHz.

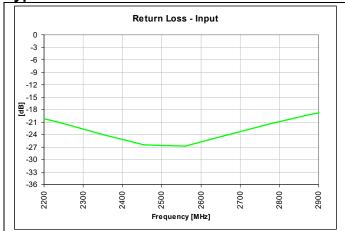

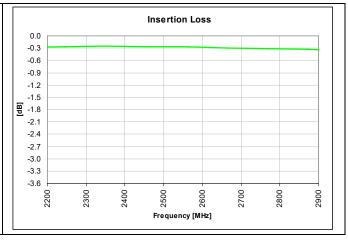

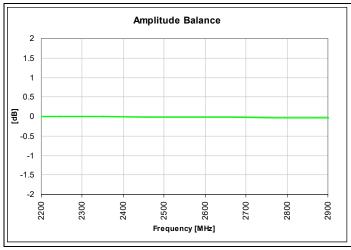

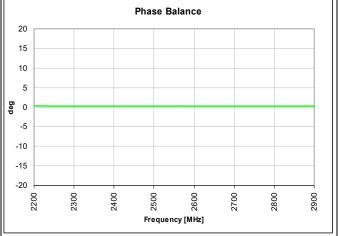

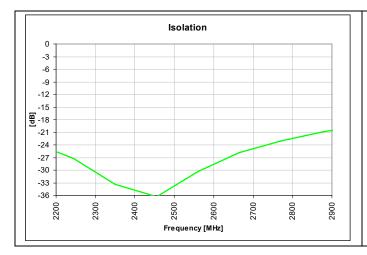

Typical Performance: 2200 MHz. to 2900 MHz.

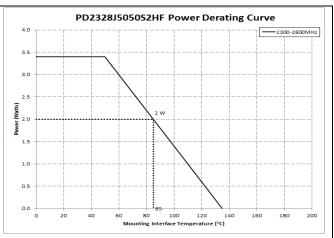

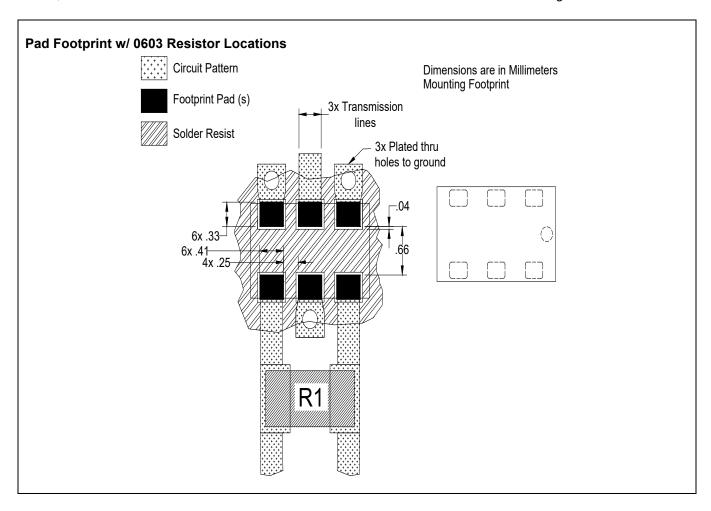

Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from organic PTFE based composites which possess excellent electrical and mechanical stability. Xinger components are compliant to a variety of ROHS and Green standards and ready for Pb-free soldering processes. Pads are Gold plated with a Nickel barrier.

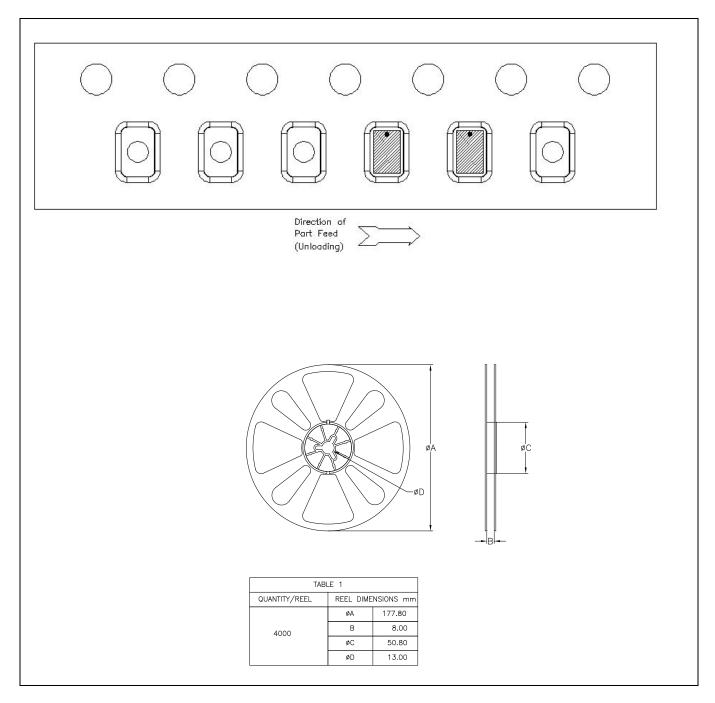

An example of the PCB footprint used in the testing of these parts is shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances. In addition, since the PD2328J5050S2HF is a Wilkinson power divider, an external $0603\ 100\Omega$ resistor must be mounted in locations R1 as shown in the Figure below.

Packaging and Ordering Information:

Parts are available in reel and are packaged per EIA 481-D. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel.
