Concept of operation

KT5-2 Potentiometer

1. Select switching function (light/dark)

Turn the rotary switch to the desired position.

- = light switching
- = dark switching

2. Position mark

Turn potentiometer in the direction shown (green LED illuminates) until the yellow LED status changes and the green LED opposite illuminates.

3. Position background

Gradually turn back the potentiometer (count the number of turns) until the yellow LED changes status again and illuminates.

Turn the potentiometer forward again by half the number of turns to ensure that the switching threshold is optimally set.

Example

Switching characteristics

The switching threshold is set in the center between the background and the mark.
