

Digital Fiber Sensor

FX-410 SERIES

FX-410 SERIES

Just “Look” and “Turn”, Simple, easy-to-use fiber sensor

Incident light intensity and threshold value are displayed simultaneously

The incident light intensity and threshold value can be checked at the same time with no operations needed. In addition, no complex mode settings are needed when the values are adjusted.

Adjustment variations according to the individual have been eliminated

Accurate control of the adjuster threshold values by using numerical values is possible due to the digital display. This allows anybody to perform the same settings.

Easy-to-understand operating panel layout

The threshold value adjuster and operation mode switch are large and easy to see, and they can be operated with the same sensitivity as general-purpose photoelectric sensors. Functions which are not commonly used can be operated using a non-obtrusive setting switch.

Threshold values can be changed smoothly

This sensor uses the R.S.S.* adjuster with a compact encoder inside. The sensitivity amount changes depending on the rotation speed of the adjuster, so that adjustment can be carried out speedily.

* Rotation Speed Sensitivity

Adjustment in units of 1 digit is also easy
No need for the fine changes in force required for photoelectric sensors.

Large endless adjuster

New concept

Standard screwdrivers can be used to turn the adjuster as well as precision screwdrivers. In addition, an “endless” mechanism is used which eliminates the possibility of any damage being caused by turning the adjuster too far.

FX-412 can be turned by finger!

New concept

The adjuster can be turned directly by finger, without the need for a screwdriver.

Beam power greatly increased to give strong performance under adverse environments

Red LED type

The beam power has been greatly increased. This means a longer sensing distance and less trouble from problems such as dust. These sensors have ample performance for workplace needs.

Three types are available, with red, blue and green light

Different sensors can be selected to suit the application.

Improved stability over both long and short terms

Red LED type

The red LED type sensors have a “four-chemical emitting element” which maintains stability of light emissions for long-term operation. Furthermore, all models have an “APC (Auto Power Control) circuit” which improves stability at times such as when the power is turned on. These features improve overall stability compared to previous models.

Color combinations that can be discerned during mark sensing

Mark color / Back ground color	White	Yellow	Orange	Red	Green	Blue	Black
White		●	●	●●	●●●	●●●	●●●
Yellow	●		●	●●	●●●	●●●	●●●
Orange	●	●		●●	●●●	●●●	●●●
Red	●●	●	●		●	●●	●●
Green	●●●	●●●	●●●	●		●	●
Blue	●●●	●●●	●●●	●●	●		●
Black	●●●	●●●	●●●	●●	●	●	

●: Red LED type ●: Blue LED type ●: Green LED type

Excellent workability and ease of maintenance

Connector type

The same quick-connection cable that is used for sensors such as the FX-300 series of digital fiber sensors is used. This means that they can be used together with other types of sensors such as laser sensors, and the number of power supply cables can be reduced.

The sensors can be connected together with other sensors such as the FX-300 series of digital fiber sensors and the GA-311 of inductive proximity sensors. In addition, the SC series of sensor PLC connection units with MIL connector compatibility can also be used to further reduce the amount of wiring (P.987~).

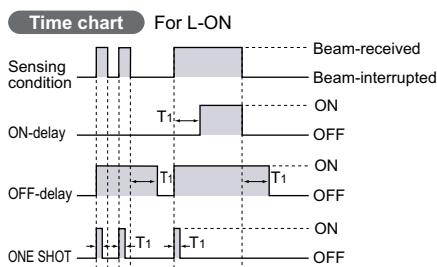

Contributing to device miniaturization

This fiber sensor is the smallest among the dual digital display types, contributing to device miniaturization.

Equipped with 3 types timers

Equipped with OFF-delay / ON-delay / ONE SHOT timer. (Timer period: 1 ms to 3 sec. approx.)

Interference prevention for up to 8 sets fiber heads (for U-LG)

The optical communication function allows up to a maximum of eight sets of fiber heads (four sets for FAST and STD settings) to be installed in contact with each other without mutual interference occurring. (Set automatically when power is turned on.)

Key lock function prevents wrong operation

This prevents the operator from changing the threshold value by mistake.

Ideal for dealing with saturation / Light-emitting amount selection function

Red LED type **New concept**

In cases where the incoming light level can become saturated, such as during close-range sensing or when sensing transparent or minute objects, the sensor's light-emitting amount can be adjusted to provide more stable sensing without changing the response time.

Digital display upside-down / off function

The digital display can be turned upside-down if required to suit the setup location. In addition, a stability indicator is also provided, so that the amount of light-receiving excess can be checked even when the display is turned off.

Hold function

Peak and bottom hold values for the incident light intensity can be displayed. This is useful for checking the incident light intensity during tasks such as drop detection.

In addition, the peak and bottom values can be checked while looking at the threshold value, which makes adjustment much easier.

ORDER GUIDE

Amplifiers Quick-connection cable is not supplied with the amplifier. Please order it separately.

Type	Appearance	Model No.	Emitting element	Output
NPN output		FX-411	Red LED	NPN open-collector transistor
		FX-411B	Blue LED	
		FX-411G	Green LED	
PNP output		FX-411P	Red LED	PNP open-collector transistor
		FX-411BP	Blue LED	
		FX-411GP	Green LED	
NPN output		FX-412 (Note)	Red LED	NPN open-collector transistor
		FX-412B (Note)	Blue LED	
		FX-412G (Note)	Green LED	

Note: The **FX-412** has a threshold value adjuster that can be adjusted with your fingers.

Quick-connection cables Quick-connection cable is not supplied with the amplifier. Please order it separately.

Type	Model No.	Description	
Main cable (3-core)	CN-73-C1	Length: 1 m 3.281 ft	0.2 mm ² 3-core cabtyre cable, with connector on one end Cable outer diameter: \varnothing 3.3 mm \varnothing 0.130 in
	CN-73-C2	Length: 2 m 6.562 ft	
	CN-73-C5	Length: 5 m 16.404 ft	
Sub cable (1-core)	CN-71-C1	Length: 1 m 3.281 ft	0.2 mm ² 1-core cabtyre cable, with connector on one end Cable outer diameter: \varnothing 3.3 mm \varnothing 0.130 in
	CN-71-C2	Length: 2 m 6.562 ft	
	CN-71-C5	Length: 5 m 16.404 ft	

Main cable

- **CN-73-C**

Sub cable

- **CN-71-C**

End plates End plates are not supplied with the amplifier. Please order them separately when the amplifiers are mounted in cascade.

Appearance	Model No.	Description
	MS-DIN-E	When amplifiers are mounted in cascade, or when an amplifier moves depending on the way it is installed on a DIN rail, these end plates clamp amplifiers into place on both sides. Make sure to use end plates when cascading multiple amplifiers together. 2 pcs. per set

OPTIONS

Designation	Model No.	Description
Amplifier mounting bracket	MS-DIN-2	Mounting bracket for amplifier
Fiber amplifier protection seal	FX-MB1	10 sets of 2 communication window seals and 1 connector seal Communication window seal: It prevents malfunction due to transmission signal from another amplifier, as well as, prevents effect on another amplifier. Connector seal: It prevents contact of any metal, etc., with the pins of the quick-connection cable.

Amplifier mounting bracket

- **MS-DIN-2**

Fiber amplifier protection seal

- **FX-MB1**

LIST OF FIBERS

Notes: 1) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.

2) The fiber cable length practically limits the sensing range.

3) Heat-resistant joint fibers and ordinary-temperature fibers (**FT-42**) are sold as a set.

4) Sold as a set comprising vacuum type fiber + photo-terminal (**FV-BR1**) + fiber at atmospheric side (**FT-J8**).

Notes: 1) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.

2) The fiber cable length practically limits the sensing range.

Retroreflective type

Fibers are listed in alphabetic order.

Model No.	Sensing range (mm in) (Note 1,2)									Dimensions
	Red LED			Blue LED			Green LED			
	U-LG	STD	FAST	U-LG	STD	FAST	U-LG	STD	FAST

FR-KZ50E	20 to 400 0.787 to 15.748	20 to 200 0.787 to 7.874	20 to 200 0.787 to 7.874	20 to 200 0.787 to 7.874	20 to 84 0.787 to 3.307	20 to 45 0.787 to 1.771	20 to 180 0.787 to 7.087	20 to 55 0.787 to 1.969	—	P.70
FR-KZ50H	20 to 400 0.787 to 15.748	20 to 200 0.787 to 7.874	20 to 200 0.787 to 7.874	20 to 145 0.787 to 5.709	20 to 47 0.787 to 1.850	20 to 26 0.787 to 1.024	20 to 145 0.787 to 5.709	20 to 47 0.787 to 1.850	20 to 26 0.787 to 1.024	P.70
FR-Z50HW	100 to 1,000 3.937 to 39.370	100 to 540 3.937 to 21.260	100 to 460 3.937 to 18.110	100 to 490 3.937 to 19.291	—	—	—	—	—	P.70

Notes: 1) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.

The sensing range of **FR-KZ22E** is specified for the attached reflector. The sensing range of **FR-KZ50E** and **FR-KZ50H** is specified for the attached reflector **RF-003**. The sensing range of **FR-Z50HW** is specified for the reflective tape **RF-13**.

2) The sensing range is the possible setting range for the attached reflector. The fiber can detect an object less than setting range for the reflector.

However, note that if there are any white or highly-reflective surfaces near the fiber head, reflected incident light may affect the fiber head. If this occurs, adjust the threshold value of the amplifier unit before use.

Sensing range when using in combination with FR-Z50HW reflector (Optional)

The sensing ranges are the value for red LED types.

Reflector Model No.	Sensing range (mm in)		
	FX-411		
	U-LG	STD	FAST
RF-230	100 to 12,000 3.937 to 47.244	100 to 1,700 3.937 to 66.929	100 to 1,300 3.937 to 51.181
RF-220	100 to 2,200 3.937 to 8.661	100 to 950 3.937 to 37.402	100 to 730 3.937 to 28.740
RF-210	100 to 2,100 3.937 to 82.677	100 to 780 3.937 to 30.709	100 to 620 3.937 to 24.409

Note: The sensing range is the possible setting range for the reflector. The fiber can detect an object less than setting range for the reflector. However, note that if there are any white or highly-reflective surfaces near the fiber head, reflected incident light may affect the fiber head. If this occurs, adjust the threshold value of the amplifier unit before use.

Notes: 1) The standard sensing objects of the sensing ranges vary depending on the fibers.

2) Note that the sensing range of the free-cut type fiber may be reduced by 20 % max. depending upon how the fiber is cut.

3) Sold as a set comprising vacuum type fiber + photo-terminal (FV-BR1) + fiber at atmospheric side (FT-J8).

Expansion lens for vacuum fiber (Note 1)	FV-LE1	 <p>Sensing range increases by 4 times or more.</p> <ul style="list-style-type: none"> Ambient temperature: -60 to +350 °C -76 to +662 °F (Note 5) Beam dia: ø3.6 mm ø0.142 in 																																													
Vacuum resistant side-view lens (Note 1)	FV-SV2	 <p>Beam axis is bent by 90°.</p> <ul style="list-style-type: none"> Ambient temperature: -60 to +300 °C -76 to +572 °F (Note 5) Beam dia: ø3.7 mm ø0.146 in 																																													

Notes: 1) Be careful sure to use it only after you have adjusted it sufficiently when installing the thru-beam type fiber equipped with the expansion lens, as the beam envelope becomes narrow and alignment is difficult.
 2) The sensing ranges are the values for red LED type amplifier. Please contact our office for details on sensing ranges for other types of amplifiers.
 3) The fiber cable length practically limits the sensing range.
 4) The fiber cable length for the **FT-H30-M1V-S** is 1 m 3.281 ft. The sensing ranges in U-LG mode take into account the length of the **FT-J8** atmospheric side fiber.
 5) Refer to "Fiber Selection" for the ambient temperatures of fibers to be used in combination.

FIBER OPTIONS

Lens (For reflective type fiber)

Designation	Model No.	Description

- **FX-AT2** (Attachment for fixed-length fiber, Orange)
- **FX-AT3** (Attachment for $\varnothing 2.2$ mm $\varnothing 0.087$ in fiber, Clear orange)
- **FX-AT4** (Attachment for $\varnothing 1$ mm $\varnothing 0.039$ in fiber, Black)
- **FX-AT5** (Attachment for $\varnothing 1.3$ mm $\varnothing 0.051$ in fiber, Gray)
- **FX-AT6** (Attachment for $\varnothing 1$ mm $\varnothing 0.039$ in / $\varnothing 1.3$ mm $\varnothing 0.051$ in mixed fiber, Black / Gray)
- **FX-AT4G1** (Gland single for $\varnothing 1$ mm $\varnothing 0.039$ in fiber, Black)
- **FX-AT5G1** (Gland single for $\varnothing 1.3$ mm $\varnothing 0.051$ in fiber, Gray)
- **FX-AT6G1** (Gland single for $\varnothing 1$ mm $\varnothing 0.039$ in / $\varnothing 1.3$ mm $\varnothing 0.051$ in mixed fiber, Black / Gray)
- **FX-SL1** (one pair set) Slit mask for **FT-A11 / FT-A11W**, slit size: 0.5×12 mm 0.020×0.472 in
- **FX-SL2** (one pair set) Slit mask for **FT-A11 / FT-A11W**, slit size: 1×12 mm 0.039×0.472 in
- **FX-SL3** (one pair set) Slit mask for **FT-A11 / FT-A11W**, slit size: 0.5×33 mm 0.020×1.299 in
- **MS-FD-2** (Fiber mounting bracket)

Others

Designation	Model No.	Description	
Protective tube (For thru-beam type fiber)	FTP-500 (0.5 m 1.641 ft)	For M4 thread	The protective tube, made of noncorrosive stainless steel, protects the inner fiber cable from any external forces.
	FTP-1000 (1 m 3.281 ft)		
	FTP-1500 (1.5 m 4.922 ft)		
	FTP-N500 (0.5 m 1.641 ft)	For M3 thread	
	FTP-N1000 (1 m 3.281 ft)		
	FTP-N1500 (1.5 m 4.922 ft)		
Protective tube (For reflective type fiber)	FDP-500 (0.5 m 1.641 ft)	For M6 thread	
	FDP-1000 (1 m 3.281 ft)		
	FDP-1500 (1.5 m 4.922 ft)		
	FDP-N500 (0.5 m 1.641 ft)	For M4 thread	
	FDP-N1000 (1 m 3.281 ft)		
	FDP-N1500 (1.5 m 4.922 ft)		
Fiber bender	FB-1	The fiber bender bends the sleeve part of the fiber head at the proper radius. (Note 1)	
Universal sensor mounting stand	MS-AJ1-F	Horizontal mounting type	Mounting stand assembly for fiber (For M3, M4 or M6 threaded head fiber)
	MS-AJ2-F	Vertical mounting type	
Single-core holder	FX-AT15A	The incident light intensity may vary when using a multi-core fiber or a thin type sharp bending fiber. This holder suppresses the variation in the incident light intensity. Brown.	

Note: 1) Do not bend the sleeve part of any side-view type fiber or ultra-small diameter head type fiber.

Protective tube

- **FTP-□**
- **FDP-□**

Fiber bender

- **FB-1**

Universal sensor mounting stand

Using the arm which enables adjustment in the horizontal direction, sensing can also be done from above an assembly line.

- **MS-AJ1-F** Swivel: 360° rotation

- **MS-AJ2-F** Swivel: 360° rotation

Single-core holder

- **FX-AT15A**

	Utilization category	DC-12 or DC-13						
	Output operation	Switchable either Light-ON or Dark-ON						
	Short-circuit protection	Incorporated						
Response time	150 μ s or less (FAST), 500 μ s or less (STD), 4.5 ms or less (U-LG) selectable with setting switch							
Operation indicator	Orange LED (lights up when the output is ON)							
Stability indicator	Green LED (lights up under stable light received condition or stable dark condition)							
Timer function	Incorporated with variable ON-delay / OFF-delay / ONE SHOT timer, switchable either effective or ineffective. [Timer period (Note 3): 1 ms to 3 sec. approx. (1 to 10 ms: Setting possible in units of 1 ms, 10 to 100 ms: Setting possible in units of 10 ms, 100 to 500 ms: Setting possible in units of 50 ms, 500 ms to 1 sec.: Setting possible in units of 100 ms, 1 to 3 sec.: Setting possible in units of 500 ms)]							
Automatic interference prevention function	Incorporated (Up to four sets of fiber heads can be mounted close together. However, U-LG mode is 8 fiber heads.)(Note 4)							
Environmental resistance	Pollution degree	3 (Industrial environment)						
	Ambient temperature	-10 to +55 °C -14 to +131 °F (If 4 to 7 units are connected in cascade: -10 to +50 °C +14 to +122 °F, if 8 to 16 units are connected in cascade: -10 to +45 °C +14 to +113 °F) (No dew condensation or icing allowed), Storage: -20 to +70 °C -4 to +158 °F						
	Ambient humidity	35 to 85 % RH, Storage: 35 to 85 % RH						
	Ambient illuminance	Incandescent light: 3,000 lx or less at the light-receiving face						
	Voltage withstandability	1,000 V AC for one min. between all supply terminals connected together and enclosure (Note 5)						
	Insulation resistance	20 M Ω , or more, with 250 V DC megger between all supply terminals connected together and enclosure (Note 5)						
	Vibration resistance	10 to 150 Hz frequency, 0.75 mm 0.030 in double amplitude in X, Y and Z directions for two hours each						
	Shock resistance	98 m/s ² acceleration (10 G approx.) in X, Y and Z directions five times each						
Emitting element (modulated)	Red LED	Blue LED	Green LED	Red LED	Blue LED	Green LED		
Peak emission wavelength	650 nm 0.026 mil	470 nm 0.019 mil	525 nm 0.021 mil	650 nm 0.026 mil	470 nm 0.019 mil	525 nm 0.021 mil		
Material	Enclosure: Heat-resistant ABS, Case cover: Polycarbonate							
Cable length	Total length up to 100 m 328.084 ft (50 m 164.042 ft for 5 to 8 units, 20 m 65.617 ft for 9 to 16 units) is possible with 0.3 mm ² , or more, cable.							
Weight	Net weight: 20 g approx., Gross weight: 30 g approx.							

Notes: 1) Where measurement conditions have not been specified precisely, the conditions used were an ambient temperature of +23 °C **+73.4 °F**.

2) The **FX-412** has a threshold value adjuster that can be adjusted with your fingers.

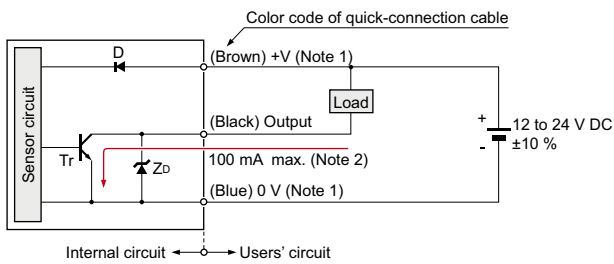

3) For models manufactured up until June 2005, the timer period is approx. 1 to 500 ms.

4) When the power supply is switched on, the light emission timing is automatically set for interference prevention.

5) The voltage withstandability and the insulation resistance values given in the above table are for the amplifier only.

I/O CIRCUIT DIAGRAMS**FX-41□**

NPN output type

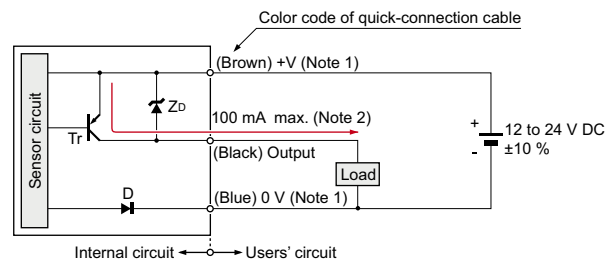

Notes: 1) The quick-connection sub cable does not have +V (brown) and 0 V (blue). The power is supplied from the connector of the main cable.
2) 50 mA max., if five amplifiers, or more, are connected together.

FX-41□P

PNP output type

Notes: 1) The quick-connection sub cable does not have +V (brown) and 0 V (blue). The power is supplied from the connector of the main cable.
2) 50 mA max., if five amplifiers, or more, are connected together.

Symbols ... D : Reverse supply polarity protection diode
Zd: Surge absorption zener diode
Tr : PNP output transistor

PRECAUTIONS FOR PROPER USE

- Never use this product as a sensing device for personnel protection.
- In case of using sensing devices for personnel protection, use products which meet laws and standards, such as OSHA, ANSI or IEC etc., for personnel protection applicable in each region or country.

Part description**Wiring**

- Make sure that the power supply is off while wiring.
- Verify that the supply voltage variation is within the rating.
- Take care that if a voltage exceeding the rated range is applied, or if an AC power supply is directly connected, the product may get burnt or damaged.
- In case noise generating equipment (switching regulator, inverter motor, etc.) is used in the vicinity of this product, connect the frame ground (F.G.) terminal of the equipment to an actual ground.
- If power is supplied from a commercial switching regulator, ensure that the frame ground (F.G.) terminal of the power supply is connected to an actual ground.
- Take care that short circuit of the load wrong wiring may burn or damage the product.
- Do not run the wires together with high-voltage lines or power lines or put them in the same raceway. This can cause malfunction due to induction.
- Extension up to total 100 m **328.084 ft** (if 5 to 8 units are connected in cascade: 50 m **164.042 ft**, if 9 to 16 units are connected in cascade: 20 m **65.617 ft**) is possible with 0.3 mm², or more, cable. However, in order to reduce noise, make the wiring as short as possible.
- Take care that cable extension increases the residual voltage.

Mounting

- Make sure that the power supply is off while connecting/disconnecting the amplifiers and the quick-connection cables.

How to mount the amplifier

- ① Fit the rear part of the mounting section of the amplifier on a width DIN rail.
- ② Press down the rear part of the mounting section of the unit on the width DIN rail and fit the front part of the mounting section to the DIN rail.

**How to remove the amplifier**

- ① Push the amplifier forward.
- ② Lift up the front part of the amplifier to remove it.

Note: Take care that if the front part is lifted without pushing the amplifier forward, the hook on the rear portion of the mounting section is likely to break.

Fiber installation

- Insert the fiber into the amplifier after attaching the attachment. Refer to the "Instruction Manual" included with the fiber for details.

- ① Push the fiber lock lever down.
- ② Slowly insert the fiber into the insertion slot until it stops. (Note 1)
- ③ Push the fiber lock lever back up until it stops.

Notes: 1) Note that if the fiber is not fully inserted, the sensing distance will decrease. Also note that the bending-resistant fiber may bend during insertion.

- 2) In case of coaxial reflective type fibers, mount the central fiber (single-core) to the emitter part and the peripheral fiber (multi-core) to the receiver. Note that sensing precision will deteriorate when done in reverse.

PRECAUTIONS FOR PROPER USE

Cascading

- Make sure that the power supply is off while adding or removing the amplifiers.
- Make sure to check the allowable ambient temperature, as it depends on the number of amplifiers connected in cascade.
- In case two, or more, amplifiers are connected in cascade, make sure to mount them on a DIN rail.
- When the amplifiers move on the DIN rail depending on the attaching condition or the amplifiers are mounted close to each other in cascade, fit them between the optional end plates (**MS-DIN-E**) mounted at the two ends.
- Up to maximum 15 amplifiers can be added (total 16 amplifiers connected in cascade.)
- When connecting more than two amplifiers in cascade, use the sub cable (**CN-71-C**) as the quick-connection cable for the second amplifier onwards.
- When connecting amplifiers not close to each other in parallel, be sure to mount the optional end plate (**MS-DIN-E**) at both sides of each amplifier or affix the communication window seal of the optional fiber amplifier protection seal (**FX-MB1**) to the communication windows. For details, refer to the instruction manual enclosed with the **FX-MB1**.
- When the different LED (red / blue / green) types are connected in cascade, mount the identical models together.
- When this product is used with the other digital fiber amplifiers, be sure to place this product to the left most position (When you look from the connector side). If this product is not placed to the leftmost position, this product may not operate properly.

Cascading method

- ① Mount the amplifiers, one by one, on the DIN rail.
- ② Slide the amplifiers next to each other, and connect the quick-connection cables.
- ③ Mount the optional end plates (**MS-DIN-E**) at both the ends to hold the amplifiers between their flat sides.
- ④ Tighten the screws to fix the end plates.

Dismantling

- ① Loosen the screws of the end plates.
- ② Remove the end plates.
- ③ Slide the amplifiers and remove them one by one.

Switching output operation

- The operation selection switch can be used to display different output operations (L-ON / D-ON) on the digital display.

When set to Dark-ON (D-ON)

When set to Light-ON (L-ON)

Threshold value (sensitivity) adjustment

- ① Check the incident light intensity [in the digital display (red)] when a sensing object is placed in the sensing position. (Incident light intensity)
- ② Check the incident light intensity [in the digital display (red)] when the sensing object is removed from the sensing position. (Incident light intensity)
- ③ Turn the threshold value adjuster to the threshold value [in the digital display (green)] that is the value in between ① and ②. (The threshold value is automatically written to the EEPROM.) (Threshold value)

Threshold value setting method

- When the threshold value adjuster is turned clockwise, the threshold value increases. When the threshold value adjuster is turned counterclockwise, the threshold value decreases.

- If there is a sufficient level of margin in the incident light intensity, the stability indicator (green) will light up.

Mode selection

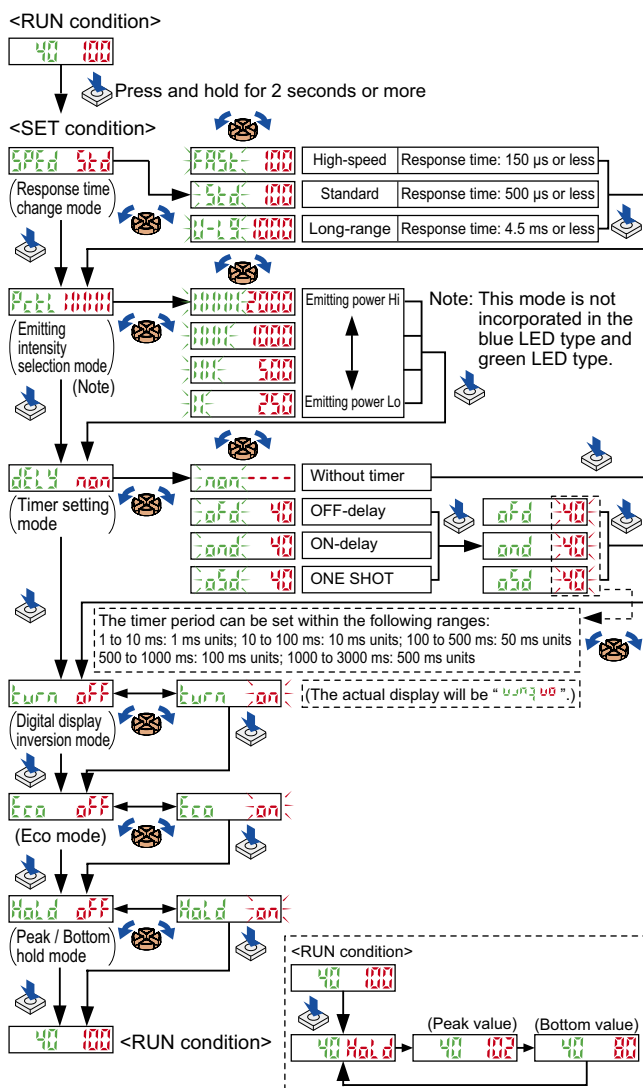

- When the setting switch is pressed and held for 2 sec. or more, "SET" mode (mode setting screen) is activated.
- If the setting switch is pressed while in "SET" mode, the mode will change.
- If the threshold value adjuster is turned while a mode is active, the setting item will change and blink.
- When the setting switch is pressed at the item you would like to set, it blinks 3 times and then the setting is confirmed and the mode switches to the next mode.
- If the setting switch is pressed and held for 2 sec. or more or do not press any key for 15 sec. while "SET" mode is active, the mode will switch automatically to "RUN" mode.

PRECAUTIONS FOR PROPER USE

Mode table

Mode	Factory setting	Description
Response time change mode	SPEd 5td	The response time can be set.
Light-emitting amount selection mode (Note 1)	PEL 0000	The light-emitting amount can be switched among four levels.
Timer setting mode	delY non	Timer settings can be selected; Without timer / OFF-delay timer / ON-delay timer / ONE SHOT timer. Also the timer period can be set.
Digital display inversion mode	turn off	The display on the digital display can be inverted.
Eco mode (Note 2)	Eco off	If no key is pressed for 20 sec. approx. while in "RUN" mode, the digital display turns off automatically. Press the setting switch or move the operation mode switch to make the display light up again. The digital display will light up when the threshold value adjuster is turned, but note that this will also cause the threshold value to change.
Peak / Bottom hold mode	Hold off	If the setting switch is pressed while "RUN" mode is active, the display will alternate between the peak hold value and the bottom hold value. (The display will refresh every 2 sec.) The display will return to normal if any operation other than threshold value setting is carried out.

Notes: 1) This mode is not incorporated in the blue LED type and green LED type.
 2) While the peak / bottom hold mode is ON, the digital display is not turned off even if the Eco mode is set to ON.

Key lock function

- When the setting switch is pressed and held for 5 sec. while in 'RUN' mode, the key lock function can be set / canceled.
- When the key lock function is set to ON, even if the threshold value adjuster or the setting switch is operated, "Loc" is displayed and the key operation cannot be carried out.

Note: Although the display changes to the indication of 'SET' condition 2 sec. after pressing the setting switch, keep pressing the switch. Furthermore, the sensor does not go into the key lock setting from 'SET' condition.

Factory setting

- When the setting switch is pressed and held for 10 sec., until "----" is displayed while in 'RUN' mode, the all settings are returned to the factory setting. (For the factory setting, refer to 'Mode table' in 'Mode selection'.)

Error display indicator readings

Display	Error description	Measures
Er-1	The load has short-circuited and excess current is flowing.	Turn off the power, then check the load.
Er-5	Communication error has occurred at time of connection.	Check if the mounted amplifiers are in close contact with each other.

Others

- This product has been developed / produced for industrial use only.
- Do not use during the initial transient time (0.5 sec.) after the power supply is switched on.
- This sensor is suitable for indoor use only.
- Do not use this sensor in places having excessive vapor, dust, etc., or where it may come in contact with corrosive gas.
- Take care that the sensor does not come in direct contact with oil, grease, organic solvents, such as, thinner etc., or strong acid, and alkaline.
- This sensor cannot be used in an environment containing inflammable or explosive gases.
- Never disassemble or modify the sensor.
- The changes to the settings are written to the EEPROM, but because the EEPROM has a limited service life, you should avoid changing the settings any more than 1 million times.

DIMENSIONS (Unit: mm in)
