DESCRIPTION

The LTD-6750JD is a 0.56-inch (14.22-mm) digit height dual digit low current seven-segment display. This device utilizes AlInGaP hi-eff. red LED chips, which are made from AlInGaP on a non-transparent GaAs substrate, and has a gray face and white segments.

This low current seven-segment display is designed to perform under low power consumption. It is tested and selected for its excellent low current characteristics. It can be driven in low current condition and the segments are matched. This driving current as low as 1mA per segment is applicable.
