

## AUIR3313(S)

### PROGRAMMABLE CURRENT SENSE HIGH SIDE SWITCH

#### Features

- Load current feedback
- Programmable over current shutdown
- Active clamp
- ESD protection
- Input referenced to Vcc
- Over temperature shutdown
- Reverse battery protection
- Lead Free, RoHS compliant

#### Description

The AUIR3313(S) is a fully protected 4 terminals high side switch. The input signal is referenced to Vcc. When the input voltage  $V_{cc} - V_{in}$  is higher than the specified threshold, the output power Mosfet is turned on. When the  $V_{cc} - V_{in}$  is lower than the specified  $V_{il}$  threshold, the output Mosfet is turned off. A current proportional to the power Mosfet current is sourced to the Ifb pin. Over current shutdown occurs when  $V_{ifb} - V_{in} > 4.7V$ . The current shutdown threshold is adjusted by selecting the proper  $R_{ifb}$ . Either over current and over temperature latches off the switch. The device is reset by pulling the input pin high. Other integrated protections (ESD, reverse battery, active clamp) make the switch very rugged in automotive environment.

#### Typical Connection

#### Product Summary

|                 |                   |
|-----------------|-------------------|
| $R_{ds(on)}$    | 7 m $\Omega$ max. |
| $V_{cc\ op.}$   | 6 to 32V          |
| Current Ratio   | 8800              |
| Prog. Ishutdown | 10 to 90A         |
| $V_{clamp}$     | 40V               |

† Qualification standards can be found at International Rectifier's web site <http://www.irf.com/>

†† Exceptions to AEC-Q100 requirements are noted in the qualification report.

## Absolute Maximum Ratings

Absolute maximum ratings indicate sustained limits beyond which damage to the device may occur. All voltage parameters are referenced to Vcc lead. (Tj=-40°..150°C, Vcc=6..26V Tambient=25°C unless otherwise specified).

| Symbol                 | Parameter   | Min. | Max. | Units |
|------------------------|---|------|------|-------|
| Vcc-Vin                | Maximum Vcc voltage                                       | -16  | 37   | V     |
| Vcc-Vin cont.          | Maximum continuous Vcc voltage                            | -16  | 32   |       |
| Vcc-Vfb                | Maximum lfb voltage                                       | -16  | 33   |       |
| Vcc-Vout               | Maximum output voltage                                    | -0.3 | 37   | A     |
| I <sub>ds</sub> cont.  | Maximum body diode continuous current Rth=60°C/W (1)      | —    | 2.8  |       |
| I <sub>ds</sub> pulsed | Maximum body diode pulsed current (1)                     | —    | 100  | W     |
| Pd                     | Maximum power dissipation Rth=60°C/W                      | —    | 2    |       |
| Tj max.                | Max. storage & operating temperature junction temperature | -40  | 150  | °C    |
| Min Rfb                | Minimum on the resistor on lfb pin                        | 0.3  | —    | kΩ    |
| I <sub>fb</sub> max.   | Max. lfb current  | -50  | 50   | mA    |

(1) Limited by junction temperature. Pulsed is also limited by wiring

## Thermal Characteristics

| Symbol | Parameter  | Typ. | Max. | Units |
|--------|--|------|------|-------|
| Rth1   | Thermal resistance junction to ambient D <sup>2</sup> -Pak Std footprint | 60   | —    | °C/W  |
| Rth2   | Thermal resistance junction to case D <sup>2</sup> -Pak                  | 0.7  | —    |       |
| Rth2   | Thermal resistance junction to case TO220                                | 0.7  | —    |       |

## Recommended Operating Conditions

These values are given for a quick design. For operation outside these conditions, please consult the application notes.

| Symbol           | Parameter  | Min. | Max.    | Units |
|------------------|--|------|---------|-------|
| I <sub>out</sub> | Continuous output current  | —    | 23<br>7 | A     |
|                  | T <sub>ambient</sub> =85°C, R <sub>th</sub> =5°C/W, T <sub>j</sub> =125°C  |      |         |       |
|                  | T <sub>ambient</sub> =85°C, R <sub>th</sub> =60°C/W, T <sub>j</sub> =125°C |      |         |       |
| R <sub>lfb</sub> | Recommended lfb resistor (2)(3)  | 0.3  | 3.5     | kΩ    |
| Pulse min.       | Minimum turn-on pulse width  | 1    | —       | ms    |
| F <sub>max</sub> | Maximum operating frequency  | —    | 200     | Hz    |

(2) If R<sub>lfb</sub> is too low, the device can be damaged.

(3) If R<sub>lfb</sub> is too high, the device may not switch on.

## Protection Characteristics

T<sub>J</sub> = -40°..150°C, V<sub>CC</sub> = 6..26V, R<sub>ifb</sub> = 300 to 5kΩ

| Symbol                   | Parameter                             | Min. | Typ. | Max. | Units | Test Conditions                                       |

| V <sub>Ih</sub>     | High level Input threshold voltage (4)              | —    | 5.4  | 6.3  | V     |  |
| V <sub>Il</sub>     | Low level Input threshold voltage (4)               | 4    | 4.9  | 5.8  |       |  |
| V <sub>hyst</sub>   | Input hysteresis V <sub>Ih</sub> -V <sub>Il</sub>   | 0.2  | 0.4  | 1.5  |       |  |
| I <sub>out</sub>    | Drain to source leakage current                     | —    | 1.2  | 5    | μA    | V <sub>in</sub> = V <sub>CC</sub> , V <sub>CC-Vifb</sub> = 0V,<br>V <sub>CC-Vout</sub> = 14V, T <sub>J</sub> = 25°C  |
| R <sub>ds(on)</sub> | On state resistance (5) T <sub>J</sub> = 25°C       | —    | 5.5  | 7    | mΩ    | I <sub>out</sub> = 30A, V <sub>CC-Vin</sub> = 14V  |
|                     | On state resistance (5) T <sub>J</sub> = 25°C       | —    | 6    | 10   |       | I <sub>out</sub> = 17A, V <sub>CC-Vin</sub> = 6V   |
|                     | On state resistance (5)(6) T <sub>J</sub> = 150°C   | —    | 10.5 | 13.5 |       | I <sub>out</sub> = 30A, V <sub>CC-Vin</sub> = 14V  |
| V <sub>clamp1</sub> | V <sub>CC</sub> to V <sub>out</sub> clamp voltage 1 | 36   | 39   | —    | V     | I <sub>out</sub> = 50mA  |
| V <sub>clamp2</sub> | V <sub>CC</sub> to V <sub>out</sub> clamp voltage 2 | —    | 40   | 43   |       | I <sub>out</sub> = 30A, T <sub>J</sub> = 25°C  |

(4) Input thresholds are measured directly between the input pin and the tab. Any parasitic resistance in common between the load current path and the input signal path can significantly affect the thresholds.

(5) R<sub>ds(on)</sub> is measured between the tab and the Out pin, 5mm away from the package.

(6) Guaranteed by design

## Switching Electrical Characteristics

V<sub>CC</sub> = 14V, Resistive load = 0.5Ω, T<sub>J</sub> = 25°C

| Symbol            | Parameter  | Min. | Typ. | Max. | Units | Test Conditions |
|-------------------|--|------|------|------|-------|-----------------|
| t <sub>don</sub>  | Turn on delay time to 10% V <sub>CC</sub>              | 8    | 32   | 80   | μs    | See figure 2    |
| t <sub>r1</sub>   | Rise time to V <sub>CC-Vout</sub> = 5V                 | 3    | 16   | 40   |       |                 |
| t <sub>r2</sub>   | Rise time to V <sub>CC-Vout</sub> = 0.1V <sub>CC</sub> | 6    | 40   | 90   |       |                 |
| E <sub>on</sub>   | Turn on energy   | —    | 4.5  | —    | mJ    |                 |
| t <sub>doff</sub> | Turn off delay time                                    | 20   | 80   | 200  | μs    |                 |
| t <sub>f</sub>    | Fall time to V <sub>out</sub> = 10% of V <sub>CC</sub> | 8    | 32   | 80   |       |                 |
| E <sub>off</sub>  | Turn off energy  | —    | 2    | —    |       |                 |

## IMPORTANT NOTICE

Unless specifically designated for the automotive market, International Rectifier Corporation and its subsidiaries (IR) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or services without notice. Part numbers designated with the "AU" prefix follow automotive industry and / or customer specific requirements with regards to product discontinuance and process change notification. All products are sold subject to IR's terms and conditions of sale supplied at the time of order acknowledgment.

IR warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with IR's standard warranty. Testing and other quality control techniques are used to the extent IR deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

IR assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using IR components. To minimize the risks with customer products and applications, customers should provide adequate design and operating safeguards.

Reproduction of IR information in IR data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alterations is an unfair and deceptive business practice. IR is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of IR products or serviced with statements different from or beyond the parameters stated by IR for that product or service voids all express and any implied warranties for the associated IR product or service and is an unfair and deceptive business practice. IR is not responsible or liable for any such statements.

IR products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or in other applications intended to support or sustain life, or in any other application in which the failure of the IR product could create a situation where personal injury or death may occur. Should Buyer purchase or use IR products for any such unintended or unauthorized application, Buyer shall indemnify and hold International Rectifier and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that IR was negligent regarding the design or manufacture of the product.

IR products are neither designed nor intended for use in military/aerospace applications or environments unless the IR products are specifically designated by IR as military-grade or "enhanced plastic." Only products designated by IR as military-grade meet military specifications. Buyers acknowledge and agree that any such use of IR products which IR has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

IR products are neither designed nor intended for use in automotive applications or environments unless the specific IR products are designated by IR as compliant with ISO/TS 16949 requirements and bear a part number including the designation "AU". Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, IR will not be responsible for any failure to meet such requirements.
